(23) laying 300 lin. ft. of 12-in. diameter concrete pipe;
(24) laying 200 lin. ft. of 15-in. diameter concrete pipe;
(25) laying 200 lin. ft. of 18-in. diameter concrete pipe;
(26) laying 60 lin. ft. of 24-in. diameter concrete pipe;
(27) installing 3500 lbs. of gates and gate hoists;
(28) installing 6500 lbs. of miscellaneous metal work.

Schedule No. 2

Earthwork, dam embankment and structures, Contra Costa Canal, station 2512+25 to end, and Mountain View Reservoir.

(1) clearing 13 acres orchards and vineyards;
(2) grubbing 13 acres orchards and vineyards;
(3) 2000 cu. yds. of excavation, all classes, for outlet and spillway channels;
(4) 9500 cu. yds. of excavation, stripping dam foundation and borrow pits;
(5) 350 cu. yds. of excavation, all classes, for embankment toe drains;
(6) 160,000 cu. yds. of constructing dam embankment;
(7) 10,000 lin. ft. of sand-filled drain holes;
(8) 17,000 cu. yds. of sand drain in dam embankment;
(9) 6000 cu. yds. of riprap on dam;
(10) 450 cu. yds. of gravel surface on dam crest;
(11) 10,000 cu. yds. of excavation, all classes, for structures;
(12) 3000 cu. yds. of backfill;
(13) 2500 cu. yds. of compacting backfill;
(14) 480 cu. yds. of concrete in structures;
(15) placing 55,000 lbs. of reinforcement bars;
(16) placing 25 sq. ft. of elastic filler material in joints;
(17) placing 10 lin. ft. of rubber water stops in joints;
(18) placing 360 lbs. of metal water water stops in joints;
(19) 600 sq. yds. of dry-rock paving;
(20) constructing 1400 lin. ft. of 12-in. diameter sewer pipe drain with uncemented joints;
(21) laying 100 lin. ft. of 12-in. diameter sewer pipe with cemented joints;
(22) installing 2100 lbs. of gates and gate hoists;
(23) installing 7100 lbs. of outlet pipes and valves;
(24) installing 13,400 lbs. of miscellaneous metal work.

This invitation for bids does not cover the purchase of materials which are to be furnished by the government. Materials to be furnished by the contractor and those furnished by the government are described in the specifications which will be a part of the contract.

The work shall be commenced within thirty (30) calendar days after date of receipt of notice to proceed and shall be completed within three hundred and fifty (350) calendar days from the date of receipt of such notice.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.75 per copy, not returnable.

Guarantee will be required with each bid in an amount not less than 10 per cent of the amount of the bid.

PLANNED

MONTEREY, Monterey Co., Calif.—The California Water & Telephone Co., through C. M. Goldsworthy, manager, has reported plans for improvements to the water system at an estimated cost of $400,000. The improvements include:

(1) new filter plant;
(2) replacement of 7000 ft. of 18-in. pipe in Carmel Valley with 30-in. pipe to provide for a heavier flow of water from San Clemente Dam to reservoirs on the Peninsula proper;
(3) installation of additional 18-in. pipe to provide direct service to plants on Monterey's "cannery row."

Also included on the program are mechanical cleaning of transmission mains, sterilization of transmission and distribution mains.

PLANS and Speculations

San Francisco: Plans for the construction of a new warehouse by the Emporium on Howard St., between 4th and 5th Sts., were announced by E. C. Lipman, vice-president and general manager.

oOo

Oakland: Dr. Frank B. Tower has announced plans for the construction of a recreation center on a site with 154-ft. frontage on Piedmont Avenue between MacArthur Boulevard and Yosemite Avenue. Doctor Tower will invest $150,000 in a specially designed structure of 40,000 sq. ft. Twenty bowling alleys will be installed on upper floors while a large restaurant will occupy the main floor.

oOo

San Mateo: The Coyote Point Yacht Club has requested permission to moor a barge at the foot of East Poplar Avenue to serve as a temporary club house until materials are available for the construction of a building on the club's five-acre tract at Coyote Point.

oOo

Hollister: San Benito County's highway and bridge program for the present fiscal year calls for an expenditure of $100,324.

oOo

Martinez: Contra Costa County highway and bridge program for the present fiscal year calls for an expenditure of $863,745.

oOo

Stockton: San Joaquin County's highway and bridge program for the present fiscal year calls for an expenditure of $975,155.

oOo

Sacramento: Directors of Sacrament County Fair Assn. have announced plans for spending $28,000 in improvements for the Galt Fairgrounds. Work will be done in time for this year's program.

oOo

Marysville: G. A. Powers and A. F. Lawton, proprietors of the Rideout Memorial Hospital, have announced plans for immediate expansion. The program will include construction of a one-story wing, 33 by 142 feet, and extensive remodeling of the present structure. An expenditure of $75,000 is anticipated.

oOo

Woodland: City school trustees have reopened negotiations with the City of Woodland for the ultimate construction of a swimming pool on school property south of the high school campus.

oOo

Reno: Plans for the improvement of the Nevada State Hospital include a new ward building, a surgical hospital and a power plant.

Otis Elevator Co. Gets Public Service Award

Long-established names in the building material and machinery industry were honored when the Brand Names Research Foundation presented "certificates of public service" to 206 firms at a testimonial dinner at the Hotel Astor, New York City.

Of the total number of certificates, eight were awarded to companies who have been serving the building material and machinery trade for more than 50 years. The citations, lauding the companies for their many years of service, were read to a capacity audience of 1250 guests by George L. Russell, Jr., president of the John B. Stetson Co. and past chairman of the Brand Names Research Foundation.

The Thatcher Furnace Co. and the Otis Elevator Co. were the two oldest companies in the building material and machinery field to receive certificates. Carl Sahler, president of the Thatcher Furnace Company, received the award for that company (1850); and L. A. Petersen, president of Otis Elevator Company, accepted the award (1852).

Other companies receiving awards, together with date of corporate birth, included: Devoe & Reynolds, Inc. (1856); Foster Pump Works, Inc. (1890); The Ruberoid Company (1892); Underwood Corporation (1895); Penn Metal Corporation of Pennsylvania (1885); and the Lanston Monotype Machine Co. (1887).

Members of the Host Committee for the dinner included Theophil H. Mueller, president of Julius Kayser & Co., and C. R. Palmer, president of Cluett, Peabody & Co.

The Brand Names Research Foundation is a non-profit corporation chartered in the state of New York. It is supported by manufacturers, advertising agencies, publishers, and others interested in the factual study of the place of brand names in the American distribution system and general economy, and in the dissemination of the facts obtained in these studies.

California Will Have Over Million Veterans As Civilan Residents by End of 1946

California will have over a million World War II veterans as civilian residents by the end of 1946, the research department of the California State Chamber of Commerce predicts in its monthly report on economic conditions, released today. By the end of 1945, there were 710,000 veterans in the state, including 186,000 from other states, the report declares, with 288,000 former Californians to be demobilized this year, while a large number of veterans from other states will establish residence here.

The report follows:

"In California, as elsewhere during January, industrial strife continued to delay conversion, cause unemployment, reduce production, and increase the dangers of inflation. The machinists' strike in the San Francisco Bay region, together with auto assembly and steel strikes, is keeping many thousands idle. In the Los Angeles area about 16,000 workers are idle thru steel and other strikes. More are being added as the paralyzing effect of steel and other material shortages spreads. The recent strike at Consolidated Vultee Aircraft Corp. in San Diego has added several thousand more to the ranks of idle workers.

"The last official estimated of the number unemployed in California made by the U. S. Employment Service in mid-December was 262,000. Since then the number of veterans drawing federal unemployment compensation claims rose some 36,000, and the number of workers with compensable state claims increased about 37,000. As of January 24, there were 196,000 California workers with compensable claims, 63,000 veterans, and 10,000 others drawing claims against other states.

"Since V-J Day some 440,500 discarged war veterans returned to civilian life in California, including 93,500 from other states. Veterans in the state at the end of 1945 numbered 710,000, including 186,000 from other states. Some 288,000 more former residents of California will be demobilized in 1946, plus an unknown number of veterans from other states, indicating more than a million World War II veterans will be in this state before the end of this year.

"Preliminary estimates of incomes of civilian residents of California during 1945 are about $11,492,100,000, or 6 per cent less than during 1944. Largest decrease was in war manufacturing industries where payrolls dropped 28.6 per cent. Factory wage earner payrolls decreased from $171,000,000 monthly at the beginning of 1945 to $76,000,000 at the low period in November, but rose again in December. Payrolls in non-manufacturing activity rose during 1945. Net incomes of farmers were slightly lower in 1945 than in 1944, due to increased labor and other costs, although gross returns were about 3 per cent higher.

"Despite some decreases in income, California's retail sales rose to new record levels of some $6,574,000,000 in 1945, 10.6 per cent higher than 1944. Liquid assets in the hands of individuals and firms in California, which had risen to $15,251,000,000 by the middle of 1945, or three and one-half times the prewar level, continued to increase during the latter part of the year. December department store sales were 11 per cent above December, 1944, and for the four weeks ending January 26, ranged from 2 per cent higher in San Francisco to 7 per cent higher in Los Angeles, compared to the same period last year.

"Seasonal lay-offs and strikes caused a net decline of about 7500 wage earners in California manufacturing between the middle of December and the middle of January, according to preliminary estimates, bringing employment to about 392,000. Factory employment in the San Francisco Bay area increased slightly during this period. In Los Angeles county it decreased by 6,500. Industries showing a recent upward trend include textiles, apparel, rubber and petroleum products, furniture and non-ferrous metals.

"Value of mineral production in 1945 was $488,244,000, an increase of nearly 4 per cent over 1944. Most of this increase was due to petroleum, natural gas, cement, gold and building stone. Average daily production of petroleum during December and January remained fairly stable at about 840,000 barrels a day, about 100,000 barrels below the war peak, but far above the prewar level.

"Value of building permits issued in California cities during December totalled $55,105,257, 17 per cent greater than in November and six and one-half times December 1944.

DDT Wallpaper Available About April 1st

DDT insecticide, proven during the war to be one of the most effective means of pest control yet developed, has been incorporated in a new type of ready-pasted cedar closet wallpaper by the Trimz Company, Inc., Chicago. This new product, which will be known as Trimz ready-pasted cedar closet wallpaper containing DDT insecticide, is the latest development from the laboratories of United Wallpaper, Inc., world's largest manufacturer of wallpaper, the parent company, and originator of ready-pasted wallpaper and similar products.

Moths, ants, flies, mosquitoes, silverfish, and many other insects die shortly after coming in contact with this new wallpaper, which contains 5% of active DDT insecticide in the top coating. It is non-hazardous to human beings and domestic animals.

The DDT which in the past has been apparent as a white powder when sprayed or otherwise applied to wallpaper has been dyed to the correct color during the manufacture of this new wallpaper, and so incorporated into the product that does not show and will not rub off.

Guaranteed effective for a year or more, the new wall paper is similar in appearance to the cedar closet wallpaper which homemakers have been using for many years to line closets, bureau drawers and clothes chests. The pattern which simulates real cedar boards in color and wood grain, is printed on paper made of genuine cedar wood with colors containing the DDT insecticide, and has the natural cedar odor.

The new Trimz DDT treated cedar closet paper is ready-pasted, which means that the entire application of the paper can be made without mess, special tools, or previous experience. It requires no special hanging preparation, and is thoroughly washable. Just dip it in water and apply it.

This new DDT treated ready-pasted cedar closet wallpaper is sold in packages containing 48 feet of paper 15 inches wide, packed in a box and wrapped and sealed in cellophane so that the original cedar odor is held securely sealed in the paper. The retail price is $2.98 per package. The rolls are narrower than standard wallpaper, which makes hanging in small areas easy for the housewife. Because there is no matching of pattern, strips can be easily applied side by side by the most inexperienced person.

Trimz DDT cedar closet wallpaper will be available throughout the United States about April 1st.

GROOVER AND I

ABACUS

The War Department has just unveiled the "world's fastest calculating machine". The gadget weighs thirty tons and utilizes 18,000 vacuum tubes or electronic valves.

* * *

It is stated that this machine is an electronic big brother of the "abacus".

* * *

The origin of the Chinese abacus, or Shwan-pan, is lost somewhere along the overgrown trails of ancient history. It proves, however, that for thousands of years the Chinese have realized the simplicity of the decimal system.

* * *

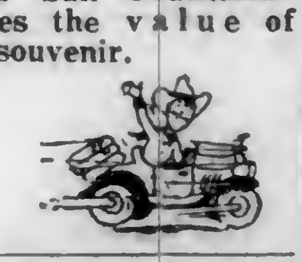
The Army counting "gismo" is interesting but not news. The Monroe Calculating Machine Company, in building their very efficient calculators, have merely mechanized the principle of the abacus. Clever people—these Chinese!

* * *

Among my more cherished trivia is the abacus personally used by San Francisco's beloved and respected but departed Sing Fat for over a quarter of a century.

* * *

Only a San Franciscan appreciates the value of such a souvenir.



East Bay Home Builders Will Go To Chicago Meet

Fifteen Eastbay home builders and affiliates have announced their intention to attend the convention and exposition of the National Association of Home Builders, at the Stevens Hotel in Chicago, February 25 to 28.

Included in the group are Maurice G. Read, Alvin F. Groom, C. H. McEntyre, L. H. Lincoln, Geo. Taylor, Ernest Conneau, James McTaggert, Howard Pulliam, Abe Doty, Maurice Cox, Charles Russell, S. M. Shapero, John Keuffer, Ray Nichols and Otto Blauert.

All exhibit space has already been taken for what is planned as the largest home building convention ever held. More than 5,000 builders, dealers, architects, real estate brokers, and bankers will attend. Principal theme for panel discussions is "Homes for Veterans." Frank W. Cortright, executive vice-president of the national association, will preside.

Sylvania Electric Appoints New Field Engineer

William B. Kennedy, formerly Commercial Engineer for Sylvania Electric Products, Inc., in Salem, Mass., has been appointed Pacific Coast Field Engineer, according to an announcement by George R. Sommers, Pacific Coast Sales Manager for the company.

Kennedy entered the lighting industry when he joined the staff of the Chicago Lighting Institute. In 1937, he took the post of Commercial Lighting Representative or Wisconsin Power and Light Company in the Fond du Lac District and in 1941 became Illuminating Engineer for Wisconsin-Michigan Power Company.

He joined Sylvania Electric in 1944.

An associate member of the Illuminating Engineering Society and a member of Eta Kappa Nu, Electrical Engineering Fraternity, Kennedy holds the degree of Bachelor of Science in Electrical Engineering from Iowa State College.

BIDS WANTED

LOS ANGELES, Calif.—Until Mar. 13, 1 P. M., bids will be received by the U. S. District Engineer Office, 751 S. Figueroa St., Los Angeles, for the construction of Los Angeles River improvements, N. Broadway to Alhambra Ave., river mile 23.5 to river mile 22.9/ Los Angeles; Serial 148.

The project involves the construction of 3300 lin. ft. of river channel improvement and appurtenant work. The channel improvement consists of construction of reinforced concrete paving on the slopes of the riverbank, with parapet walls and berm paving at the top. Concrete pier extensions will be built for the Spring St. and Main St. bridges. Other work includes the construction and removal of a temporary railroad embankment; replacement of wooden subdrain riser hoods in the invert with cast iron hoods; construction of fencing on channel walls, and the installaton of corrugated metal pipe drains with appurtenant concrete outlet structures. Principal features of the work include: Clearing site and removing obstructions; excavating and backfilling; driving steel sheet and steel bearing piles; constructing reinforced concrete slope paving, berm, walls and pier protection; side drainage structures and pipe and fencing.

The bids will be taken as follows:
(1) lump sum, clearing site and removing obstructions;
(2) 128 lin. ft. pulling or cutting off steel sheet pile wall;
(3) 125,000 cu. yds. channel excavation;
(4) 1270 cu. yds. structure excavation;
(5) 41,000 cu. yds compacted backfill and fill;
(6) 100 cu. yds. uncompacted backfill and fill;
(7) 7300 cu. yds. crushed gravel or crushed rock backing;
(8) 200 cu. yds. gravel in pockets and drains;
(9) 300 cu. yds. temporary railroad embankment;
(10) 13,900 lin. ft. steel bearing piles, vertical;
(11) 10,800 lin. ft. steel bearing piles, batter;
(12) 100 each, splicing steel bearing piles;
(13) 6600 sq. ft steel sheet piling;
(14) 6450 lin. ft. channel fencing;
(15) lump sum, pressure grouting;
(16) 12,400 cu. yds. concrete slope paving;
(17) 2700 cu. yds. concrete footings for walls and pier extensions;
(18) 2800 cu. yds. concrete walls and pier extensions;
(19) 550 cu. yds. concrete berm paving and misc. structures;
(20) 1,900,000 lbs. steel reinforcement bars;
(21) 6500 lbs. steel reinforcement fabric;
(22) 2250 each expansion joint sleeves
(23) 250 each cinch anchors;
(24) 20 each subdrain hoods;
(25) 14 lin. ft. 12-in. corrugated metal pipe;
(26) 14 lin. ft. 15-in. same;
(27) 17 lin. ft. 18-in. same;
(28) 40 lin. ft. 24-in. same;
(29) 48 lin. ft. 36-in. same;
(30) 24 lin. ft. 54-in. same;
(31) 1 15-in. automatic drainage gate;
(32) 1 18-in. same;
(33) 2100 lbs. misc. metal work;
(34) 27,200 bbls. portland cement;
(35) 38,000 tons salvaging and placing derrick stone;
(36) 115,000 ton miles hauling derrick stone;
(37) 2000 sq. ft. ¼-in. fiber expansion joint filler;
(38) 450 sq. ft. ½-in. fiber expansion joint filler;
(39) 20,000 sq. ft. 1-in. fiber expansion joint filler;
(40) 823 each, caps for steel bearing pile.

BIDS OPENED

SAN DIEGO, Calif.—OFCCO Construction Co., 2650 Cherry Ave., Long Beach, at $833,650, submitted the low bid to the U. S. Navy, Public Works Office, 11th Naval District, 1220 Pacific Highway, San Diego, February 13, for the construction of new connections to the station's existing low pressure fresh water piping system with branches and outlets on piers No. 10 to 13, inclusive; a new extension to the existing city 16-in. high pressure water main extending up to and including branches and outlets on Piers No. 10 to 13, inclusive; new boiler house including new equipment consisting, in general, of three new 400 h.p. water tube boilers with auxiliary equipment including feed water heater, boiler feed pumps, oil burners, draft fans, steel stacks, water softeners and complete pertinent auxiliary equipment; two 250 h.p. motor-driven compressors with automatic control and pertinent auxiliary equipment, steam distribution system from the boiler house to outlets on piers; compressed air distribution system from compressors to outlets on piers and other miscellaneous work; Specification No. 17474.

Bid received were as follows:
(1) price for the entire work, complete;
(2) amount to be deducted from the price stated under Item 1 for the omission of certain steam and compressed air lines as covered under Alternative A;
(3) amount to be deducted from the price stated under Item 1 for the omission of one bay of the boiler house and omission of one boiler as covered under Alternative B.

The bids submitted were:

OFCCO Construction Co, 15 days (1) $833,650, (2) $77,000, (3) $50,000.

N. P. Van Valkenburgh, 30 days (1) $908,640, (2) $76,000, (3) $41,875.

M. H .Golden Construction Co., 5 days (1) $911,000, (2) $83,446, (3) $46,659.

Haddock Engineers, Ltd., 10 days, (1) $973,000, (2) $75,000, (3) $43,000.

Associated Piping & Engineering Co., 30 days (1) $982,000, (2) $57,000, (3) $58,637.

2/18/46 35
PLANNED

LOS ANGELES, Calif.—The Los Angeles City Bureau of Engineering, Lloyd Aldrich, city engineer, City Hall, Los Angeles, has reported plans for a yacht harbor for 9300 pleasure craft designed in a horseshoe shape, having an inland reach of 6500 ft., with similar dimensions for its widest part. It would be connected with the ocean by a centered, unobstructed channel 3000 ft. long and 800 ft. wide and have 12 anchorage basins separated from each other by land sections. The proposed roads would go completely around the horseshoe and give automobiles access to the anchorage basins.

The harbor project ties in with the beach widening in the general program for the more than 13 miles of shore development from El Segundo to Topanga Canyon in which Los Angeles and Santa Monica are jointly interested. The proposed widening would add 900 ft. to the present width of the beach in front of the harbor; other sections would be widened up to 1200 ft.

PLANS and Speculations

San Francisco: The Office of Price Administration is NOT the authority for information regarding priorities for building materials. Builders are requested to direct inquiries to the Federal Housing Administration at 315 Montgomery Street.

oOo

Alameda County's highways and bridges program for the present fiscal year calls for an expenditure of $2,950,786 to be spent by the county government alone.

oOo

Sacramento: The State Department of Public Works has announced state approval of flood control projects to be constructed by the Corps of Army Engineers. The projects, part of a $450,000,000 federal flood control program, are on the Kings, Tule, Kaweah and Kern rivers. They include: Isabella reservoir on the Kern, capacity 550,000 acre feet, to be constructed at a cost of $9,080,000.

Terminous reservoir on the Kaweah, capacity 100,000 acre feet, $7,662,000.

Success reservoir on the Tule, capacity 50,000 acre feet, $7,115,000.

Pine Flat reservoir on the Kings river, capacity 1,000,000 acre feet, $21,945,000.

oOo

Lodi: Highway matters affecting Amador, Calaveras, San Joaquin, Stanislaus and Tuolumne counties will be discussed today at a meeting of the highway committee of the California State Chamber of Commerce's Central Valley Council.

oOo

Carmel: A new city hall costing an estimated $50,000 is planned as the number one item for postwar municipal construction. Other contemplated construction plans include: enlargement of library, $20,000; street improvements, $12,000; storm drains, $5,000; bulkhead on beach, $2,000.

oOo

Carson City, Nevada: Proposed construction of a connecting road between Eureka on U. S. Highway 50 and a point on U. S. Highway 40 is being planned. The new road is needed due to the increase in mining activity in the Eureka area. Several routes have been proposed but officials have indicated that wherever the connecting route lies, work will begin on it some time between now and July 1. It will be a two-lane, oil surfaced highway. Present plans indicate that approximately 100 miles of construction would be entailed.

oOo

WAGE BOARD MAKES FIRST MONTH'S REPORT

In the first month of operation since it replaced the War Labor Board, the Tenth Regional Wage Stabilization Board has ruled favorably on 36 applications requesting approval of wage increases to be used for pricing purposes or increasing cost to the government, Chairman Thomas Fair Neblett reported today.

Approval to use the full increase for pricing or cost purposes was granted in 33 cases and approval to use part of the increase for these purposes was granted in three cases. To date, no application on wage increases has resulted in complete denial, Neblett said.

Action of the Board has been unanimous in 27 of the favorable rulings, with dissents recorded by either labor or industry in only nine instances.

In approving the 36 applications, the Board found 20 of the requested increases to be in line with prevailing rates; approved seven on the basis of the new wage-price "cost of living" formula; and approved six on the basis of correcting intra-plant inequities. The remaining three requests were approved on the basis of these and other criteria.

In 12 of the cases approval was requested on the basis of increased

(Continued on Page Four)

LUNCHEON MEETING

The American Society of Mechanical Engineers will gather for their monthly luncheon meeting Wednesday, Feb. 20, at 12:10 P. M., at the El Jardin restaurant, 22 California Street.

"Gas Diesels" will be the subject of an address by H. P. Henderson, District Engineer of Worthington Pump & Machinery Corporation. Mr. Henderson will back up his talk with his observations as an experienced field engineer for gas and diesel engines and will illustrate his talk with slides.

GROOVER AND I

RELAX, HAROLD

The one-man tempest being kicked up by the very recent Secretary of Interior may have more sound and fury than solid foundation. Mr. Ickes has been well known for carrying a pocketful of chips to place on his shoulder at a half-moment's notice.

* * *

No one can accuse Mr. Ickes of personal dishonesty or question his sincerity of purpose. However, it is not stretching facts to say he was not the most amiable and congenial man in Official Washington.

* * *

President Roosevelt once referred to Ickes as a "bureaucratic kleptomaniac". This on account of Harold's habit of prowling Washington and grabbing for the Interior Department any activity not nailed down on all four corners.

* * *

The so - called "Tidelands Oil Suit" might rightly be called an official power grab by the Federal government.

* * *

Ownership and control of tidelands, riparian rights, bays, rivers, harbors and lakes belongs to the various States. This has been true since the year 1776!

* * *

Land titles and court rulings have upheld this ever since we have had titles and rulings. Mr. Ickes knows this to be true.

* * *

In 1934 the Department of the Interior received an application for oil drilling rights off the coast of Seal Beach, Calif. Secretary Ickes returned the application, saying that the Department of the Interior had no authority or jurisdiction — that the ownership and authority was vested in the State of California.

* * *

Politically, Mr. Ickes might be called a "mugwump". He is now a Democrat. He was formerly a Republican. During the Bull Moose period, he indulged in a bit of moose-calling. Rumor has it that CIO-PAC is singing serenades under his window.

* * *

Personally, Ickes is a great guy on a fishing trip, but politically, he doesn't seem to do so well in the crockery and glassware section of a department store.

* * *

At 72 years of age, a man shouldn't eat broiled lobster and onions with ice cream.

New High-Test Calcium Hypochlorite Available for General Uses

A new high-test calcium hypochlorite, containing a minimum of 70 per cent available chlorine, is now available for civilian uses, according to an announcement by the Columbia Chemical Division of the Pittsburgh Plate Glass Company. Now marketed under the trade name "Pittchlor", the product previously had been requisitioned by the armed forces in very large quantities as a bleach, germicide and disinfectant.

During the war, calcium hypochlorite was found to be especially use ful in combating emergency conditions such as those found in contaminated reservoirs and water mains. It has special advantages for the chlorination of water supplies up to approximately 500,000 gallons per day, or where the daily requirement of available chlorine is approximately 1 pound.

Low equipment investment and depreciation costs are important factors favoring the use of Pittchlor. Any type of chlorination can be employed: pre-, post-, split- or super-chlorination. For continuous treatment, it can be used with dry feeding devices, or it can be dissolved in water and fed through a solution feeder.

Extensive civilian use is expected when abnormal conditions, such as floods or fires, render permanent installations partially or totally ineffective. An auxiliary hypochlorite installation is excellent insurance for feeding Pittchlor solutions into any point in the water sanitation system as conditions demand. Secondary benefits are that it serves to destroy algae as well as to eliminate offensive odors and tastes.

Pittchlor is easy to handle in the various specialized uses demanded for the treatment of sewage. It can be used at any point in the system where biochemical oxygen demand reduction is necessary for odor control, for the disinfection of areas where dangerous bacterial are likely to be encountered, and as an aid to the precipitation of sewage, especially certain industrial wastes.

In addition to its employment in water and sewage treatment, Pittchlor finds numerous other uses in providing proper sanitation for the protection of the public. Hospitals find extensive use for it in meeting their rigid sanitary requirements. It is used for purifying swimming pool water and in cleaning the pools, for disinfecting and deodorizing locker rooms, toilets, showers, and for providing foot baths to combat athlete's foot.

Literature explaining the uses of Pittchlor is now available by wiring Pittsburgh Plate Glass Co., Columbia Chemical Division, Fifth Avenue at Bellefield, Pittsburgh 13, Pa.

Did You Know That . . .

Chas. F. Strothoff, Executive-Director of the Housing Authority of the City of Richmond, will resign his position as of March 1st to resume the practice of architecture at his San Francisco offices, 1855 Market Street. Mr. Strothoff also plans to open an office in Richmond as soon as a location is available.

—0—

Frederick B. Barss, architect, 268 Market Street, announces that his new telephone number is YUkon 0952. Mr. Barss desires manufacturers' catalogues and literature for his files.

—0—

S. Burford Chasten has resumed his pre-war business as a lathing contractor. The "Kid" offers the same excellent quality and service. Residence office: 1471 - 18th Ave., San Francisco. Telephone Montrose 3371.

—0—

The California State Personnel Board has announced vacancies in the following State civil service positions: Associate Estimator of Building Construction; Junior Estimator of Building Construction; Junior Forestry Engineer. Final date for filing applications on the above positions is Feb. 28. Examination date is March 16.

Chief Engineer, Colorado River Board. Final date for filing applications, March 7. Examinations will be held March 23.

Geological Draftsman. Final date for filing applications, March 13. Examinations will be held March 28.

Further information can be had at the office of the "Builder". Complete information can be obtained at the offices of the California State Personnel Board.

CAMPAIGN TO PROMOTE USE OF FIRZITE

The United States Plywood Corporation has inaugurated a new and active promotion and sales campaign for Firzite, a wood sealer and softwood hardener, it was announced today. Although Firzite has been on the market for a few years, sales heretofore have been largely confined to the eastern part of the country. United States Plywood's plans now call for national distribution through its chain of warehouses, an aggressive promotional program, and a redesigned package to be marketed primarily through lumber dealers and hardware stores by the Weldwood Glue Department.

Firzite is a resin and oil product especially prepared for use on Fir plywood and other woods which have pronounced alternate hard and soft growths such as pine, spruce and other sofe woods. Its use largely prevents face checking, lays the "wild" grain, provides an even foundation that helps keep the grain from showing through coats of enamel or paint, and reduces the "wild" or "loud" grain where wax, vernish or oil stains are used as finishes.

W. Robert Goepel, Sales Manager of the Weldwood Glue Department of United States Plywood, states that "Firzite's outstanding performance in the past will make it a welcome addition to our line as a popular, practical sealer and hardener for soft wood plywoods."

ASHVE MEETING

The American Society of Heating and Ventilating Engineers, Golden Gate Chapter, will hold their regular meeting Wednesday, February 20th, at 12:15 P. M., at the El Jardin restaurant ,22 California Street.

A. J. Bouey, San Francisco sales engineer for B. F. Sturtevant Co., will speak on the subject of "Fans and Their Characteristics". Mr. Bouey is well qualified to discuss the subject of fans and their selection, having been with the Sturtevant Company for 18 years.

ACME COMPANY IN PLANT EXPANSION

One more building and expansion program has been announced in the fast-growing Emeryville district, by one of the pioneers in that section. The Acme Company, manufacturers of Acme Rolling Doors and Side-Coiling Partitions for industrial firms, school gymnasiums, churches and finer residences, are tearing out some of the older factory buildings and will replace them with a modern steel and concrete factory building. Additional land has also been purchased to expand the warehouse area; the firm will have 24,000 feet in all.

Originally started about 1897 in San Francisco, the business moved to the present site, 3535 Peralta Street, following the 1906 fire in San Francisco, to make doors, partitions and ladders of fine spruce, including auditorium and gymnasium partitions exceeding 100 feet in width and 26 feet in height. These huge partitions are shipped to all sections of the United States.

Later, steel rolling doors were produced but this was curtailed when World War II began. Thanks to the huge increase in production of aluminum, the firm now announces its postwar door will be made of aluminum, which is now competitive with steel or wood. Acme Company has just purchased its own rolling machine, and will roll both aluminum and steel slats locally; in addition, material will be rolled for contractors and builders working on the Veteran Housing Program. This work was previously done in the East.

Of special interest to home-owners, will be an electrically operated garage door, controlled magnet, electric-eye or keylock. This can be fitted to existing doors, or to new construction.

W. C. Grant, engineer and designer with the original firm for the past 27 years, remains with the present owners of the property, Howard Hill and Don Durham.

CALIFORNIA LEADS IN FEDERAL EMPLOYEES

California has more employees of the executive branch of the federal government than any other state or the metropolitan area of Washington, D. C.

This is indicated by U. S. Civil Service Commission figures cited in the latest issue of Postwar California, a monthly publication of the Bureau of Public Administration on the Berkeley campus of the University of California.

The statistics show that of 2,-912,093 paid employees as of June 30, 1945, California has 317,236; Washington, D. C., 256,710; and New York state, 293,018.

Edited by Dorothy C. Tompkins, senior research technician, the publication is published by the University bureau to furnish information useful to government officials and citizens of the state.

—#—

DRIVING FATIGUE

Judgment of depth, distance and speed are impaired and recation time is slowed if an automobile driver is excessively fatigued, or sleepy, the California State Automobile Association warns. Under such conditions, let someone else take the wheel, or pull off the road and rest. A car travelling at 35 miles per hour covers 51 feet in a second. One second is long enough for the car to leave the road, or collide with another vehicle.

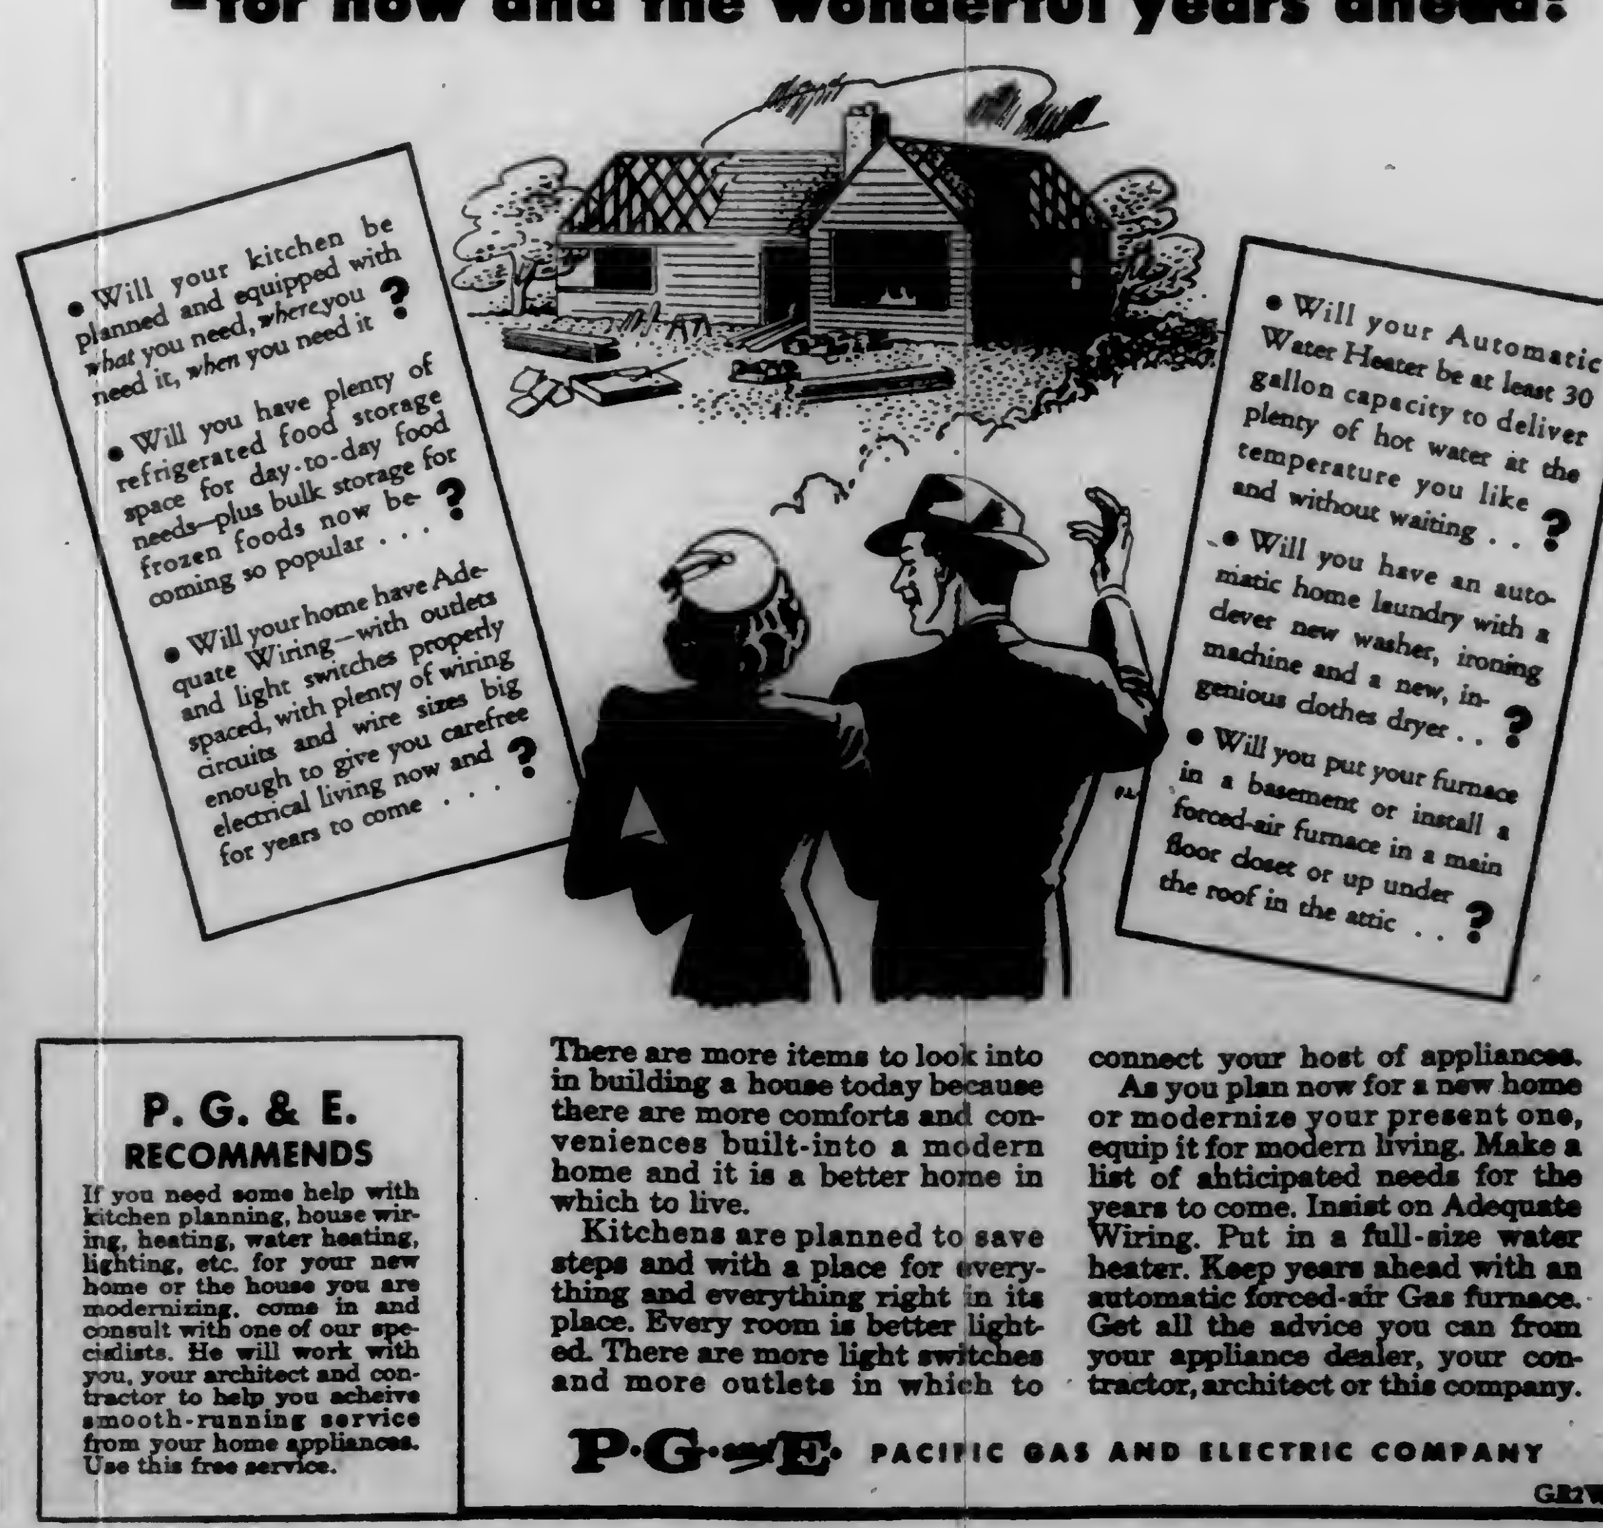
STEELFORMS
STEELTUBE CONSTRUCTION TOWERS
HEAVY DUTY SWINGING SCAFFOLDS
STEELFORM CONTRACTING CO.
666 Harrison St. DO 5583 San Francisco

Equip your home for modern living —for now and the wonderful years ahead!



• Will your kitchen be planned and equipped with what you need, where you need it, when you need it ?
• Will you have plenty of refrigerated food storage space for day-to-day food needs—plus bulk storage for frozen foods now becoming so popular . . . ?
• Will your home have Adequate Wiring—with outlets and light switches properly spaced, with plenty of wiring circuits and wire sizes big enough to give you carefree electrical living now and for years to come . . . ?
• Will your Automatic Water Heater be at least 30 gallon capacity to deliver plenty of hot water at the temperature you like and without waiting . . ?
• Will you have an automatic home laundry with a clever new washer, ironing machine and a new, ingenious clothes dryer . . ?
• Will you put your furnace in a basement or install a forced-air furnace in a main floor closet or up under the roof in the attic . . ?

P. G. & E. RECOMMENDS

If you need some help with kitchen planning, house wiring, heating, water heating, lighting, etc. for your new home or the house you are modernizing, come in and consult with one of our specialists. He will work with you, your architect and contractor to help you acheive smooth-running service from your home appliances. Use this free service.

There are more items to look into in building a house today because there are more comforts and conveniences built-into a modern home and it is a better home in which to live.

Kitchens are planned to save steps and with a place for everything and everything right in its place. Every room is better lighted. There are more light switches and more outlets in which to connect your host of appliances.

As you plan now for a new home or modernize your present one, equip it for modern living. Make a list of anticipated needs for the years to come. Insist on Adequate Wiring. Put in a full-size water heater. Keep years ahead with an automatic forced-air Gas furnace. Get all the advice you can from your appliance dealer, your contractor, architect or this company.

Wage Board

(Continued from Page 1)

cost to the government and in 19 cases approval was requested for pricing purposes, Neblett said.

Neblett pointed out that the effect of the Board's rulings in wage increase cases relates only to the extent to which the increase may be used in determining price or rent ceilings, or in increasing costs to the government. Modification or denal does not mean that the increases are unlawful. They may be put into effect either prior to or following Board action, regardless of whether or not the request approval for pricing or cost purposes is granted.

PLANS and Speculations

San Francisco: Eugene N. Fritz has announced plans for the construction of a 35-story apartment-hotel opposite the Pacific Union Club on California Street. . . . meager details for a 34-story hotel to be located at Taylor and California Streets, have also been announced.

oOo

San Carlos: Plans for the development of Cooley airfield were told at a Chamber of Commerce meeting by William Cooley, president. The field will, when completed, be "second only to Mills Field in size, and its engineering facilities will be outstanding". The project also includes plans for a beach and yacht harbor.

oOo

Burlingame: Probability is that the voters of San Mateo County will be called upon to vote on a $2,000,000 bond issue for county improvements. Among items for which money is needed from a bond issue are enlargement of the courthouse, construction of a juvenile home, construction of a new office for the agricultural commission, a new fire station, addition to the relief home, addition to the jail and improvements to Canyon Sanitarium.

oOo

Washington, D. C.: Gen. Omar N. Bradley, veterans administrator, has announced that the Army Engineers will co-operate in completion of a $448,000,000 program for 77 skyscraper hospitals. The administration announced that three outstanding architects have been appointed to help speed, modernize and streamline the planning phase of the program. They are Carl A. Erickson, Addison Erdman of New York City, and Slocum Kingsbury of Washington, D. C. Three of the new buildings are under construction. Funds are available for 47 others.

oOo

Redding: The Department of Public Works has filed an eminent domain suit in superior court to acquire property in West Redding for the construction of a new office building for the local state highway headquarters.

B. F. Fairless, President of U. S. Steel, Makes Strike-End Statement

Benjamin F. Fairless, President of United States Steel Corporation, has made the following statement:

"I am happy to announce that the strike against United States Steel Corporation has been settled.

"From the beginning of this wage dispute, we have taken the position that wages could not be separated from prices, and that present country - wide industrial strife could not be solved without the adoption by the Government of a fair over-all wage-price policy.

"In our case, a wage increase was not possible without an increase in ceiling prices for steel products, because of steel prices having been frozen by the Government substantially at prewar levels, although our labor and other costs have advanced greatly since 1940. The result of these mounting costs pressing against price ceilings has been that most of our steel tonnage has been sold during recent months at a loss.

"This strike settlement has been made possible by the Government's action in authorizing an increase of $5 a ton in the ceiling prices for carbon and alloy steel mill products. A new Governmental wage-price policy for industry in general was announced last night. We are hopeful that under this new policy, due consideration will be given, among other things, to the financial plight of the smaller non-integrated steel manufacturers, fabricators and processors, about whose hardships as a consequence of higher labor and other costs I have previously spoken.

"We have granted a wage increase of 18-½ cents an hour to our steel workers. This amounts to an increase of about $32 per employee for each full month of work. It is the largest single wage increase in the history of the steel industry. The Union insisted that this wage increase be effective as of January 1, 1946. We contented that it should not go into effect until the men returned to work. To enable steel production to be promptly resumed, this particular issue finally was settled by splitting the difference.

"In an endeavor to secure industrial peace for a year, which in our opinion, is most important in the public interest, our labor contracts with the Union have been extended to February 15, 1947, with new provisions that there shall be no strikes, work stoppages or lockouts during the life of the extended contracts, and with further provisions designed to achieve the highest possible level of employee performance and efficiency. We have agreed to take no discriminatory action against employees who went out on strike. The Union has agreed to take no discriminatory action against employees who opposed the strike or did not participate in it.

"It has been our opinion that United States Steel Corporation should not be expected to set a wage pattern for all of American industry. However, during the past few weeks a general wage pattern has been established apart from us.

"Important concerns in different major industries have agreed to pay wage increases ranging from 18 to 18-½ cents an hour. Fact finding boards have recommended somewhat similar wage increases in other situations. The President of the United States named 18-½ cents an hour as the wage increase to be granted by us, although we never appeared at a hearing before the Steel Fact-Finding Board, or gave any testimony or submitted any evidence to the Board.

"In the light of all of these circumstances, United States Steel Corporation has granted this wage increase in order to terminate the strike, and enable steel production to be resumed and thus permit reconversion and the business of the nation to go forward.

"A price increase of $5 a ton will not be adequate to compensate for such past heavy increases in our costs and also to take care of what we estimate will be the total cost to us of this wage increase of 18-½ cents an hour to our steel workers. In fairness to our salaried employees in the steel-producing subsidiaries, increased compensation must also be paid to many of them in view of this wage increase to our hourly steel workers. Higher labor costs in other businesses inevitably will result when a basic industry such as steel makes a substantial increase in its wage scale. As a consequence, there is bound to be a substantial increase in the price of the many millions of dollars'

(Continued on Page Four)

State Unification Of Architects Completed

At the February meeting of the California Council of Architects held at the Santa Maria Inn, Feb. 15 and 16, John S. Bolles and James H. Mitchell were re-elected president and secretary-treasurer, respectively, of the Council. Chas. O. Matcham, president of Southern California Chapter of American Institute of Architects, was elected vice-president. Adrian Wilson, of Los Angeles, was delegated the responsibility of co-ordinating the legislative activities of the Council. On his committee are Norman K. Blanchard of San Francisco and Herbert E. Goodpastor of Sacramento. Phillip J. Daniel, of Santa Maria, became chairman of the Committee on Professional Relations, and Charles Matcham, of Los Angeles, was asked to correlate the public relations programs of the five chapters of the Institute.

Andrew T. Hass, president of the Northern California Chapter of American Institute of Architects, has undertaken to set up a student training program for returning veterans. William Clement Ambrose, San Francisco, president of the State Board of Architectural Examiners, is assisting Mr. Hass in the formulating of this program. All architects will be urged to take returning service men into their offices for training purposes. Under the regulations of the Veterans' Administration, these men will receive up to $90.00 per month compensation from the government in addition to the wages earned while being trained to become future architects of the State.

The unification program for the State of California was completed at the Santa Maria meeting with the admission to the Council of the Central Valley, the Santa Barbara and the Northern California Chapters of the American Institute of Architects. Under the unification procedure the Northern California and the Southern California Associations of Architects will cease to exist, with the Council taking over the responsibility of co-ordinating the state-wide activities of the profession. Indicative of the acceptance of the program by the architects is the tremendous increase in membership of the various chapters.

The California Council of Architects is planning to call a joint meeting of the membership of the five chapters of the Institute. Vincent Palmer of Los Angeles, chairman for the meeting, promises to make it the most outstanding get-together of the profession ever held in the State of California.

GROOVER AND I

THE PAULEY NOMINATION

Nomination of Edwin Pauley as Undersecretary of Navy seems to have caused more excitement in Washington than anything happening since the British tried to burn down the joint over 130 years ago.

★ ★ ★

Quoting the story loosely, as is necessary in the midst of a slam-bang battle, it seems that Brother Ickes is madded-up because Pauley is supposed to have made a remark to the effect if the tidelands oil suit was dropped, the oil operators of California might be induced to contribute as much as 300 thousand dollars to the Democratic Party treasury.

★ ★ ★

View this matter through political realism: If the incident happened, it does not sound like the offering of a bribe. It sounds more like two High Party Members discussing ways and means of getting their political party treasury out of hock.

★ ★ ★

Since when has ANY political party become so lily-white that it does not discuss ALL reasonably proper means of gathering campaign contributions?

★ ★ ★

Viewed from one angle, the tidelands oil suit is just another legal grab at States' Rights—an activity for which the New Deal has been notorious.

★ ★ ★

There was no Party brawl a couple of years ago when Democratic "Thousand Dollar Clubs" were being organized. Prospective members, upon the payment of $1000, were given to understand they would receive special and preferred consideration in Washington and could stand up to be counted along with the Mighty. These clubs were organized with the knowledge, the approval, and the blessings of the late President Roosevelt.

★ ★ ★

The record shows Mr. Pauley has served his country well here at home, also in Moscow, Berlin and Tokyo. If everything Ickes has said is true, it could mean that Pauley was trying to be a good Democrat as he is a good American. What party isn't looking for "soft touches" when it comes to campaign expenses?

★ ★ ★

Three hundred thousand dollars isn't hay—but it will buy a lot of hay—and both the Republican Elephant and the Democratic Donkey eat hay.

Readjustment of Building Material Prices in General Not a Problem

Prices of building materials in general today are not out of line with prices of other goods. Over the last 30 years, prices of building materials have moved closely with non-agricultural goods in general, and there has been no serious divergence in movement during World War II.

These conclusions are drawn in a study of building materials price movements by Lester S. Kellogg, Acting Chief, Prices and Cost of Living Branch, Bureau of Labor Statistics, U. S. Department of Labor, in the current issue of the Architectural Record.

"Compared with price movements during World War I, advances in building materials prices during and since World War II so far have been moderate," Kellog writes. "Over the six years since August 1939, wholesale prices of building materials as a group have advanced about 32 per cent, and the major part of this increase was in the price of lumber. Other building materials showed much smaller price increases."

Readjustment of building materials prices in general to prices in other fields, therefore, is not a problem, although prices for particular materials will likely face realignment, the author states.

The problem of readjustment for lumber, however, is acute because it has risen about three-fourths in price since 1939, much more than prices for other building materials.

"Since lumber represents an important part of the cost of materials for the average house," Kellogg asserts, "such a price discrepancy may have important effects on the construction industry. A tendency to the use of masonry products for exterior walls and insulation board and similar materials for interior walls may be expected if this discrepancy continues.

"It seems reasonable to assume, however, that relationships will move back toward normal through reduction of lumber prices and increases in the prices of other materials, although the readjustment probably will not be accomplished immediately.

Further Rise Expected

"For the next six months or a year, assuming continued price controls over materials and no substantial rise in the general level of prices, it is our expectation that prices of building materials, as a group, will rise slightly.

"This may occur," Kellogg says, "through stable or declining prices for some materials, such as lumber, offset by advancing prices for other materials where an incentive to further production may be needed to obtain adequate output, as in the case of brick."

Department of Labor data reveal that brick and tile prices are 24 per cent above prewar levels, cement prices are less than 10 per cent above prewar levels, prepared paints are up 7 per cent, heating equipment and plumbing fixtures are about 15 per cent higher in price than in 1939, while prices rose less than 10 per cent for other building materials, including insulation board, roofing, lime and plaster.

NOTICE

The fire which destroyed the office building of the Associated Wood Products Company, 1335 Sixth Street, Berkeley, will not, in any way, hamper production schedule.

Fortunately all lumber stock and the mill were undamaged. Temporary offices have been opened in the mill building.

Did You Know That . . .

Robert D. Zelinsky of D. Zelinsky & Sons, has just been released by the Seabees and will be back to work March 1. At the present writing Bob is on a skiing excursion in the Sierras.

NOTICE OF SALE
WASHINGTON, D. C.—Until Feb. 27 bids will be received by the U. S. Maritime Commission, Commerce Bldg., Washington, D. C., for sale of the tanker Seamobile I.

The Seamobile I, built by the U. S. Shipbuilding Corp. at Yonkers, N. Y., and delivered in September, 1943, is quadruple screw propelled by eight Gray Marine Diesel engines, 165 hp. each. Each propeller is connected to a vertical shaft extending from the engines located on the main deck. Each shaft is driven by two engines and the shafts are encased in watertight cast steel housing which is suspended from heavy cover plate on top of the well. Each end of the vertical shaft is fitted with bevel gears through which power is transmitted to the two-bladed propellers. The tanker has three 40 k.w. diesel generating sets and two electrically-driven 6-inch National Transit cargo pumps with a rated capacity of 720 g.p.m. The vessel is fully equipped with carbon dioxide fire extinguishing system in the cargo and machinery spaces. Complete quarters are available for 22 officers and men with regulation lifeboats and lifesaving equipment. Fuel capacity of the vessel is 325 tons. The Seamobile I is 259 feet 7 inches by 40 feet by 18 feet and has a gross tonnage of 1831.

The tanker suffered bottom damages as a result of grounding and survey of the damage can be inspected in the office of D. Henderson, War Shipping Administration, 45 Broadway, New York, N. Y. The vessel is now located at Staten Island, N. Y.

Prospective bidders may obtain copies of the invitation to bid upon application to the officials listed below:
Director, Division of Small Vessel Procurement and Disposal, Washington 25, D. C.
Assistant District Manager, 40 Broad St., Boston 10, Mass.
Atlantic Coast Director, 45 Broadway, New York, N. Y.
Port Agent, Delaware Ave. and Oregon, Philadelphia 48, Pa.
District Manager, 22 Light St., Baltimore 2, Md.
District Manager, 12th St. and Monticello Ave., Norfolk 10, Va.
Port Agent, Graham Bldg., Jacksonville 2, Fla.
Gulf Coast Director, Canal Bldg., New Orleans 12, La.

U. S. Steel

(Continued from Page 1)

worth of goods and services which we purchase from others. We estimate that the result of this wage increase of 18-½ cents an hour to our steel workers, when all of the various cost factors are taken into account, will be to increase our costs to the extent of approximately $100,000,000 during the life of these extended contracts. This amount is in excess of what we will realize from a steel price increase of $5 a ton.

"The Government has directed the Price Administrator to review steel ceiling prices on the basis of reports of not less than three months' operating experience, and, if necessary, then to adjust such prices in the light of such experience. Heretofore, an operating experience of six months has been prescribed.

"A marked increase in productivity, and with it higher efficiency and lower production costs, are essential of the economy of this nation is to produce the necessary jobs and prosperity which we all seek. I therefore appeal to all of our employees to return to their jobs determined to turn out a record tonnage of steel through loyal and effective cooperation with management. Let all of us work together to attain real industrial peace and the highest possible level of substained and efficient production during the important months that lie ahead."

PLANS and Speculations

San Francisco: The Board of Education this week voted to purchase a site in old Calvary Cemetery near Masonic Ave. and Turk St. for the new Fremont School, appropriated $80,000 to purchase land adjoining the San Francisco Junior College from the Park Department for veterans housing, and rejected a proposal to build classroom annexes at Lincoln High School.

oOo

Hughson: Voters last week approved 233 to 4 the formation of a sanitary district and at the same time, elected five members of the governing board and an assessor. The board will survey the sanitary situation there and will decide and select the best type of sewage system for the community, estimate the cost, etc. Following this, it will call a bond election.

oOo

Mt. Shasta: Development of an all-season play area in the Castle Lake area of Mt. Shasta is being considered, according to Norman J. Farrell, supervisor of the Shasta National Forest. Farrell said, however, that realigning and resurfacing of the Mt. Shasta Everitt Memorial Highway would cost approximately $600,000 and that money for the project is not now available.

oOo

Gilroy: Approximately $30,000 of accumulated gas tax money will be spent to surface many unimproved streets within the city limits. The city council has directed the City Engineer to make the preliminary survey of all streets needing repairs and prepare the necessary papers for calling for bids.

N. Y. Apartment Projects To Install Personalized Heating

Personalized heating controls, the new system which makes it possible for each tenant to regulate the temperature of his own apartment, will be introduced to New York apartment dwellers for the first time in four new projects to be built this year by City Investing Company, one of the largest real estate holding concerns in Manhattan.

The apartment buildings, among the first to be constructed in Manhattan since the war, will contain numerous improvements to give private home comfort to occupants of multiple dwelling units. Robert W. Dowling, president of City Investing, said the central theme of the design and construction emphasized home-like conveniences.

In keeping wtih this trend, the personalized heating controls, developed by Minneapolis-Honeywell Regulator Company, make it possible for each occupant to select the temperature he prefers. thru an individual thermostat operating a motorized valve which regulates the amount of heat delivered to each apartment. In addition to

World's Largest Concrete Press Pit Under Construction

The world's largest concrete press pit, larger than any ever built before, is being constructed at the Hamilton, Ohio, plant of the Fisher Body Division of General Motors.

It is, in effect, a mammoth land "battleship", not a ship to sail the seas but one firmly anchored in terra firma for peacetime production of automobile bodies.

The press pit section of the plant is 800 feet long, 160 feet wide and 20 feet deep. In construction it is a vertiable reinforced concrete, watertight, self-contained "ship". It will hold more than 100 presses, some of them weighing as much as a million pounds and capable of stamping out turret tops for Bodies by Fisher in a single blow.

The pit is constructed in ten unit pours of concrete in the bottom mat which is 36 inches thick. Structural requirements make it necessary that the concrete be poured out as nearly as possible in an unbroken flow, and this pouring alone requires 17 days. The huge concrete slab must then be kept wet for approximately seven days to control the rate of setting.

The 36-inch slab rests on a waterproofing asphalt membrans, which in turn is laid upon a 4-inch concrete mud mat. Thus the huge concrete "ship" in effect "floats" upon the soil.

Heavy cantilever reinforced concrete walls form the sides. Regularly spaced concrete piers on the inside serve to hold strong steel girders which later will be placed on top of them to make a runway for three - dimensional adjustable girders. The latter will make it possible to move at will, in a matter of minutes, huge presses weighing 500 tons. In the past, weeks or months might be required to move such presses.

Removable laminated floor panels of pecan wood will surround the presses to allow complete freedom of adjustment and movement.

This enormous construction job requires 24,000 cubic yards of concrete. It was necessary for the contractor to build a complete concrete mixing plant on the site to accomplish the work at the uninterrupted speed required. From the mixing plant the concrete is pumped through an 8-inch metal

(Continued on Page Eight)

GROOVER AND I

OPEN LETTER TO THE MAYOR

Mayor Roger D. Lapham,
City of San Francisco.
Dear Mr. Mayor:

Even though the cards were stacked against you, you made a good pitch in trying to get the UNO permanent site located here in our City of Saint Francis of Assisi. Don't worry. Relax and let the matter jell for a while. **Subject it to the old "cooling-off period" with which you are so familiar.**

* * *

UNO is just an infant. It is now trying to take its first toddling steps. We hope it has a long life ahead. During its lifetime, it will doubtless make mistakes. Through experience, and turning hindsight into foresight, it is hoped that insofar as possible, these mistakes will be corrected.

* * *

Perhaps the rejection of San Francisco as a permanent home by UNO was its first mistake. Let us give it a chance to get it's breath and it may realize and correct this mistake. There is a lot of water yet to go over the dam.

* * *

New York has been selected as the interim home. Time will run into years before the permanent homesite can be completely cleared and buildings constructed. **Much can happen in this time—if we help it happen.**

* * *

For the next two years let UNO sweat and swelter, freeze and shiver, in its temporary New York home. At the same time let us do a little "needling" of the members. In a nice sort of way, and without appearing over-anxious, let us gently rub salt into the wound.

* * *

During the sweltering, sweating days of summer, we might mail to the members, pictures of vacation spots along our beaches and near the snowline of the high Sierras, and articles about our fog-conditioned climate. During the freeze and slush of winter, we could mail them descriptive matter of our all-year climate, complete with palm trees, parks and two-piece play suits.

* * *

An ideal thing to send would be an artistically prepared reprint of "San Francisco", by George Sessions Perry, appearing in the February 16th issue of the Saturday Evening Post. This article, more than anything else recently appearing in print, indirectly tells why San Francisco should be the permanent home of UNO.

* * *

We speak of San Francisco as being an ideal home for the United Nations Organization. **Mr. Mayor, for nearly one hundred years, San Francisco has been a United Nations Organization!** San Francisco has more of an International character than can be found anywhere else in the world within anything approaching the same area—and you might leave out that part about the area.

* * *

UNO wants to discover the secret of different nationalities living together in peace and harmony. **In San Francisco they have been doing that for longer than the memory of the oldest inhabitant.** Russian, German, French, Spanish, Italian and Chinese—shall I name more of them? There are 38 different Nations listed among the Consular Representatives in our 'phone book.

* * *

Where else can you find these groups maintaining their own identity, yet overlapping and blending into one people—Chinese eating Italian salami and speaking French!

* * *

San Franciso has all of what other cities each have a part. San Francisco is the romance and glamour, the hospitality, tradition and the open welcome of the West. Further, **it is something more indefinable: It is San Francisco!**

* * *

Let's quit "reaching", Mr. Mayor. Let us revert to the traditional San Francisco way and let the people of UNO find out these things for themselves. San Francisco has never really wanted to be a city of a million people. It has just wanted to be San Francisco. If other people come here and stay long enough to learn not to say "Frisco", we will take them in and make them welcome. The same applies to UNO.

* * *

During UNCIO, many of these people were "exposed" to San Francisco. It may require some time for it to "take", but during the interim period in New York, they will fail to find the way of gracious living which they found here, and which we take for granted.

* * *

Mr. Mayor, being a San Franciscan is more than a place of abode. It is a way of living—it is a state of mind!

Sincerely,
"Groover".

DEAN J. HUGH JACKSON RECEIVES AWARD

The National Association of Teaching Certified Public Accountants has announced that Dean J. Hugh Jackson of Stanford University, and a past national president of the National Association of Cost Accountants, as well as the San Francisco Chapter, has been awarded "the Diamond Key of NATCPA for 1945", the same being awarded "for distinguished contribution to the literature in the fields of accounting and auditing".

This award is not made for any single written work and is made without any regard as to whether the recipient is a member of the NATCPA or not. Its purpose is to honor scholarship in the fields of accounting and auditing. Three previous awards have been made by the Association—to Professor Harry A. Finney of Northwestern University, to Colonel Robert H. Montgomery of New York, and to Professor Hermann C. Miller of Ohio State University.

#

BUREAU WILL ADD TO SHASTA FORCE

Irving E. Harris, engineer in charge of bureau of reclamation work at Shasta dam, announces that between 100 and 150 men will be added to the field force there by June 30. Additional men will be added during the coming year.

The men will be employed in installing generating equipment at the power plant and dam, and in road work.

Three additional power units are being installed. Two of these are being transferred from Grand Coulee dam in Washington, and parts of one have already arrived. The third is being manufactured in the East.

Harris said approximately 50 freight cars are required to carry parts for each unit.

Chamber Names Manufacturers Committee

Appointment of a Manufacturers Committee to function through the Industrial Department of the San Francisco Chamber of Commerce was announced today by President Brayton Wilbur.

Purpose of the new committee will be to assist manufacturers in solving problems confronting them.

Roland Tognazzini, president of the Union Sugar Company, will serve as chairman of the new group which will have the following membership: Frank P. Adams, attorney; R. A. Balzari, sales analyst; Charles F. Bulotti, C. F. Bulotti Machinery Co.; M. J. Burress, Crane Co.; R. M. Christie, Christie Machine Works; Richard J. Elkus, Mangrum, Holbrook and Elkus; S. G. Fisher, L. & E. Emanuel, Inc.; Horace Guittard, Jr., Guittard Chocolate Co.; J. L. Higley, Otis Elevator Company;

Milton Jellins, Bank of America; Marron Kendrick, Schlage Lock Co.; Max Lowe, California Metal Trades Assn.; Edgar N. Meakin, California Press Manufacturing Co.; C. A. Rolley, Rolley Perfumes; Harold Selig, J. G. Johnson, Inc.; J. L. Stuart, J. L. Stuart Mfg. Co.; A. E. Werolin, McKinsey & Company.

The committee's agenda and objective were considered at its initial meeting this week.

HOLIDAY NOTICE

There will be no issue of the Daily Pacific Builder Friday, Feb. 22, Washington's Birthday.

The next issue will be that of Monday, February 25.

The offices will be closed all day Friday.

OFFICIAL PROPOSALS

FIRST PUBLISHED TODAY

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 20, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Lake County, between 1.2 miles north of Rodman, Narrows Road and Route 15 (I-Lak-89-E), a total length of about two (2) miles of highway to be graded and surfaced.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.125
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity)	1.70
Concrete vibrator operator	1.25
Flagman	1.00
Jackhammer operator	1.25
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.00
Oiler, power shovels or cranes	1.25
Operator of power shovel or other excavting equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.4375
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.3125
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.25
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.0625
Truck driver (less than 4 cubic yards water level capacity)	0.90
Any classification omitted herein not less than	1.00

Overtime—One and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—One and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (see said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements—Santa Clara County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 13, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Santa Clara County, on Bayshore Freeway at Santa Clara Street in the City of San Jose (IV-SC1-68,2-SJs), a separation structure to be constructed and approaches about six-tenths (0.6) mile in length to be graded and surfaced with Portland cement concrete and asphalt concrete on crusher run base.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.40
Asphalt paint mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.50
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity or paving type)	1.70
Electrician	1.70
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.00
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Plumber	1.625
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (8 cubic yards water level capacity or more)	1.50
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.25
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Headerboard man	1.375
Jackhammer operator	1.25
Oil distributor bootman	1.00
Oiler, power shovels or cranes	1.40
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.10
Truck driver (less than 4 cubic yards water level capacity)	1.00
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal office or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposal to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifcations regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 6, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Alameda County, in Oakland, between Distribution Structures and Seventh Street (IV - Ala - 69 - Oak.), about one and four-tenths (1.4) miles in length, to be widened with Portland cement concrete pavement, and existing pavement to be resurfaced with asphalt concrete.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Carpenter	1.75
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity and paving type)	1.70
Concrete vibrator operator	1.25
Flagman	1.0625
Headerboard man	1.375
Jackhammer operator	1.25
Laborer	1.0625
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Oiler, power shovels or cranes	1.40
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.00
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Renforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (8 cubic yards water level capacity or more)	1.625
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.0625

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same my be applicble to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans my be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on **March 6, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing portions of State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Alameda County, between Warm Springs and Mission San Jose, and between Warm Springs and Centerville (IV-Ala-5,69-C,A) about eight and three-tenths (8.3) miles in length, shoulders to be widened with imported borrow and surfaced with plant-mixed surfacing and penetration treatment.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per Hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.75
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity, and paving type)	1.70
Concrete vibrator operator	1.25
Flagman	1.0625
Jackhammer operator	1.25
Laborer	1.0625
Motor grader operator	1.85
Oiler power shovels or cranes	140
Operator of power shovel or other excavating equipment, shovel type controls (up to and including 1 cubic yard)	2.00
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (8 cubic yards water level capacity or more)	1.625
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.0625

Overtime: one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen): one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower. shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

HOW MUCH BUILDING?

Construction Revival—Guide Signs to Peacetime Expansion and Prosperity. A Market Study by F. W. Dodge Corp. New York 18 (119 W. 40th St.), F. W. Dodge Corp. 1945. 11 by 8¼ in. 32 pp.

How much actual building will there be in the next decade? That is what everyone connected with the building field—and everyone interested in the national economy—naturally wants to know. Estimates by the carload have appeared, some of them based soundly on statistics, others amounting to little more than personal guesses or wishful thinking. This market study by the F. W. Dodge Corporation ,however, is really more than an estimate: springing from the company's own summary of work actually planned, it is an analysis of the building volume that can reasonably be expected during the next ten years.

"Construction revival has begun," the study states, "ushering in a return to normal peacetime competitive market conditions. As transition problems are surmounted, volume will snowball."

What are these transition problems? For architects and engineers: "securing adequate staffs of designers and draftsmen, adequate information on materials and equipment available for early use in urgent projects, information on new products and services." For builders and sub-contractors: "man-power, material supply, price and wage adjustments, possible transportation shortages. For material and equipment manufacturers: "reestablishment of orderly marketing service to the field; sales and production manpower; and (for an important minority) reconversion of plant facilities."

On May 31, 1945, when the company's statistical tabulation of V-day projects was discontinued, the Dodge records of postwar projects showed a total of 99,638 specific projects located in the 37 states east of the Rocky Mountains, the estimated cost of which totaled $15,746,202,000. Since June 1 "hundreds of millions of dollars in additional preliminary and design-stage projects have been reported and tabulated on a new basis as currently contemplated work."

The Dodge Corporation disagrees with the commonly expressed opinion that the volume of public work in blueprint stage is inadequate to meet the needs of the transition period. On the contrary, "unduly strong pressure to push public building and engineering work in the recovery period would create intense competition for men and materials and add to the inflation threat." As for private building, it is reasonable to assume, the study states, "that most private projects in the design stage are scheduled for sites already selected and either owned or controlled by option. For such projects bids can be taken and decisions made fairly quickly."

ARCHITECT AND AUTHORITY

The Local Housing Authority and the Architect. By Oliver C. Winston. Chicago 37, Ill. (1313 E. 60th St.), Public Administration Service, 1945. 7x10 in., 60 pp. 60c.

Subtitled "A Working Relationship in Planning a Public Housing Program and in Designing a Public Housing Project," this booklet stresses the importance of cooperation between the housing authority and the architect. Considerable emphasis is placed on the responsibilities of the housing authority **before** the architect starts to design — the establishment of basic requirements. Mr. Winston finds three phases in this working relationship: (1) planning the new over-all housing program; (2) preparing the architectural program; and (3) designing the project. In the first phase the main burden of the work falls logically upon the housing authority, with the architect's principal services of a consulting nature. In the second phase, too, the architect's contribution is chiefly advice — on site planning, dwelling types, community facilities; with the preparation of cost estimates and some technical assistance on the side. The third phase, of course, is almost wholly the architect's baliwick.

"If such an approach to design . . . is adopted at the very beginning," Mr. Winston concludes, "it should be possible to avoid the unsatisfactory practice of having to prune, whittle and shave project designs . . . Such an approach should lead to a more purposeful selection of planning criteria by the local housing authorities and to more disciplined use of design criteria by architects and engineers."

SHOPPING CENTERS

Planning Neighborhood Shopping Centers. By Marcel Villaneuva, A.I.A. New York 18 (512 Fifth Avenue), National Committee on Housing, Inc., 1945. 8½ by 11 in. 34 pp. illus. $1.00.

Here is a community planning study devoted entirely to the problems of the shopping center—its location, the number of stores required, parking spaces, and so on. Its chief value probably lies in the carefully worked out tables giving area requirements for stores of various types. While these requirements are purely theoretical, they serve as a working basis for planning, and they point up Mr. Villaneuva's conclusion that "most cities and towns are overbuilt with old and unwanted stores, and underbuilt with regard to new and desired shopping centers planned for our modern way of living."

Bid Opening Schedule

BUILDING PROJECTS

Bid Opening Date	Project	Location of Project	Noted in Issue
2-23—12:00 M.	—Store	Palo Alto	2-18
2-25	Painting and Repairs (Govt.)	San Diego	1-22

FOR BETTER BUILDING

NEWS OF MATERIALS, EQUIPMENT AND METHODS

KITCHEN UNITS

Flexibility and adaptability are the goals of a new line of 12 steel steel kitchen units which can be bought separately or as a complete package, installed just as the housewife and the size of the kitchen demand. The line includes five types of sinks and sink cabinets, varying in width from 42 to 66 inches; six types of wall cabinets, ranging in width from 24 to 66 inches; and one type of base cabinet, 24 inches wide.

The same company offers a new Shelvador Refrigerator featuring maximum accessibility. Five food shelves are on the inside of the refrigerator door, providing storage space for bottles, eggs, fruits, processed foods. The Crosley Corporation, Cincinnati 25, Ohio.

§§

HEATING

ELECTRIC UNIT HEATERS

Under terms of a license granted by the Wesix Electric Heater Co., San Francisco, the Westinghouse Electric Corp. has acquired the right to use the basic principles involved in the design, construction and control of unit type electric heaters. Models comprising the new line will range from an easily protable 1250-watt, 110-volt floor unit to 4 kw, 220-volt floor and wall models. All of the 220-volt units will have built-in automatic thermostatic control The Westinghouse Electric Corp., Emeryville, Calif.

CIRCULATOR FAN

Designed to prevent cold floors, the new RECO Heat Circulator Fan blows upwards, the air traveling along the ceiling and down the walls, carrying the super-hot air with it and intermixing it with the room air, providing uniform temperature throughout the room. It is especially recommended for hard to heat rooms and rooms which are not constantly heated. Reynolds Electric Co., 2650 W. Congress St., Chicago 12, Ill.

§§

PHOSPHOR POWDER

A new phosphor powder similar to the powder used in present fluorescent lamps except that it changes the energy wavelengths to ultraviolet, makes possible two new types of lamp: a fluorescent type sunlamp and a germicidal lamp for use with poultry and animals.

Not yet available, the F-type Sunlamp will be made in 20- and 40-watt sizes identical in dimensions and electrical operating characteristics to present fluorescent lamps of the same wattages. The difference is in the special ultraviolet-transmitting glass which is coated inside with the phosphor powder. The lamp can be combined with existing fluorescent lamps in some present office, factory, home or store fixtures.

A thin coating of the phosphor powder on hte inside of 15- and 30-watt germicidal lamps combines germ-killing with ultraviolet energy. Not recommended for human use, the lamps are now available in limited quantities. General Electric Co., Bridgeport, Conn.

§§

WALL COVERING

A new wall covering called Congowall consists of a lustrous baked enamel surface in a cameo-like tile design on a special patented, flexible, water-resistant felt backing. According to the manufacturers, Congowall will not warp or shrink, buckle or bulge, crack or craze, chip off or peel; it is easily installed over any firm, smooth, dry surface, and is suitable for both new work and remodeling. Offered at present in five colors—peach, green black, blue and white. Congoleum-Nairn Inc., Kearny, N. J.

§§

ALUMINUM VENETIANS

Laboratory tests of an aluminum slat venetian blind just announced show a heat reduction of 75 per cent, the manufacturers report. One side of the slat is polished to reflect the heat, and the other side is satin finished to prevent the metal from absorbing heat. Dust and grease will not adhere to the treated metal. MacArthur Smith and Associates, 134 S. LaSalle St., Chicago 3, Ill.

§§

FARM QUONSET

A new type Quonset building—a cousin to the round-roofed Quonset of Navy fame—has been designed especially for rural utility purposes and now is in production.

The new, low-cost, packaged, all-steel building differs from the Navy Quonset in that it has a straight side. Designated the Quonset 24, this farm building has an unobstructed interior suited particularly for garage and storage of implements, tools and vehicles, or as an open-front loafing barn for animals.

The basic unit is 24 ft. deep and 12 ft. long. As may 12-ft. extensions as desired can be added to increase length. Sliding doors and section panels are available. Great Lakes Steel Corp., Stran-Steel Division, Penobscot Bldg., Detroit 26, Michigan.

§§

HOUSEHOLD ITEMS

RADIOS

Included in Westinghouse's new line of postwar home radio receivers are nine sets ranging from an ultra - modern 6-tube, 6 by 6 by 9 in. portable table model to a 14-tube radio-phonograph combination set housed in a modified Chippendale console cabinet and equipped to receive standard broadcasts, foreign shortwave broadcasts and frequency modulation programs. Television receivers will be ready for the market early next year.

Fourteen models, ranging from small plastic table models through portables, radio-phonograph combinations in both table models and consoles, and full - sized console furniture model radios, comprise the new Stewart - Warner line. New and exclusive features of all sets include the radair antenna, a built-in loop designed to pick out faintest signals but to repel static nterference, and a signal sentry, a device to eliminate fading and to bar unwanted hum or other noises. An automatic record changer, operated with only one control, is incorporated in the radio-phonograph combinations.

REFRIGERATORS

Three 7-ft. models and one 9-ft. model are on the 1946 Kelvinator production schedule. Topping the line is the new Moist Master, a triple range unit with special provisions for freezing and storing frozen foods, for the safe-keeping of foods of high moisture content, and for general storage of all average foods. In effect a combination refrigerator and frozen food chest, the new unit has a freezer capacity of approximately 9 lbs. of ice cubes, and more than 35 lbs. of packaged frozen foods. Kelvinator Division, Nash - Kelvinator Corp., Detroit 32, Mich.

§§

NEW BUILDINGS

PAPER GOODS PLANT

Construction of a new plant to house The American Paper Goods Company's midwestern operation has been started by The Austin Company in Chicago.

The new building was especially designed by Austin to accommodate new high-speed presses and machinery for the production of ice cream containers, beverage cups, specialty bags and other products. It will be one-story, with welded steel frame, brick exterior and continuous sash in side walls and monitors. Air conditioned offices at one side of the principal facade will be balanced by truck loading docks on the other.

PLASTICS LABORATORY

Plans for a new plastics laboratory at its Parlin, N. J., plant have been announced by Hercules Powder Company. The laboratory will serve as headquarters for the company's development and research work on plastics. It will have facilities for compounding finished plastics for testing, and will be set up in such a way that customers who buy basic materials from the company can see new techniques applicable to their work demonstrated, and can work with the laboratory chemists on their processing problems. Plans include several constant - temperature rooms in which plastics qualities can be tested under conditions specified by customers. Both cold and heat tests will be possible, with the temperatures in the testing rooms ranging from minus 70 degrees to plus 180 degrees F.

The building will be T-shaped, with the head of the T one story high and the leg two stories high. Laboratories will be located on both floors. Offices, a conference room and high-temperature equipment will be on the second floor, while cold - storage rooms, electrical equipment rooms and a machine shop will be on the first floor. Walls will be tile-lined, floors concrete. Air will be filtered to insure freedom from contamination by dust and dirt. All electrical equipment will be explosion-proof.

OFFICES ADDITION

E. I. duPont de Nemoures & Co., Inc., has announced plans for the construction of an 18-story third section to the Nemours Building in Wilmington, Del. The building will be completely air conditioned. Voorhees, Walker, Foley and Smith are the architects, with Frederick A. Godley as associate; the contract has been awarded to the Turner Construction Co.

WEAVING PLANT

The Lumite Division of Chicopee Mfg. Corp. of Georgia has announced plans for a new weaving plant at Cornelia, Ga., for which ground was broken late in October.

A one-story building of modern design, the plant will be devoted exclusively to the weaving of Lumite plastic fabrics, is expected to be in operation early in 1946. L. W. Robert & Co., of Atlanta, are the engineer - designers; Daniel Construction Co., Greenville, S. C., the contractor.

§§

STANDARDS

LIGHT GAGE STEEL

Research which the Committee on Building Codes of American Iron and Steel Institute has been sponsoring since 1939 at Cornell University has provided sufficient data for presentation soon to the engineering profession in a specification for the design of light gage steel structural members, it has been announced. When available, the specification will provide a basis upon which to design with light gage sheet and strip steel. It will include provisions which distinguish between the behavior of stiffened and unstiffened flanges and their relative load carrying capacities.

DIMENSIONAL COORDINATION

The American Standards Association has approved an American Standard on the basis of which building materials and equipment of coordinated sizes and dimensions will be made available to construction operations. and building plans and details can be correlated with such dimensions.

The new standard is A62.1-1945, American Standard Basis for the Coordination of Dimonsions of Building Materials and Equipment. Also approved is A62.2 - 1945, American Standard Basis for the Coordination of Masonry.

Project A62 was organized by the A.S.A. in 1939, with The American Institute of Architects and The Producers' Council, Inc., as joint sponsors.

RESIDENTIAL BOILERS

A code for rating and testing oil-fired residential steel boilers and for rating commercial boilers has been issued by Steel Boiler Institute, Inc., requiring oil-fired residential boilers up to 3,000 sq. ft. net rating to show at least 70 per cent over-all efficiency by evaporation test when operating at 150 per cent of net rating.

Manufacturers' Literature

COPPER CONSTRUCTION

Research Solves Problem of Stress Failures in Sheet Copper Construction. A report on two years of research into the behavior of copper installations, with specific recommendations for design an construction methods directed toward the elimination of stress failures. Includes 30 detail sheets showing methods of installation and some of the basic principles in the use of sheet copper. Diagrammatic drawings of parapet walls, seam roofing, open valleys for slopes, fascia gravel stops, built-in gutters, covers over expansion joints, etc. 96 pp., illus. Revere Copper and Brass, Inc., 230 Park Ave., New York 17, N. Y.*

FIBER BOXES

Vs-Boxes. A report on the weatherproof solid fiber box, including a description of wartime uses and various tests used to insure its quality. 16 pp., illus. Container Testing Laboratories, Inc., 45 E. 22nd St., New York, N. Y.

HANGARS

Low Cost Housing for Small Airplanes. Basic ideas on the layout and construction of individual wood hangars in single and multiple units, wood repair shops and large commercial hangars. Offers 10 reasons why wood hangars are thritfy. 8 pp., illus. Timber Engineering Co., 1319 18th St., N.W., Washington 6, D. C.

HARDWARE

Solid Brass and Bronze Hardware. A description of Mount Vernon and Monticello and their solid brass hardware fixtures; examples of modern brass and bronze hardware. 16 pp., illus. Copper & Brass Research Assn., 420 Lexington Avenue, New York 17, N. Y.

HEATING

A Step Ahead in Hospital Heating (Bulletin No. 633). A description of differential heating and how it works; cost analysis; typical installations in hospitals. 24 pp., illus. C. A. Dunham Co., 450 East Ohio St., Chicago 11, Ill.*

INSULATION

Foamglas Insulation forTanks. The method to be used in installing Foamglas for the insulation of high temperature tanks, towers and ducts. Specifications and details, table of block sizes. 24 pp., illus. Pittsburgh Corning Corp., 632 Duquesne Way, Pittsburgh 22, Pa.*

LIGHTING

Engineered Lighting and Contral Equipment (Catalog No. 945). A condensed catalog, with photographs and detail drawings, specifications and engineering details. Equipment listed includes stage lighting, exit and directional signs, indirect and built-in lighting, fluoescent troffers, stage switchboards. 10 pp., illus. Hub Electric Corp., 2219-22 W. Grand Ave., Chicago 12, Ill.

G-E Slimline and Circline Lamps Seen in Many Roles. The use of the two types of fluorescents in store design. Diagrams and sketches of store interiors, special display units, and store lighting fixtures. 12 pp., illus. General Electric Co., Nela Park, Cleveland 12, Ohio.*

MEMORIAL TABLETS

Bronze Honor Rolls. Descriptive circulars featuring the Willard "Add-a-Name" type of cast bronze honor roll tablet. 6 pp., illus. The Willard Bronze Co., 3608-16 Colerain Ave., Cincinnati 23, Ohio.

PLASTICS

Plexiglas Design Manual. Design methods for arylic plastics. Complete with diagrams and illustrations of various products. 56 pp., illus. Rohm & Haas Co., Washington Square, Philadelphia 5, Pa.*

Forming Articles from Extruded Tenite Sheeting. Nine primary operations in the fabrication of sheet plastic articles, and the equipment which may be used. Includes several diagrams of equipment. 12 pp., illus. Tennessee Eastman Corporation, Kingsport, Tenn.*

SILICONES

Dow Corning Silicones, New Engineering Materials. Catalog listing all of the silicone products now available, and presenting many industrial uses. Contains charts and graphs demonstrating the properties, tables of physical characteristics, etc. 12 pp., illus. Dow Corning Corp., Midland, Mich.

STEEL

In War . . . In Peace, Republic Enduro Stainless and Heat-Resisting Steels (Adv. 430). The war applications of Enduro steels, and suggestions for their translation into peacetime terms. 32 pp., illus. Republic Steel Corp.. Advertising Division, 3100 E. 45th Ave., Cleveland 4, Ohio.*

Know your Steel When You Build or Remodel. The uses of special - purpose sheet steels in building construction, built-in equipment and appliances. 24 pp., illus. The American Rolling Mill Co., 1717 Armco Ave., Middletown, Ohio.*

STEEL BOILERS

Standard Electric-Welded Steel Boilers (Bulletin No. S-67, 5th ed.) Full information including diagrams and specifications and dimension tables. 8 pp., illus. The Brownell Co., 430 N. Findlay St., Dayton 1, Ohio.

High Pressure Heavy Duty Firebox Steel Boilers (Catalog 96). Illustrates and describes with fully detailed tabulations and diagrams three series of steel riveted firebox boilers. 20 pp., illus. Kewanee Boiler Corp., Kewanee, Ill.*

TURBINES

The Gas Turbine Power Plant Now a Reality. History and features of the gas turbine. 20 pp., illus. Elliott Co., Jeannette, Pa.

WATER HEATERS

Nema Standards for Electric Water Heaters. Practical information on performance, rating, testing and manufacture of electric water heaters. Includes schematic diagram showing standard connections and color coding. 8 pp. National Electrical Mfgrs. Assn., 155 E. 44th St., New York 17, N. Y. 25 cents.

Test Specifications, Automatic Electric Storage Water Heaters. Intended to establish a uniform testing procedure to make possible the determination of the performance of electric storage water heaters in terms of safety, effectiveness, durability and convenience. 10 pp. National Electrical Mfgrs. Assn., 155 E. 44th St., New York 17, N. Y. 50 cents.

VENTILATION

Put the Wind to Work. Bulletin on the "Agitair" air exhauster. Typical applications, engineering data selecting the proper size, location principles. 10 pp., illus. Air Devices, Inc., 17 E. 42nd St., New York 17, N. Y.

WINDOWS

The Ultimate in Modern Ventilation and Vision. Descriptive folder on an aluminum package window unit. Gives specifications and installation details. 4 pp., illus. Watco Engineering, Inc., 2200 Scranton Road, Cleveland 13, Ohio.

ADVANCE CONSTRUCTION REPORTS

ENGINEERING SECTION

34—DAMS, RESERVOIRS & DREDGING

2/21/46 34
BIDS WANTED

BOULDER CANYON PROJECT.—Until March 19, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Yuma, Ariz., under Spec. 1195 for the construction of earthwork, canal lining and structures, stations 5725+00 to 6106+06, Coachella Canal, All-American Canal System, Boulder Canyon Project, Arizona-California-Nevada. The work is situated in the vicinity of Indio, Calif.

The principal items of work and the estimated quantities involved are as follows:

Schedule No. 1

(1) 396,500 cu. yds. excavation for canal;
(2) 220,000 cu. yds. excavation for drainage channels and dikes;
(3) 44,000 cu. yds. excavation for structures;
(4) 64,000 cu. yds. compacting embankments;
(5) trimming 201,400 sq. yds. foundations for concrete lining;
(6) 800 cu. yds. compacted subbase;
(7) 30,000 cu. yds. backfill about structures;
(8) 13,000 cu. yds. compacting backfill;
(9) 12,800 cu. yds. backfill at top of concrete lining;
(10) 19,000 cu. yds. riprap;
(11) constructing 330 cu. yds. reverse filter;
(12) 50 cu. yds. pit-run gravel blanket
(13) 4200 cu. yds. concrete in structures;
(14) 9800 cu. yds. concrete in unreinforced lining;
(15) 9800 cu. yds. concrete in reinforced lining;
(16) placing 610,000 lbs. reinforcement bars;
(17) placing 287,500 lbs. reinforcement fabric in canal lining;
(18) placing 1500 sq. ft. elastic filler material in joints;
(19) placing 820 lin. ft. rubber water stop in joints;
(20) erecting 112 M ft. b.m. timber in structures;
(21) laying 392 lin .ft. 12-in. diameter concrete pipe;
(22) laying 168 lin. ft. 18-in. diameter concrete pipe;
(23) laying 280 lin. ft. 24-in. diameter concrete pipe;
(24) laying 96 lin. ft. 36-in. diameter concrete pipe;
(25) laying 40 lin. ft 12-in. diameter asbestos-cement pipe;
(26) jacking 80 lin. ft. 84-in. diameter concrete pipe under railroad;
(27) installing 6800 lbs. screw-lift gates;
(28) installing 18,000 lbs. radial gates;
(29) installing 20,000 lbs. radial-gate hoists and operating and control mechanisms;
(30) installing 6500 lbs. metal water stops in joints;
(31) installing 3200 lbs. miscellaneous metal work;
(35) placing 65 cwt. bituminous material in float drums;
(33) installing 360 lin. ft. electric metal conduits;
(34) installing 50 lbs. ground wires.

Schedule No. 2

(1) 410,000 cu. yds. excavation for canal;
(2) 220,000 cu. yds. excavation for drainage channels and dikes;
(3) 44,000 cu. yds. excavation for structures;
(4) 64,000 cu. yds. compacting embankments;
(5) trimming and preparing 208,400 sq. yds. foundations for asphaltic-concrete lining;
(6) 800 cu. yds. compacted subbase;
(7) 30,000 cu. yds. backfill about structures;
(8) 13,000 cu. yds. compacting backfill;
(9) 12,800 cu. yds. backfill at top of asphaltic-concrete lining;
(10) 19,000 cu. yds. riprap;
(11) constructing 330 cu. yds. reverse filter;
(12) 50 cu. yds. pit-run gravel blanket
(13) 4200 cu. yds. concrete in structures;
(14) 208,400 sq. yds. asphaltic-concrete course for canal lining;
(15) 2100 tons of asphalt for asphaltic-concrete;
(16) 170 tons asphalt for seal treatment;
(17) placing 610,000 lbs. reinforcement bars;
(18) placing 1130 sq. ft. elastic filler material in joints;
(19) placing 820 lin. ft. rubber water stop in joints;
(20) erecting 112 M ft. b.m. timber in structures;
(21) laying 392 lin. ft. 12-in. diameter concrete pipe;
(22) laying 168 lin. ft 18-in. diameter
(23) laying 280 lin. ft. 24-in. diameter concrete pipe;
(24) laying 96 lin. ft. 36-in. diameter concrete pipe;
(25) laying 40 lin. ft. 12-in. diameter asbestos-cement pipe;
(26) jacking 80 lin. ft. 84-in. diameter concrete pipe under railroad;
(27) installing 6800 lbs. of screw-lift gates;
(28) installing 18,000 lbs. radial gates;
(29) installing 20,000 lbs. radial-gate hoists and operating and control mechanisms;
(30) installing 6500 lbs. metal water stops in joints;
(31) installing 3200 lbs. miscellaneous metal work;
(32) placing 65 cwt. bituminous material in float drum;
(33) installing 360 lin. ft. electrical metal conduits;
(34) installing 50 lbs. ground wires.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; E. A. Moritz, regional director, Administration Bldg., Boulder City, Nev.; J. K. Rohrer, acting construction engineer, Yuma, Ariz., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the acting construction engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.50 per copy, not returnable.

2/21/46 34
BIDS WANTED

CENTRAL VALLEY PROJ., Calif.—Until March 29, 10 A. M., bids wll be received by the U. S. Bureau of Reclamation, Walker R. Young, chief engineer, Friant, under Spec. 1204, for the construction of earthwork, concrete lining, and structures, for Friant-Kern Canal, Sta. 1647 plus 75 to Sta. 3876 plus 00, Friant Division, Central Valley Project. The work extends from 18 miles east of Fresno to 10 miles east of Visalia.

The principal items of work and estimated quantities involved are as follows:

SCHEDULE No. 1
Stations 1647 plus 75 to 1932 plus 75

(1) 1,045,000 c.y. common excav. for canal;
(2) 212,500 c.y. rock do;
(3) 100,000 sta. c.y. overhaul;
(4) 67,300 c.y. compacting embankment;
(5) 5,600 c.y. common excavation for drainage channels and dikes;
(6) 500 c.y. rock do;
(7) 16,500 c.y. common excavation for structures;
(8) 200 c.y. rock do;
(9) preparing 67,000 s.y. rock foundations for concrete lining;
(10) trimming 227,000 s.y. of earth foundations for concrete lining;
(11) 100 c.y. rockfill;
(12) constructing 80 c.y. of reverse filters;
(13) 1,550 s.y. dry-rock paving;
(14) 11,700 c.y. backfill about struc.;
(15) 4,700 c.y. compacting backfill;
(16) 1,460 c.y. concrete in structures;
(17) 500 c.y. concrete in bridges;
(18) 14,150 c.y. concrete in reinf. canal lining;
(19) 14,150 c.y. concrete in unreinf. canal lining;
(20) placing 336,000 lbs. reinf. bars in struc. and bridges;
(21) placing 750,000 lbs. reinf. bars in canal lining;
(22) placing 620 s.f. elastic filler material in joints;
(23 placing 140 l.f. of rubber water stops in joints;
(24) placing 3,000 lbs. of metal water stops in joints;
(25) erecting 196.3 M ft. b.m. timber in structures;
(26) constructing 20 cattle guards;
(27) constructing 1.5 miles barbed-wire fence;
(28) constructing 10 miles of comb. barbed- and woven-wire fence;
(29) constructing 43,000 l.f. of underdrains with uncemented joints;
(30) constructing 29,000 l.f. of feeder drains;
(31) installing 410 l.f. pipe in reverse filters;
(32) installing 29,600 lbs. of misc. metal work.

SCHEDULE No. 2
Stations 1932 plus 75 to 2631 plus 00

(1) 3,002,000 c.y. common excav. for canal;
(2) 8,000 c.y. rock do;
(3) 153,000 sta. c.y. overhaul;
(4) 40,450 c.y. compacting embankment;
(5) 302,000 c.y. common excav. for drainage channels and dikes;
(6) 2,000 c.y. rock do;
(7) 120,000 c.y. common excavation for structures;
(8) 100 c.y. rock do;
(9) 134,000 c.y. uncompacted earth canal lining;
(10) 336,000 c.y. compacted do;
(11) 5,200 c.y. rockfill;
(12) 7,100 s.y. dry-rock paving;
(13) 92,000 c.y. backfill about struc;
(14) 47,000 c.y. compacting backfill;
(15) 11,700 c.y. concrete in struc.;
(16) 5,200 c.y. concrete in bridges;
(17) placing 2,825,000 lbs. reinf. bars in structures and bridges;
(18) placing 450 s.f. elastic filler material in joints;
(19) placing 25,400 lbs. of metal water stops in joints;
(20) erecting 217.6 M ft. bm timber in structures;
(21) constructing 40 cattle guards;
(22) constructing 12 miles of barbed-wire fence;
(23) constructing 12 miles of comb. barbed- and woven-wire fence;
(24) laying 440 l.f. 18-inch diameter corrugated metal pipe;
(25) laying 165 l.f. 24-inch do;
(26) laying 115 l.f. 30-inch do;
(27) laying 150 l.f. 36-inch do;
(28) laying 290 l.f. 48-inch do;
(29) installing 50,000 lbs. of misc. metal work.

SCHEDULE No. 3
Stations 2631 plus 00 to 3369 plus 00

(1) 2,660,000 c.y. common excavation for canal;
(2) 181,000 rock do;
(3) 106,000 sta. c.y. overhaul;
(4) 229,500 c.y. compacting embankment;
(5) 203,000 c.y. common excav. for drainage channels and dikes;
(6) 2,000 c.y. rock do ;
(7) 40,000 c.y. common excavation for structures;
(8) 2,000 c.y. rock do;
(9) preparing 61,300 s.y. rock foun foundations for concrete lining;
(10) trimming 170,000 s.y. of earth foundations for concrete lining;
(11) 120,000 c.y. uncompacted earth canal lining;
(12) 302,000 c.y. compacted do;
(13) 100 c.y. rockfill;
(14) 5,400 s.y. dry-rock paving;
(15) 25,000 c.y. backfill about struc.;
(16) 14,000 c.y. compacting backfill;
(17) 3,480 c.y. concrete in struc.;
(18) 4,100 c.y. concrete in bridges;
(19) 11,500 c.y. concrete in reinforced canal lining;
canal lining;
(20) 11,500 c.y. concrete in unreinf.
(21) placing 1,158,000 lbs. reinf bars in structures and bridges;
(22) placing 610,000 lbs. of reinf. bars in canal lining;
(23) placing 400 s.f. elastic filler material in joints;
(24) placing 4,400 lbs. metal water stops in joints;
(25) erecting 424.0 M ft. bm timber in structures;
(26) constructing 48 cattle guards;
(27) constructing 12.5 miles barbed-wire fence;
(28) constructing 12.5 miles of comb. barbed- and woven-wire fence;
(29) constructing 21,000 l.f. underdrains with uncemented joints;
(30) constructing 14,000 l.f. feeder drains;
(31) laying 175 l.f. 18-in. diam. corru. metal pipe;
(32) laying 315 l.f. 24-inch do;
(33) laying 560 l.f. 30-inch do;
(34) laying 170 l.f. 48-inch do;
(35) laying 75 l.f. 54-inch do;
(36) installing 76,000 lbs. of misc. metal work.

SCHEDULE No. 4
Stations 3369 plus 00 to 3876 plus 00

(1) 1,337,000 c.y. common excav. for canal;
(2) 146,000 rock do;
(3) 154,000 sta. c.y. overhaul;
(4) 251,000 c.y. compacting embankment;
(5) 11,000 c.y. common excav. for drainage channels and dikes;
(6) 1,000 c.y. rock do;
(7) 132,000 c.y. common excavation for structures;
(8) 1,000 c.y. rock do;
(9) preparing 29,000 s.y. rock foundations for concrete lining;
(10) trimming 473,000 s.y. earth foundations for concrete lining;
(11) 2,300 c.y. rockfill;
(12) constructing 80 c.y. of reverse filters;
(13) 1,400 s.y. dry-rock paving;
(14) 90,000 c.y. backfill about struc.;
(15) 41,000 c.y. compacting backfill;
(16) 3,600 c.y. concrete in struc.;
(17) 300 c.y. concrete in bridges;
(18) 24,000 c.y. concrete in reinforced canal lining;
(19) 24,000 c.y. concrete in unreinf. canal lining;
(20) placing 642,000 lbs. reinf. bars in in struc. and bridges;
(21) placing 1,272,000 lbs. reinf. bars in canal lining;
(22) placing 330 s.f. elastic filler material in joints;
(23) placing 30 l.f. of rubber water stops in joints;
(24) placing 11,100 lbs. metal water stops in joints;
(25) erecting 141.3 M ft. bm timber in structures;
(26) constructing 26 cattle guards;
(27) constructing 1,900 l.f. of guard rails at bridge approaches;
(28) constructing 8.2 miles barbed-wire fence;
(29) constructing 8.2 miles combina. barbed- and woven-wire fence;
(30) constructing 72,000 l.f. underdrains with uncemented joints;
(31) constructing 48,000 l.f. of feeder drains;
(32) installing 410 l.f. pipe in reverse filters;
(33) laying 160 l.f. 18-in. diam. corru. metal pipe;
(34) laying 325 l.f. 24-inch do;
(35) installing 50,600 lbs. of miscel. metal work.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; R. L. Boke, Regional Director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; R. K. Durant, Acting Construction Engineer, Friant Calif., and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Acting Construction Engineer.

No charge to prospective bidders for copies of the specifications and and drawings; to others, $2.50 per copy, not returnable.

BIDS WANTED

CENTRAL VALLEY PROJECT, Calif.—Until March 27, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, chief engineer, Antioch, Calif., under Spec. 1183 for the construction of Delta-Mendota Canal, stations 686 to 1365, and Westley wasteway, Delta Division, Central Valley Project, California. The work is situated in the vicinity of Patterson, Calif.

The principal items of work and the estimated quantities involved are as follows:

Schedule No. 1
Station 686 to Station 1365

(1) 2,800,000 cu. yds. excavation for canal, unclassified;
(2) 100,000 sta. cu. yds. overhaul;
(3) 350,000 cu. yds. compacting embankments;
(4) 40,000 cu. yds. excavation for drainage channels;
(5) 45,000 cu. yds. excavation for structures;
(6) 27,000 cu. yds. backfill;
(7) 24,000 cu. yds. compacting backfill;
(8) trimming 844,000 sq. yds. foundation for concrete lining;
(9) 11,100 cu. yds. concrete in structures;
(10) 47,000 cu. yds. concrete in unreinforced canal lining;
(11) 47,000 cu. yds. concrete in reinforced canal lining;
(12) placing 1,760,000 lbs. reinforcement in structures;
(13) placing 3,000,000 lbs. reinforcement in canal lining;
(14) 1500 sq. yds. dry-rock paving;
(15) placing 4600 sq. ft. elastic joint filler;
(16) placing 1500 lin. ft. rubber water stops;
(17) installing 255,000 lbs. gates and hoist;
(18) installing 58,000 lbs. miscellaneous metal work;
(19) installing 250 lin. ft. electrical metal conduit;
(20) installing 200 lbs. electrical conductors;
(21) constructing 40 cattle guards;
(22) placing 900 lin. ft. 15-in. precast pipe;
(23) placing 100 lin. ft. 18-in. precast pipe;
(24) placing 50 lin. ft. 24-in. precast pipe;
(25) erecting 510 M ft. b.m. timber in bridges.

Schedule No. 2
Westley Wasteway

(1) 193,000 cu. yds. excavation for wasteway channel;
(2) 33,000 cu. yds. excavation for structures;
(3) 100,000 cu. yds. of backfill for wasteway channel;
(4) 13,000 cu. yds. backfill for structures;
(5) 20,000 cu. yds. compacting embankment along wasteway;
(6) 4000 cu. yds. compacting backfill;
(7) trimming 105,000 sq. yds. foundation for lining;
(8) 3100 cu. yds. concrete in structures;
(9) 21,000 cu. yds. concrete in wasteway lining and sidewalls;
(10) placing 2,400,000 lbs. reinforcement steel;
(11) installing 130,000 lbs. of structural steel;
(12) installing 11,500 lbs. miscellaneous metal;
(13) installing 700 sq. ft. elastic joint filler;
(14) erecting 65 M ft. b.m. timber in bridges;
(15) placing 100 lin. ft. 18-in. precast pipe;
(16) placing 20 lin. ft. 24-in. precast pipe.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; R. L. Boke, regional director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; O. G. Boden, construction engineer, Antioch, Calif., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.50 per copy, not returnable.

2/21/46 34
BIDS WANTED

TUCUMCARI PROJECT, N. M.—Until March 27, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Tucumcari, N. M., under Spec. 1189 for construction of structures, laterals Unit No. 2; earthwork and structures, laterals Units Nos. 3 and 4; and Conchas Canal, stations 3343 plus 17 to 3662 plus 00, Tucumcari Project, N. M. The work is situated in the vicinity of Tucumcari, N. M.

The principal items of work and the estimated quantities involved are as follows:

SCHEDULE No. 1
Structures—Lateral Unit No. 2

(1) 20,200 c.y. unclass. excav. for structures;
(2) 13,650 c.y. backfill;
(3) 5,000 c.y. compacted backfill;
(4) 2,000 c.y. concrete in structures;
(5) placing 165,000 lbs. reinf. bars;
(6) erecting 26 M. ft. bm of timber in structures;
(7) installing 20,000 lbs. of gates and misc. metal work;
(8) laying 1000 l.f. 15-in. diameter concrete pipe;
(9) laying 950 l.f. 18-inch do;
(10) laying 200 l.f. 21-inch do;
(11) laying 1,825 l.f. 24-inch do;
(12) laying 400 l.f. 30-inch do;
(13) laying 100 l.f. 36-inch do;
(14) laying 100 l.f. 42-inch do;
(15) laying 600 l.f. 48-inch do;

SCHEDULE No. 2
Earthwork and Structures—Lateral Unit No. 4

(1) 116,000 c.y. common excav. for laterals;
(2) 18,500 c.y. rock do;
(3) 91,000 sta. c.y. overhaul;
(4) 120,000 c.y. compacting embankment;
(5) 12,000 c.y. unclass. excavation for structures;
(6) 5,300 c.y. backfill;
(7) 5,000 c.y. compacting backfill;
(8) 1,850 c.y. concrete in structures
(9) placing 103,000 lbs. reinf. bars;
(10) 1,900 s.y. dry-rock paving;
(11) installing 28,000 pounds of gates and misc. metal work;
(12) erecting 4.3 M. ft. bm timber in structures;
(13) laying 1,170 l.f. 15-in. diameter concrete pipe;
(14) laying 968 l.f. 18-inch do;
(15) laying 316 l.f. 24-inch do;
(16) laying 54 l.f. 30-inch do;
(17) laying 2,020 l.f. 36-inch do;
(18) laying 224 l.f. 42-inch do;
(19) laying 158 l.f. 60-inch do;
(20) jacking 50 l.f. 36-inch diameter concrete pipe thru embankment
(21) jacking 50 l.f. 60-inch do;

SCHEDULE No. 3
Earthwork and Structures—Lateral Unit No. 3

(1) 66,000 c.y. common excavation for laterals;
(2) 14,000 c.y. rock do;
(3) 21,000 sta. c.y. overhaul;
(4) 75,000 c.y. compacting embankment;
(5) 8,200 c.y. unclass. excavation for structures;
(6) 5,600 c.y. backfill;
(7) 3,500 c.y. compacting backfill;
(8) 1,300 c.y. concrete in structures;
(9) placing 91,000 lbs. reinf. bars;
(10) 2,200 s.y. dry-rock paving;
(11) installing 31,000 lbs. gates and misc. metal work;
(12) erecting 5 M ft. bm of timber in structures;
(13) laying 1,380 l.f. 15-inch diameter concrete pipe;
(14) laying 1,670 l.f. 18-inch do;
(15) laying 430 l.f. 24-inch do;
(16) laying 370 l.f. 30-inch do;
(17) laying 960 l.f. 36-inch do;
(18) laying 160 l.f. 42-inch do;

SCHEDULE No. 4
Earthwork and Minor Structures—Stations 3343 plus 17 to 3514 plus 50, and Stations 3517 plus 70 to 3660 plus 80, Conchas Canal

(1) 41,000 c.y. common excavation for Conchas Canal;
(2) 7,000 c.y. rock do;
(3) 7,000 sta. c.y. overhaul;
(4) 40,000 c.y. compacting embankment;
(5) 2,300 c.y. common excavation for structures;
(6) 700 c.y. rock do;
(7) 1,300 c.y. backfill;
(8) 400 c.y. compacting backfil;
(9) 370 c.y. concrete in structures;
(10) placing 27,000 lbs. reinf. bars;
(11) 350 s.y. dry-rock paving;
(12) installing 5,100 lbs. gates and misc. metal work;
(13) erecting 0.05 M. ft. bm timber in structures;
(14) laying 160 l.f. 15-inch diameter concrete pipe;
(15) laying 230 l.f. 18-inch do;
(16) laying 90 l.f. 48-inch do;

SCHEDULE No. 5
Earthwork and Major Structures—Stations 3514 plus 50 to 3517 plus 70, and Stations 3660 plus 80 to 3662 plus 00—Conchas Canal

(1) 275 c.y. common excavation for Conchas Canal;
(2) 275 c.y. rock do;
(3) 600 c.y. compacting embankment;
(4) 2,500 c.y. common excavation for structures;
(5) 450 c.y. rock do;
(6) 2,500 c.y. backfill;
(7) 800 c.y. compacting backfill;
(8) 370 c.y. concrete in structures;
(9) placing 37,000 lbs. reinf. bars;
(10) 100 s.y. dry-rock paving;
(11) erecting 1 M ft. bm timber in structures.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; W. R. Nelson, Regional Director, P. O. Box 1609, Oliver-Eakle Bldg., Sixth and Polk Sts., Amarillo, Texas; H. W. Mutch, Project Engineer. Tucumcari, N. M.; and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Project Engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.75 per copy, not returnable.

BIDS WANTED

CENTRAL VALLEY PROJ., Calif.—As previously reported, until Mar. 29, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, Chief Engineer, Friant, Calif., under Spec. 1181 for construction of earthwork, canal lining and structures, King's River wasteway and King's River siphon, Station 1591 plus 66.15 to Station 1647 plus 75, Friant-Kern Canal, Friant Division, Central Valley Project. The work is situated approximately 18 miles east of Fresno.

The principal items of work and the estimated quantities involved are as follows:

(1) 237,500 c.y. common excavation for canal;
(2) 193,000 c.y. rock do;
(3) 5,500 c.y. compacting embankments;
(4) 40,000 c.y. common excavation for wasteway channel;
(5) 100 c.y. rock do;
(6) 35,000 c.y. common excavation for struc. except siphon barrel;
(7) 300 c.y. rock do;
(8) 200,000 c.y. common excav. for siphon barrel bet. Sta. 1596 plus 88.9 and 1627 plus 41.36;
(9) 100 c.y. rock do;
(10) trimming 6,100 s.y. earth foundations for concrete lining;
(11) preparing 16,000 s.y. of rock do;
(12) 16,300 c.y. backfill about struc.;
(13) 122,000 c.y. backfill about siphon barrel;
(14) 6,200 c.y. compacting backfill about structures;
(15) 6,100 c.y. riprap;
(16) constructing 265 c.y. filter;
(17) constructing 1,250 l.f. of feeder drain;
(18) constructing 1,150 l.f. of 6-inch dia. tile drains with uncemented joints;
(19) 4,325 c.y. concrete in struc.;
(20) 21,600 c.y. concrete in siphon barrel;
(21) 2,070 c.y. concrete in canal lining;
(22) placing 3,944,000 lbs. reinf. bars;
(23) placing 785 s.f. elastic joint-filler material;
(24) placing 280 l.f. rubber water stops;
(25) installing 360 l.f. clay pipe in filters;
(26) installing 8,700 lbs. of cast-iron pipe in filters;
(27) layng 66 l.f. 12-in. diam. cement-asbestos pipe;
(28) erecting 250,000 lbs. structural steel in highway bridge;
(29) placing 79,500 lbs. of metal water stop in joints;
(30) erecting 11 M. ft. b.m. tmber in railings;
(31) installing 61,000 lbs. radial gates
(32) installing 42,200 lbs. radial-gate hoists and operating and control mechanisms;
(33) installing 10,930 lbs. cylinder gate, gate frames and hoist;
(34) installing 11,900 lbs. of misc. metal work;
(35) installing 125 cwt. of bit. material in float drums;
(36) installing 1,400 l.f. of electrical conduits;
(37) installing 550 lbs. of electrical conductors and ground wires;
(38) installing 600 lbs. electrical apparatus;
(39) constructing 0.75 mile barbed wire right-of-way fence;
(40) constructing 0.20 mile of comb. barbed-wire and woven-wire right-of-way fence;
(41) constructng two cattle guards.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; R. L. Boke, Regional Director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; R. K. Durant, Acting Construction Engineer, Friant Calif., and Michael W. Straus, Commissioner, Bureau of Reclamaton, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Acting Construction Engineer.

No charge to prospective bidders for copies of the specifications and and drawings; to others, $2.50 per copy, not returnable.

Machinery & Material

Camp, Frenchman-Cambridge Unit, Missouri Basin Project, fob shipping point and/or Enders, Neb.

Specifications obtainable from the above office; no charge to prospective bidders; to others, $0.50, not returnable.

Use "Builderads"—
They Bring Results

Let your HEAD take you

(The average American today has a choice of just going where "his feet take him", or choosing wisely the course to follow. Let's skip ahead 10 years, and take a look at John Jones—and listen to him . . .)

"SOMETIMES I feel so good it almost scares me.

"This house—I wouldn't swap a shingle off its roof for any other house on earth. This little valley, with the pond down in the hollow at the back, is the spot I like best in all the world.

"And they're mine. I own 'em. Nobody can take 'em away from me.

"I've got a little money coming in, regularly. Not much—but enough. And I tell you, when you can go to bed every night with nothing on your mind except the fun you're going to have tomorrow—that's as near Heaven as man gets on this earth!

"It wasn't always so.

"Back in '46—that was right after the war and sometimes the going wasn't too easy—I needed cash. Taxes were tough, and then Ellen got sick. Like almost everybody else, I was buying Bonds through the Payroll Plan—and I figured on cashing some of them in. But sick as she was, it was Ellen who talked me out of it.

" 'Don't do it, John!' she said. 'Please don't! For the first time in our lives, we're really saving money. It's wonderful to know that every single payday we have more money put aside! John, if we can only keep up this saving, think what it can mean! Maybe someday you won't have to work. Maybe we can own a home. And oh, how good it would feel to know that we need never worry about money when we're old!'

"Well, even after she got better, I stayed away from the weekly poker game—quit dropping a little cash at the hot spots now and then—gave up some of the things a man feels he has a right to. We didn't have as much fun for a while but we paid our taxes and the doctor and—we didn't touch the Bonds.

"What's more, we kept right on putting our extra cash into U. S. Savings Bonds. And the pay-off is making the world a pretty swell place today!"

N. Y. Apartment

being a boon to tenants, the system is said to reduce fuel consumption.

"Temperature control is one of the advantages which the private home owner has enjoyed for some years," said Dowling. "We believe it should be available to the apartment house occupant, especially in high grade apartment houses.

"One of the most prevalent complaints of apartment house dwellers is the degree of heat in individual apartments. Temperature which will suit one tenant may be too hot or too cold for another. Then there is the necessity of heating all apartments to the degree which will provide comfort for those living on the shady side of the house.

"Inasmuch as we are interested in long term investment in property, rather than in speculative profits, we intend to encourage long term occupancy in our new buildings by providing as many new ideas as we deem practicable, like personalized heating, some of these will be advantages previously available only in private homes."

Construction of the new buildings, which will house approximately 60 families each, will be well underway this spring. Excavating has started on two of the properties and steel construction will begin on one in March and another in April.

Personalized heating controls have been installed by Minneapolis-Honeywell in 240 apartment houses, containing a total of 4,000 units, in key cities throughout the country.

Concrete Press

(Continued from Page 1)

tube over distances up to 1,200 feet to the bottom of the pit.

In all, a total of 150 freight carloads of cement, 1,000 carloads of sand and gravel, 175,000 square feet of waterproofing membrane, 1,600 tons of reinforcing steel, 4,200 tons of steel girders, and floor framing, and 320,000 board feet of flooring are being used.

PLANS and Speculations

Vallejo: The first removal of federally-built war housing in Vallejo will start within the next 60 days when dormitory units are dismantled and sent to other communities to be used as a temporary housing for veterans and at colleges, it was announced recently at the meeting of the Vallejo Committee on War Housing Disposition.

oOo

Martinez: Details are now being worked out for a campaign to raise funds for the construction of a swimming pool as a war memorial. A definite site and probable costs must be obtained before the campaign can be launched on a large scale. Chief of Police Steve Neilson will serve on the pool committee.

oOo

Fresno: The board of directors of the Merchants Association of Fresno last week endorsed unanimously the proposal of the San Joaquin Valley Agricultural Improvement Committee to establish an agricultural college at Fresno State College.

oOo

Madera County: The Madera County Board of Supervisors has earmarked $110,000 for improvement of the O'Neals - Bass Lake Road and $2,147.15 for preparatory work on the 11½ mile extension of Ripperdan Avenue to the Chowchilla Canal and thence north to the Firebaugh Road.

oOo

Springville: The Kings County Board of Supervisors has adopted a resolution supporting the immediate expansion of the Tulare-Kings Joint Tuberculosis Hospital at Springville.

oOo

San Rafael: The Board of Education has voted to submit two bond issues totaling $513,000 at a special election to be held as quickly as the required preliminaries can be taken care of to finance elementary and high school expansions and improvements. Most immediate work to be undertaken would be the rehabilitation of the West End School.

oOo

Butte County: The last red tape as far as the proposed Bidwell Bar bridge is concerned appeared to be broken last week when the Board of Supervisors voted to place the bridge and the Neal Road officially in the federal-state postwar set-up. County Engineer Bert Paxton will go ahead with getting the rights-of-way for the proposed bridge site.

oOo

Alameda County: An expenditure program of $2,950,786 for the present fiscal year has been set up by the Alameda county government alone for the county's highways and bridges, according to the California Taxpayers' Association. The program will be financed by $750,000 from the county's share of gasoline tax receipts, $300,000 from motor vehicle fees; $114,000 from miscellaneous federal, state and county revenues, $250,000 from the sale of bonds, and $1,536,786 from cash balances.

GROOVER AND I

NOSTALGIA AND RUM

The local papers are busting out all over with building and construction news, including three luxury hotels for Nob Hill.

★ ★ ★

A 35-story hotel is planned for the SW corner of California and Taylor streets. A Standard Oil Service Station now occupies this site where once stood the Portals of the Past.

★ ★ ★

These Portals may now be seen in Golden Gate Park—a nostalgic memento of the City That Was. They are all that is left of the Collis P. Huntington mansion.

★ ★ ★

Huntington, mentioned by Geo. Sessions Perry in his "San Francisco Story" in the February 16th S.E.P. as "a hard and cheery old man with no more soul than a shark", was one of a group of early San Franciscans who didn't do so bad building railroads and other gadgets.

★ ★ ★

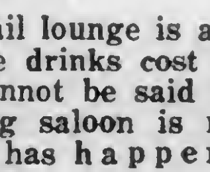
Considerable speculation is being passed around regarding the revolving cocktail lounge being planned for the Sky Room of one of these hotels.

★ ★ ★

If a room starts turning around after the eighth drink, that isn't news. But if a room starts revolving before the first drink, it may have a "slow-down" effect on the cash register.

★ ★ ★

A cocktail lounge is a saloon where drinks cost six-bits. It cannot be said that a revolving saloon is new. Rather, it has happened many times!



Fire Underwriters Adopt New Standard

One of the most significant and progressive advances in the history of fire insurance in this country is now being undertaken thru the National Board of Fire Underwriters with the acquiescence of all kinds of companies supplying the bulk of insurance in every field concerned, it was announced today by W. E. Mallalieu, General Manager of the National Board.

After many months' study of basis information on which the nation's fire insurance business operates, a new system has been developed on a national basis which will provide, for general use, fire insurance experience data of greater breadth, accuracy, uniformity and adequacy than ever before. The plan is known as the new standard classification plan. It replaces a plan in effect since 1932.

The importance of this to the public is that it will afford an improved statistical foundation for the business judgments of all kinds of companies in insuring, for the action of state authorities in regulating the business and other purposes.

A first proposal leading to the plan was prepared in collaboration by capital stock companies, mutual companies and reciprocals nearly a year ago and presented to the National Association of Insurance Commissioners. Then detailed study was begun by a special committee under auspices of the National Board. The plan is now being put into effect on basic data of 1946 furnished by more than 200 stock companies in the National Board.

"It is the unanimous opinion of the fire insurance business that the revised classification plan is superior for compiling underwriting experience," said Mallalieu. "We are certain that it is in the best interests of all concerned—the insuring public, supervisory authorities, companies of all kinds, and everyone who requires accurate, uniform and consistent data.

"It is anticipated that the new system, or as it may be modified, will be adopted in all states. We are prepared to make such adjustments as may be desirable after completion of studies now being made by the National Association of Insurance Commissioners and the New York Insurance Department.

"The first insurance industry conceives of a nation-wide classification system as providing merely a portion of the background which must be studied if an idea is to be derived concerning the adequacy or inadequacy of rate

(Continued on Page Four)

Hysteria Isn't Building Houses

(Reprint of an editorial appearing in PRACTICAL BUILDER)

This country is getting whipped up into hysteria over the housing shortage. But that is no way to whip the housing shortage itself. Let's stop knocking ourselves out with impossible "solutions", and think straight on this problem. Phony solutions will help nobody, and will only irritate returning veterans the more.

The housing shortage is critical all right. But it is not yet a national calamity; not an **absolute lack**, as it is in bombed-out Europe. What's more, the actual shortage is in material, equipment and labor. This is an inexorable result of our single-minded concentration on winning the war.

PRACTICAL BUILDER foresaw this shortage and warned against it, long before the war with Japan ended. Government made the mistake of not allowing the buliding industry to start reconversion in time.

But let's not pile error on error, by making another mistake. **We must avoid at all costs any so-called solution which will only create more and greater problems in its wake.** We must also discount the fact that many people, including GI's cannot afford, or get properly financed to build, the homes they are clamoring for.

If we attempt at all costs to take care of immediate housing needs, we will throw this country's whole economic machinery out of balance for years. Monkeying with America's second largest industry is literally "monkeying with the buzz-saw", because all the people's welfare is threatened. Thus no one will be benefited—least of all the veterans.

We **could** build a million houses quicky. We **could** do so by putting the country back on a war footing, stopping reconversion dead in its tracks, and forcing production of building materials at the expense of everything else—just to build a million shacks and barracks and call them housing.

But that's not the **veteran's idea of home.** And it is no solution to the housing shortage. Again it would be only temporary housing.

The only realistic solution, for the veterans, or anybody else, is to stop looking for magic tricks. Instead, continue to use all available materials to the utmost, and speed production in our mines, forests and factories. Labor must get back on the job whole-heartedly. That is the real problem and no "scheme" will solve it. Only labor, materials, equipment—**and time**—can possibly do the job.

What America needs in this crisis is **not** political expediency, but the courage to tell the people the truth: **Cooperate with the building industry and let them do the job.**

Bethlehem Steel Announces New Appointments

Bethlehem Pacific Coast Steel Corporation has announced the appointment of Edward G. English as Executive Assistant to H. H. Fuller, President of the Company. English was formerly Manager of Commercial Research and Supervisor of Pacific Coast Mill Scheduling. Educated at the University of Missouri where he received a B. S. degree in Civil Engineering and majored in Business and Public Administration. English started to work first for the Sheffield Steel Corporation in Kansas City. There he worked in the Engineering Department and later became Assistant Night Superintendent of the sheet mill before accepting a position in the reinforcing department of Pacific Coast Steel Company in Seattle in 1925.

Since 1925, English has remained with the Pacific Coast Company, serving in the engineering and sales departments at the Seattle, Portland, and Spokane offices until 1936. He was then transferred to the general offices at San Francisco of the company which had been a part of the Bethlehem organization since 1930. From 1936 to 1945 he was Assistant to the General Manager of Sales. English is married and has a daughter and a son.

Orin P. Walker replaces English as Manager of Commercial Research. Walker was formerly Assistant Sales Manager of Petroleum Equipment International, and shortly after this company was acquired by Bethlehem, joined its commercial research staff. He is a graduate of the University of Washington and has spent a year studying economics on the Continent. He is married and has a daughter.

Increase Shown In January Construction

New construction in January 1946 ttoaled $503,000,000, an increase of six per cent over December and 82 per cent over January 1945, the Construction Division, Department of Commerce, reported today.

Privately financed construction in January 1946 reached the highest level in almost five years with a volume of $394,000,000. This figure represented an increase of 8.5 per cent over December and 249 per cent over January 1945. The rise from December to January was a deviation from the normal seasonal trend of about 5 per cent decline, it was pointed out.

Publicly financed construction declined $2,000,000 from the December level to $109,000,000 in January. The volume of publicly financed construction in January 1945 was $164,000,000.

In the privately financed group, residential construction (exclusive of farm dwellings) amounted to $138,000,000 in January 1946 and showed only a small rise—3 per cent—from December. Construction of stores, restaurants and garages increased 24 per cent from December to $46,000,000 in January, and industrial construction advanced 12 per cent from December to $111,000,000 in January. Privately financed public utilities construction continued at a fairly even pace with $48,000,000 in January as compared with $50,000,000 in December.

The volume of publicly financed residential construction in January amounted to only $1,000,00, the same as in December, and public non-residential construction also remained unchanged at $31,000,000. Military and naval construction continued its downward trend, dropping 10 per cent from Decem-

PLUMBERS

Within a few days the "Builder" will start to publish, as a regular feature, plumbing permits issued by the City of Oakland.

Col. George Mayo Presented With Legion Of Merit

Colonel George Mayo, District Engineer of the San Francisco District, U. S. Corps of Engineers, now Acting Division Engineer of the Pacific Division, was presented with the Legion of Merit at the Headquarters, Western Defense Command, Presidio of San Francisco, on Thursday, Feb. 21, 1946.

Brig. Gen. H. F. Nichols presented the citation and medal to Colonel Mayo, who earned the decoration while serving as Air Engineer, Headquarters Army Air Forces, from December 1943 to July 1945. The citation praises Colonel Mayo for the development of training standards, the equiping of engineering elements, the development of specialized equipment and for the development of flying fields during his tenure.

Colonel Mayo, a native Californian, is a graduate of the University of California, Class of 1911, and has been a member of the U. S. Corps of Engineers since 1916. At the outbreak of the war with Japan, he was sent to the Panama Canal Zone as Chief Engineer of the Caribbean Defense Command and was subsequently Division Engineer of the Panama Engineer Division. Colonel Mayo has been District Engineer of the San Francisco District since last October.

#

Last Rites For 'Jack' Leonard

John J. "Jack" Leonard, 48, international representative of the International Hodcarriers and Laborers Union for more than three years, died Thursday, following several weeks' illness.

Active in all labor work in San Francisco, Leonard had previously served as business representative for Laborers' Union 261 for ten years and was one time delegate to the Labor Council. A veteran of World Wars I and II, he is survived by his widow, Stella, and sister, Madeline.

Funeral services will be held Saturday morning, February 23, at 10 A. M., at Duggan's, 3434 17th Street.

BIDS WANTED

CENTRAL VALLEY PROJECT.— Until March 15, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, Chief Engineer, Friant, Calf., under Spec. 1178 for construction of Friant-Kern Canal stilling basin, Cottonwood Creek Bridge, Friant Dam landscape area improvements, Friant Division, Central Valley Project. Work is located about 1.5 miles northeast of Friant.

Work involves:
(1) 400 c.y. common excavation for structures;
(2) 2,600 c.y. rock do;
(3) 190 c.y. excavation, concrete;
(4) 2,200 c.y. all classes excav. for pipe trenches;
(5) 320 s.y. chipping and roughening concrete surfaces;
(6) 13,000 c.y. backfll;
(7) 13,000 c.y. compacting backfill;
(8) 800 c.y. embankment;
(9) 400 c.y. riprap;
(10) constructing 860 l.f. 12-in. diam. split-sewer pipe drains with cemented joints;
(11) constructing 900 l.f. 12-inch do with uncemented joints;
(12) constructing 80 l.f. 24-in. diam. sewer-pipe drains with cemented joints;
(13) drilling 1,600 l.f. holes for anchor bars and grouting bars in place
(14) 130 c.y. concrete in outlet valve structure;
(15) 3,000 c.y. concrete in floor and wall footings of stilling basin;
(16) 2,100 c.y. concrete in walls of stilling basin;
(17) 180 c.y. concrete in bridge struc.
(18) 20 c.y. concrete in septic tanks;
(19) 90 c.y. concrete in water tanks;
(20) 260 c.y. concrete in rest-houses;
(21) constructing three rest houses, except concrete;
(22) 54,000 s.f. vacuum concrete process for floor and inside surfaces of walls of stilling basin and transition;
(23) placing 580,000 lbs. reinf. bars;
(24) 1,000 s.y. grouted paving gutters
(25) 90 l.f. gravel backfilled gutters
(26) installing 5,000 lbs. misc. metalwork;
(27) constructing 3 M ft. b.m. timber railings;
(28) placing 250 s.f. elastic joint filler
(29) placing 1,850 l.f. rubber water stop;
(30) installing 4,500 lbs. of standard metal pipe, fittings and valves;
(31) laying 150,000 lbs. cast iron pipe
(32) 5 c.y. rubble masonry;
(33) laying 100 l.f. clay sewer pipe with poured joints;
(34) laying 2,400 l.f. drain tile embedded in gravel;
(35) placing 350 c.y. of water-bound macadam base course;
(36) 180 c.y. crushed rock for wearing course, in place;
(37) furnish, haul and spread 5,000 gals. road oil;
(38) mix, compact and finish 2,100 s.y. oil-treated wearing course;
(39) installing 1,100 lbs. pumps;
(40) installing 150 l.f. embedded electrical conduits;
(41) installing 5,000 l.f. of armored parkway cable.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; R. L. Boke, Regional Director, Old Post Office Building, 7th and K Streets, Sacramento 14; R. K. Durant, Acting Construction Engineer, Friant, Cal., and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Acting Construction Engineer.

No charge to prospective bidders for specifications; to others, $2.50, not returnable.

Fire Underwriters

(Continued from Page One)

levels.

"Few classes of fire insurance within the confines of a single state present sufficient volume and sucffiient spread of risk to accomplish one of the main purposes for which the new classification system is intended, i.e., to provide one of several factors which must be considered in attempting to foretell the future from a fire insurance less ratio standpoint. Consequently the new classification system, it is hoped, may be fully employed the country over to the end that, particularly in the case of the narrower classes, nationwide experience may be available."

The plan divides premises primarily into four large overall classes: by perils; by kind of occupancy, in which there are 100 classes; by fire protection, i.e., protected or unprotected; and construction, i.e., fire resistive, brick, or frame.

In the overall occupancy classification which includes all kinds of premises, are five classes of habitational risks; four mercantile; 20 non-manufacturing; 65 manufacturing; and five sprinklered classes. The classes under manufacturing risks are patterned after the divisions in the United States Department of Commerce Index of Business and Industry.

New Construction

(Continued from Page One)

ber to $17,000,000 in January. Highway construction amounting to $25,000,000 in January reflected seasonal influences in a 14 per cent drop from the previous month. There were small increases in January in hospital, institutional, educational, and sewer and water construction, and in expenditures for conservation and development projects.

A detailed breakdown of new construction activity in January 1946, with comparable figures for December 1945 and January 1945, is attached.

NEW CONSTRUCTION ACTIVITY, CONTINENTAL UNITED STATES

PLANS and Speculations

Davis: G. Partridge, engineer and technical adviser for the Federal Public Housing Authority, has completed an inspection of the Cecil J. Pedroia property and has announced it satisfactory as a site for a local housing project. He said the houses probably will be one-story dormitories converted into four family units.

oOo

Dixon: The Chamber of Commerce, after having completed four months of study and survey of the need of a hospital in Dixon, is on record as favoring a bond issue to build a district hospital.

oOo

Colusa: The City of Colusa will match a $20,000 appropriation to be received under the $90,000,000 city-county bill, spending some $40,000 on her streets, improvement of drainage and sewer facilities. Mayor A. B. Davison said in all probability Colusa will be ready to start her street and drainage improvement program in 90 days.

oOo

San Leandro: State approval to a request for $683 to aid the city in financing plans and "specs" for the Davis Street sewer line has been granted. Plans are being prepared by City Engineer C. P. Martin.

oOo

Gridley: The City of Gridley will use her share of the $90,000,000 state appropriation to cities and counties for financing a sewer project estimated to cost $65,000. The city's share of the state fund has been estimated at $20,955.

—#—

San Mateo County: Voters of San Mateo County will be asked, in all probability, to vote on a $2,000,000 bond issue for proposed enlargement of the county courthouse and other postwar projects. Exactly how much the bond issue will be, provided the supervisors vote to place the matter on the ballot, will be determined after it is learned how much money can be seucred from state funds.

oOo

Willows: Campaign for the construction of a municipal swimming pool and a Youth Center building for the city of Willows swung into high gear this week when estimates of the actual costs of the project were placed before the Coordinating Council by the Committeemen who have been studying the program for the past weeks. The pool will cost approximately $20,000 and the Youth Center building $15,000.

Producers' Council Sees Housing Program Success If Properly Administered

President Truman's new wage-price policy should speed up home building greatly if the policy is administered in accordance with the President's stated recommendations, Douglas Whitlock, chairman of the Advisory Board of the Producers' Council, national organization of building product manufacturers, stated today.

"Inability to obtain prompt readjustment of OPA price ceilings which are retarding the production of building materials and equipment has been the greatest deterrent to the construction of homes for veterans," Whitlock said.

"This bottleneck now can be broken promptly under the new national price policy. The government also will need to take other steps if all-out home building is to be achieved, but adjustment of building product prices is a vital first step.

"The shift from a war-time hold-the-line policy is a constructive policy of stimulating production is welcome news to those who have been trying to eliminate the veterans' housing shortage.

"President Truman said in his wage-price statement that 'production is our salvation'. Greater production of building materials will be the salvation of the home building program. Meeting Wyatt's goal of 2,700,000 new homes is a tremendous task, and getting maximum production of building materials is the backbone of the effort.

"Each week of delay in putting the new policy of emphasizing production into effect will take thousands of home from the potential supply. Prompt action is imperative."

Visalia: Consideration of approximately 25 acres of land bordered by Watson, Tulare and Conyer Avenues west of the Jefferson school as a site for a new courthouse was given last week by the county board of supervisors when the subject of a new courthouse was revived for discussion.

oOo

Dr. Leonard Loeb To Address ASME Meeting Feb. 28th

"Nuclear Structure and Atomic Energy", will be the subject of an illustrated lecture by Dr. Leanard Loeb,. Professor of Physics, University of California, before the regular February dinner meeting of the American Society of Mechanical Engineers at the Engineers' Club, 206 Sansome Street.

Dr. Loeb is the author of numerous books in the field of Physics, among which are the "Kinetic Theory of Gases", "Fundamentals of Electricity and Magnetism", and "Atomic Structure."

Members are requested to make their reservations for the February 28th meeting immediately. Dinner will be served promptly at 6:30 P. M., the meeting to take place at 8:00 P. M.

BAYWOOD HIGHLANDS PLANS BEING COMPLETED

Plans and specifications are being completed for roads, sewers and water system for Baywood Highlands. This work will be contracted by the town of Hillsborough at an estimated cost of $102,000 under the Improvement Act of 1911. Chas. T. Broughton is the engineer.

Baywood Highlands is a new subdivision of 10 acres in San Mateo and 55 acres in Hillsborough. Maps and restrictions were recorded during January and sites will be offered for sale to the public upon completion of improvements.

Frank Ashby, co-owner of the National Steel Fabricators, 70 Chesley St., San Francisco, is the owner.

Portability Feature Of Two-Stage Dust Collector

Exceptional portability for a completely self-contained dust collector, which requires no installation other than the mere placing of the unit in position on the bench and plugging into the lighting circuit, is a feature of the newest addition to its line of industrial dust collectors by Aget-Detroit Co., 602 First National Bldg., Ann Arbor, Michigan.

In addition to the customary motor-driven fan, cyclone separator and filter, this model (designated Model 421) incorporates a grinding wheel hood which is built as an integral part of the unit.

Though designed primarily for bench-type dry grinding of a precision nature, the dust collector has, due to its design, a wider range of uses. Buffing, polishing, and similar work which produces great amounts of long string material, lint, bristles, etc., can be easily handled, it is claimed, because the unit is equipped with a self-clearing paddle wheel fan. A removable pan in the grinding wheel hood allows sludge from wet grinding operations to be emptied separately, thus keeping it out of the collector. A baffle plate in the hood prevents small work from being drawn by the air suction into the fan and at the same time spreads the effective area of the suction.

Where the Model 421 Dustkop is to be moved about, it is available with 110 volt motor so that the electrical connection is made merely by plugging into the lighting circuit. However, the unit is available for operation on other voltages when required and where the installation is to be of a permanent nature.

Two stages of air cleaning are incorporated in the Model 421: the first stage, claimed to remove all of the heavier dust and dirt as well as lint, bristles, etc., is by means of the cyclone separator. The second stage is the fire-safe spun glass filter which gives the air a final cleaning to remove the finer particles of dust before the air is returned to the room.

Reclaiming precious metal dust is simply a matter of removing the collected dust from the unit and by smelting the finer particles out of the spun glass filter material. Filter material is easily replaceable, and is available at low cost, it is said. Maintenance is chiefly a matter of turning the hand crank which shakes the finer particles out of the filter material when the latter loads up after extensive use.

Home Insulation Booklet Available To Industry

"Insulation and Your Home", an informative handbook on an interesting subject, published by the National Mineral Wool Association, 1270 Sixth Ave., New York 20, N. Y., is now off the press.

This booklet is designed to give both the home-owner and members of the building trades a practical understanding of mineral wool insulation, its uses, its forms, its methods of installation, its heat and fire-resistant properties, its endurance, its advantages, and other points of importance.

As a handbook, it provides yardsticks developed by noted consulting engineers to determine relative comfort and economy rating, and savings in fuel costs achieved by various thicknesses of insulation. It describes the characteristics and features of mineral wool, and where and how to use it for insulation, whether in batt, wool, or granulated form.

Through illustrated charts prepared by experts, the booklet shows how home insulation gives you winter comfort and economy, and also at no extra cost, an additional and valuable dividend in relief from summer discomforts.

"Insulation and Your Home" is available without charge to engineers, architects, draftsmen, builders and contractors, who request it on their business letterheads addressed to the New York office of the National Mineral Wool Association. The public may secure the booklet by sending 25 cents to the Association.

A. H. Poole To Address Cost Accountants

A. H. Poole, vice president, treasurer, and a director of American President Lines, will address the San Francisco Chapter, National Association of Cost Accountants, at its current dinner and technical session at the Engineers' Club this evening.

His subject, "Steamship Accounting", will be something new to the cost accountants, who ordinarily follow manufacturing fields.

Poole was an executive of the Pathe Film Corporation and practiced seven years as a C.P.A. before his association with American President Lines. He has also been a consulting professor at Stanford University Graduate School of Business since 1939.

GROOVER AND I

THE IVORY TOWER

Emerson is generally credited with the line: "If a man write a better book, preach a better sermon or build a better mousetrap than his neighbor, the world will make a beaten path to his door".

★ ★ ★

As it seems to work out, as soon as a man becomes the world's best mousetrap builder, he then wants to stop building traps and write a newspaper column. This racket is becoming crowded with "name" writers from the "carriage trade".

★ ★ ★

I don't know what Columnist Roosevelt is paid for her daily jottings. Last figure I saw quoted was $16,000 per year. That was in 1939.

★ ★ ★

The newest addition to the Fourth Estate is Ol' Man Spontaneous Combustion: Harold L. Ickes. Ickes now proposes to write a newspaper column. He hasn't had to worry about paying the rent since he married his first wife, a wealthy divorcee.

★ ★ ★

But how did a man who prides himself on being a perpetual motion grouch manage to snare to the altar so young, gracious and charming a woman as the present Mrs. Ickes?

★ ★ ★

Perhaps the high point in "name" writers came with the recent appearance of tobacco heiress Doris Duke as a columnist. I don't suppose Doris could guess within eleven million dollars the present size of her fortune. However, it would mean merely the flip of her purse to buy the St. Francis Hotel as a way-station between her home in Hawaii and her tobacco plantations in the Carolinas.

★ ★ ★

There is a pay-off. Even though her financially impressive name heads her column, someone among the sweating elves receives needed wages for "ghosting" her copy.

New Bid Call Indicates Bureau Speed-Up Program

The speed-up of the U. S. Bureau of Reclamation's postwar program for construction of the Central Valley Project is again indicated in the calling for bids on a further 8.5-mile section of the Friant-Kern Canal, less than one month since the Government agency advertised for bids on a 15-mile section of the important waterway.

The newly-announced contract will carry the Friant-Kern Canal to the Kings River, a total distance of 30 miles from Friant Dam. Sealed bids are to be submitted to the Friant office of the Reclamation Bureau, and will be publicly opened at 10 A. M. on March 5.

Additional bids to be advertised this spring will carry the canal to the Kaweah River, more than 70 miles from its source near Fresno.

Although a completed canal is a gracefully simple ribbon of concrete and water, the actual complexity of canal construction is indicated in the specifications announced by the Reclamation Bureau for the new 8.5-mile section of Friant-Kern waterway. Among the "principal items of work" included in the advertisement are excavation, compacting embankments, preparing and trimming earth and rock foundations for concrete lining, dry-rock pacing, placing of rubber water-stops, erecting of timbers, installing of metal-work, constructing 24 cattle guards and 18 miles of wire right-of-way fence, laying of iron and steel pipe, installation of 145 orchard outlets and stand pipes, constructing underdrains and feeder drains, and, of course, the placement of reinforcement bars and concrete lining.

The Government is to furnish construction materials. Copies of standard forms and specifications may be obtained from the Reclamation Bureau offices at Sacramento, Friant, Denver, and Washington.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; R. J. Newell, construction engineer, P. O. Box 937, Reclamation Bldg., Fairgrounds, Boise, Idaho, and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer. Guarantee in the amount of 10% of bid required.

The work involves:

(1) diversion and care of river during construction and unwatering foundations;
(2) 20,000 cu. yds. excavation, stripping borrow pits;
(3) 7500 cu. yds. excavation, common, in open cut for outlet works;
(4) 19,000 cu. yds. excavation, rock, in open cut for outlet works;
(5) 2300 cu. yds. excavation, all classes, in tunnel;
(6) furnishing and placing 8000 lbs. permanent steel tunnel supports;
(7) furnishing and placing 8000 lbs. steel tunnel liner plates and steel lagging;
(8) 50,000 cu. yds. excavation, all classes, for foundation of dam;
(9) 400 cu. yds. excavation, rock, for footing of concrete cutoff wall;
(10) 24,000 cu. yds. excavation, common, for spillway;
(11) 33,000 cu. yds. excavation, rock, in spillway;
(12) drilling 16,700 lin. ft. of line holes for rock excavation for spillway;
(13) 315,000 cu. yds. excavation, common, in borrow pits and transportation to dam embankment;
(14) 200 cu. yds. backfill;
(15) 320,000 cu. yds. earth fill in embankments;
(16) tamping or puddling 3500 cu. yds. earth fill;
(17) 55,000 cu. yds. rock fill on downstream slope of embankment;
(18) 11,000 cu. yds. ripray on upstream slope of embankment;
(19) 60 cu. yds. porous concrete under floor of spillway gate structure;
(20) constructing 1000 lin. ft. 4-in. diameter sewer pipe drains with uncemented joints, embedded in porous concrete;
(21) constructing 325 lin. ft. 4-in. diameter sewer pipe drains with uncemented joints, embedded in gravel;
(22) constructing 750 lin. ft. 6-in. diameter sewer pipe drains with uncemented joints, embedded in gravel;
(23) drilling 1700 lin. ft. 1⅜-in. diameter grout holes up to 35-ft. stage;
(24) drilling 2000 lin. ft. 1⅜-in. diameter grout holes between 35-ft. and 60-ft. stage;
(25) drilling 1100 lin. ft. 1⅜-in. diameter grout holes between 60-ft. and 100-ft. stage;
(26) drilling 1000 lin. ft. grout holes less than 35 ft. deep with percussion drills;
(27) placing 2600 lbs. grout pipe and fittings;
(28) 7100 cu. ft. pressure grouting;
(29) 800 cu. ft. pressure grouting with packers;
(30) drilling 4400 lin. ft. holes for anchor bars and grouting bars in place;
(31) 400 cu. yds. concrete in footing of embankment cutoff wall;
(32) 350 cu. yds. concrete in embankment cutoff wall, except in footing;
(33) 750 cu. yds. concrete in tunnel lining except back of plate steel pipe lining;
(34) 150 cu. yds. concrete in tunnel lining back of plate steel pipe lining;
(35) 850 cu. yds. concrete in inlet structures of outlet works, except in beams, columns and roof slab of trashrack structure and in floor of access bridge;
(36) 110 cu. yds. concrete in beams, columns and roof slab of trashrack structure and in floor of access bridge;
(37) 535 cu. yds. concrete in outlet to outlet works except in control house;
(38) 90 cu. yds. concrete in control and engine houses;
(39) 680 cu. yds. concrete in floor of spillway;
(40) 1220 cu. yds. concrete in spillway except in floor and engine house;
(41) 27,000 sq. ft. vacuum concrete processing for spillway floor, pier and inside surface of spillway walls:
(42) placing 606,000 lbs. reinforcement bars;
(43) placing 320 lin. ft. metal sealing strips;
(44) constructing control and engine houses, except concrete;
(45) erecting 10 M ft. b.m. of timber in bridge;
(46) placing 650 sq. ft. asphalt plank on bridge floor;
(47) installing 22,500 lbs. fixed-wheel gate frame, seats, track bases and track;
(48) installing 35,000 lbs. fixed-wheel gate;
(49) installing 60,000 lbs. radial gates;
(50) installing 21,000 lbs. gate hoists;
(51) installing 110,000 lbs. high-pressure gates and conduit-lining castings;
(52) installing 7000 lbs. control apparatus for high-pressure gates;
(53) erecting 18,500 lbs. hoist tower for fixed-wheel gate;
(54) erectign 20,500 lbs. structural steel in bridges;
(55) installing 48,000 lbs. trashracks;
(56) installing 115,000 lbs. welded plate steel tunnel and conduit linings;
(57) installing 5000 lbs. float-well intake, reservoir level gauge and air-vent piping;
(58) installing 4400 lbs. pipe handrails;
(59) installing 3000 lbs. miscellaneous metal work;
(60) installing 500 lin. ft. electrical metal conduit, 1¼-in. diameter and smaller;
(61) installing 450 lin. ft. electrical metal conduit, 1½-in. diameter to and including 2-in. diameter;
(62) installing 1000 lbs. electrical conductors nad ground wires;
(63) installing 2500 lbs. electrical apparatus.

BIDS WANTED

MERCED COUNTY, Calif. — Until March 27, 2 P. M., bids will be received by the State Division of Highways, G. T. McCoy, state highway engineer, Public Works Bldg., Sacramento, for about 3.8 miles grading and paving with portland cement concrete and constructing four bridges between Black Rascal Canal and Buhach Station, Merced County.

The work involves:

(1) 810 cu. yds. remove concrete;
(2) 200 sta. clearing and grubbing;
(3) 15,500 cu. yds. roadway excavation;
(4) 2550 cu. yds. structural excavation;
(5) 8200 cu. yds. ditch and channel excavation;
(6) 50,000 sq. yds. compact original ground;
(7) 112,000 cu. yds. imported borrow, type A;
(8) 20,000 cu. yds. imported borrow, type B;
(9) 46,000 sq. yds. subgrade treatment;
(10) develop water supply and furnish water equipment;
(11) 7700 M gallons apply water;
(12) 200 sta. finish roadway;
(13) 8300 tons crusher run base;
(14) 68 tons liquid asphalt SC-2 prime coat and penetration treatment;
(15) 90 cu yds. sand prime coat;
(16) 50 tons asphaltic emulsion paint binder, armor coat and seal coat;
(17) 625 tons screenings armor coat and seal coat;
(18) 2400 tons minimum aggregate plant mix surfacing;
(19) 120 tons paving asphalt plant mix surfacing;
(20) 250 lin. ft. raised bars;
(21) 10,400 cu. yds. portland cement concrete pavement;
(22) 7500 each tie bolt assemblies;
(23) 1980 cu. yds. class A portland cement concrete structures;
(24) 7770 lin. ft. furnish concrete piles
(25) 210 each drive piles;
(26) 175 cu. yds. broken concrete riprap;
(27) 7 cu. yds. portland cement concrete curbs;
(28) 25 each monuments;
(29) 1530 lin. ft timber bridge railing;
(30) 225 lin. ft. timber headwall railing;
(31) 300 lin. ft. move and reconstruct existing guard railing;
(32) 20 each culvert markers and guide posts;
(33) 1.4 miles new property fence, type A;
(34) 0.1 mile new property fence, type B;
(35) 6 each drive gates;
(36) 40 lin. ft. 30-in. reinforced concrete pipe, standard strength;
(37) 108 lin. ft. 36-in. reinforced concrete pipe, standard strength;
(38) 322 lin. ft. 12-in. CMP, 16-gage;
(39) 1070 lin. ft. 18-in. CMP, 16-gage;
(40) 40 lin. ft. 24-in. CMP, 14-gage;
(41) 104 lin. ft. 24-in. CMP siphon, 14-gage;
(42) 5 each field joints for siphons;
(43) 7 each drainage gates;
(44) 448 lin. ft. salvage existing pipe culverts;
(45) 138 lin. ft relay salvage CMP culverts;
(46) 380,000 lbs. furnish bar reinforcing steel;
(47) 380,000 lbs. place bar reinforcing steel;
(48) miscellaneous items of work.

Specifications obtainable from the above office.

BIDS WANTED

SAN BERNARDINO CO., Calif.—Until March 28, 2 P. M., bids will be received by the State Division of Highways, G. T. McCoy, State Highway Engineer, State Bldg., Los Angeles, for about 3.2 miles grading and surfacing with plant mix surfacing between Highland Ave. and City Creek Bridge and construct a bridge across City Creek, in San Bernardino County.

Work involves:

(1) 350 c.y. remove concrete;
(2) 42 acres clear and grubb;
(3) 486,000 c.y. rdwy. excav.;
(4) 5,000 c.y. ditch and channel excavation;
(5) 16,500 c.y. struc. excav.;
(6) 7,170,000 sta. yds. overhaul;
(7) 40 tons straw slope erosion protection;
(8) 4,000 lbs. seed slope erosion protection;
(9) 4,600 c.y. rock slope protection;
(10) develop water supply and furnish water equipment;
(11) 13,500 M. gals. apply water;
(12) 171 sta. finish rdwy.;
(13) 99,000 l.f. brush mats, erosion protection;
(14) 28,000 l.f. wire brush mats do;
(15) 500 tons pave. asph., plant mix surfacing;
(16) 10,000 tons min. agg., plant mix surfacing;
(17) 140 l.f. raised bars, plant mix surfacing;
(18) 35 tons asph. emulsion, seal coat
(19) 500 tons screenings, seal coat;
(20) 2,065 c.y. Class A portland cement conc. structures;
(21) 213 c.y. Class A portland cement conc., arch ribs;
(22) 842 l.f. concrete railing;
(23) 4,500 lbs. misc. iron and steel;
(24) 226 c.y. Class A portland cement conc., curbs and gutters;
(25) 113 each monuments;
(26) 5,120 l.f. metal plate guard railing;
(27) 130 each guide posts;
(28) 120 each culvert markers;
(29) 0.9 mile new fences;
(30) 80 l.f. 30-in. reinf. concrete pipe, extra strength;
(31) 460 l.f. 36-inch do;
(32) 106 l.f. 48-inch do;
(33) 810 l.f. 12-in. CMP, 16 gage;
(34) 460 l.f. 18-in. CMP 16 gage;
(35) 1,670 l.f. 24-in. CMP 14 gage;
(36) 480 l.f. 24-in. CMP, 12 gage;
(37) 204 l.f. 30-in. CMP 10 gage;
(38) 110 l.f. 36-in. CMP, 12 gage;
(39) 136 l.f. 36-in. CMP, 10 gage;
(40) 146 l.f. 42-in. CMP 12 gage;
(41) 120 l.f. 42-in. CMP 10 gage;
(42) 226 l.f. 42-in. CMP, 8 gage;
(43) 142 l.f. 48-in. CMP, 10 gage;
(44) 244 l.f. 48-in. CMP, 8 gage;
(45) 76 l.f. 54-in. CMP, 12 gage;
(46) 100 l.f. 54-in. CMP, 10 gage;
(47) 222 l.f. 60-in. CMP, 10 gage;
(48) 920 l.f. 8-in. CMP 16 gage down drains;
(49) 108 l.f. 36-in. part circle reinf. concrete slope drains, standard strength;
(50) 108 l.f. 42-in. do;
(51) 402,500 lbs. furnish bar reinf. steel;
(52) 402,500 lbs. place do;
(53) misc. items of work.

Alternate Cribbing Items

Alt. A—Reinf. Concrete Cribbing

(54) 410 each 8x5-in. x 6-ft. reinf. conc. headers;
(55) 2,900 each 10x5-in. x 6-ft. do;
(56) 1,600 each 6x6-in. x 6-ft. reinf. conc. stretchers;
(57) 1,500 each 8x6-in. x 6-ft. do;
(58) 2,100 each 10x6-in. x 6 ft. do;
(59) 400 each 10x6x10-in. conc. filler blockers;

Alt. B—Metal Cribbing

(60) 774 each 16-in. x 9.5-ft. metal stringers, 16 gage;
(61) 368 each 16-in. x 9.5-ft. do, 14 gage;
(62) 382 each 16-in. x 9.5-ft. do, 12 gage;
(63) 74 each 16-in. x 9.5-ft. do, 10 gage;
(64) 28 each 19½ x 5.2-foot metal spacers, 16 gage;
(65) 128 each 19½ x 7.4-foot metal spacers, 16 gage;
(66) 93 each 19½ x 9.6-foot metal spacers, 14 gage;
(67) 269 each 19½ x 11.8-foot metal spacers, 12 gage;
(68) 291 each 19½ x 14.0-foot metal spacers, 12 gage;
(69) 8 each 15¼-in. x 5.2-ft. metal bottom spacers, 16 gage;
(70) 15 each 15¼-in. x 7.4-ft. do;
(71) 10 each 15¼-in. x 9.6-ft. metal bottom spacers, 14 gage;
(72) 16 each 15¼-in. x 11.8-ft. metal bottom spacers, 12 gage;
(73) 15 each 15¼-in. x 41.0-ft. do;
(74) 58 each 3⅝-in. x 9.5-ft. metal stringer stiffeners, 8 gage;
(75) 2,540 l.f. 8¾-in. metal columns, 8 gage;
(76) 380 l.f. 8¾-in. split metal columns, 8 gage;
(77) 64 each 6⅛-in. x 8 9-16-in. metal column caps, 12 gage;
(78) 194 each 8 9-16-in. x 9½-in. metal column splicers, 14 gage;
(79) 128 each 16x16-in. base plates, 1 gage;
(80) 112 each 20x20-in. do;
(81) 66 each 24x24-in. do.

Note: A bidder is required to submit a bid on one alternative, and may, but is not required, to submit bids on all the alternatives.

The cnotract will be awarded unless all bids are rejected, to the lowest responsible bidder for the work as a whole, irrespective of the alternative on which bid is based.

Specifications obtainable from the office of the State Highway Engineer, Public Works Bldg., Sacramento.

GET READY FOR THE APPLIANCES YOU WANT!

WIRE AHEAD
for Better Living
ADEQUATE WIRING
Certified

You know what you want in the way of new appliances for your home and you are going to have them! An electric washer that does all the work of getting clothes white in a jiffy... a big new refrigerator or one of the marvelous Home Freezers for storing frozen foods... an ironer and an electric dishwasher that washes and dries dishes, silverware, glasses. All these probably will be your proud possessions in the near future. Right now, if you are planning to build a new home or remodel your present one, is the time to make sure your plans include fully adequate wiring to serve these new home servants with full power for lowest operating cost. Adequate wiring consists of these essentials: Plenty of outlets, plenty of light switches and wires large enough to handle your electrical equipment for years to come.

2/26/46 • 42
BIDS WANTED

SAN FRANCISCO—Until March 6, 2 P. M., bids will be received by the U. S. Treasury Department, 821 Market St., San Francisco, for materials as follows:

Inv. SF-2826-46, aluminum kitchenware, f.o.b. San Francisco.

Inv. SF-2827-46, kitchenware, f.o.b. San Francisco.

BIDS WANTED

SAN FRANCISCO—Until March 12, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Custom House, Denver 2, Colo., under Inv. 18,676-A for furnishing Southern yellow pine ,Western red cedar, lodgepole pine or Douglas fir poles, f.o.b. shipping point and/or Glendive and/or points between Glendive and Miles City, Mont.

Specifications obtainable from the above office.

2/26/46 • 42
BIDS WANTED

SAN FRANCISCO—Until March 11, 2 P. M. bids will be received by the U. S. Forest Service, 447 Sansome St., San Francisco 11, under Inv. 371 for sale of used unserviceable automotive parts and assemblies located at Stockton.

2/26/46 6 42
BIDS WANTED

SAN FRANCISCO—Until March 8, 3 P. M., bids will be received by the Purchaser of Supplies, City Hall, under Bid No. 3497 for furnishing and delivering 3500 trolley ears and 350 splicing ears for the Municipal Railway.

Specifications obtainable from the above office.

2/26/46 • 42
CONTRACT AWARDED

PARADISE, Butte Co., Calif.—California Corrugated Culvert Co., 7th and Parker, Berkeley, at $28,084.31, submitted low bid and awarded contract by the board of directors at the office of the Paradise Irrigation District, Paradise, for spiral welded pipe, fabricated, tested, dipped and wrapped in 40-ft. lengths, ends belled for field welding, asphalt dipped and wrapped with 23½-lb. asbestos pipeline felt.

Western Pipe & Steel Co., San Francisco, at $29,360.70, submitted only other bid.

2/26/46 • 42
BIDS WANTED

PORTLAND, Ore.—Until March 7, 12 Noon, bids will be received by the Spokane, Portland & Seattle Railway Co., G. R. Williams, purchasing agent, 1133 American Bank Bldg., Portland, for furnishing 50,000 crossties.

2/26/46 • 42
BIDS WANTED

PARKER DAM PROJECT, Ariz.-Calif—Until March 20, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1207 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Earp, Calif., the hollow metal doors, complete with transoms, rough bucks, thresholds as required in door schedule; cabinet jambs, trim, hardware, including door closers, calking material and all other accessories necessary for the complete installation of the doors in the Parker power plant, Parker Dam Power Project, Arizona-California. The doors will be installed by the government. No charge for copies of the specifications to prospective bonda fide bidders; to others, $0.75, not returnable. For particulars, address the Bureau of Reclamation, Denver, Colo.

2/26/46 • 42
BIDS OPENED

SACRAMENTO, Calif.—The following submitted bids to the state purchasing agent, Sacramento, under Quo. 36172, Req. 76208, for materials as follows:

John J. Swigert, $2.68 on each item; awarded.

Sully-Miller Contracting Co., $2.75 on each item; net.

Pacific Rock & Gravel Co., $3.15 on each item; discount 2 per cent 20th.

2/26/46 • 42
BID OPENED

SAN FRANCISCO.—U. S. Pipe & Foundry Co., Monadnock Bldg., San Francisco, at (1) $109 per ton, (2) $86.25 per ton, delivery 130 days, submitted only bid to the purchaser of supplies, City Hall, for cast iron pipe.

2/26/46 • 42
BIDS OPENED

SAN FRANCISCO.—The following submitted bids to the purchaser of supplies, 270 City Hall, under Bid No. 3472 for wood patterns:

C. J. Hooper Pattern Works, (1) $315, (2) $330, (3) $387.50, (4) $225, (5) $215, (6) $378.50, (7) $121.50, (8) $122.50, (9) $76.50, (10) $110, (11) $215, (12) $215, (13) $75, (14) $185; delivery 30 to 90 days.

United Pattern Works, (1) $300, (2) $335, (3) $375, (4) $180, (5) $250, (6) $375, (7) $110, (8) $110, (9) $95, (10) $100, (11) $225, (12) $225, (13) $85, (14) $175; 90 days' delivery.

Yuba Manufacturing Co., (1) $518, (2) $591, (3) $664, (4) $791, (5) $547, (6) $619, (7) $298, (8) $243, (9) $155, (10) $488, (11) $495, (12) $525, (13) $168, (14) $254; 75 days' delivery.

Sparrowes Pattern Shop, (4) $198, (5) $390, (7) $230, (8) $220, (9) $105, (13) $95, (14) $170; 62 days' delivery.

2/26/46 • 42
BIDS OPENED

SAN FRANCISCO.—The following submitted bids to M. H. Gerry, purchaser of supplies, Room 270 City Hall, San Francisco, under Bid No. 3469 for furnishing and delivering to the San Francisco Water Department warehouse at Millbrae, Calif., 3-in., 6-in., 8-in., 24-in., 30-in. and 48-in. flanged gate valves.

Crane Co., (a) $8925.52, (b) $9210.54, (ab) $18,136.06, plus sales tax; 2% 10th prox.; 140 days' delivery.

Chapman Valve Manufacturing Co., (a) $9529.75, (b) $12,259, (ab) $21,788.75, plus sales tax; 2% 10 days; 120 days' delivery.

2/26/46 • 42
BIDS OPENED

SAN FRANCISCO.—Western Pipe & Steel Co., 200 Bush St., San Francisco, at $477.56, submitted low bid to the U. S. Indian Irrigation Service, 647 Phelan Bldg., San Francisco, under Inv. 7-46 for corrugated galvanized iron pipe, connecting bands and metal slide gates, f.o.b. Elko, Nev., as follows:

(1) 4 each 24-in. metal slide headgates, 5-ft. frame with 16-ft. of corrugated glavanized iron pipe attached, 16-gauge;
(2) 4 each 24-in. corrugated galvanized iron pipe, 16-gauge, 20-ft. lengths;
(3) 4 each connecting bands for the above pipe;
(4) 2 each 18-in. metal slide headgates, 4-ft. frame with 12-ft. of corrugated galvanized iron pipe, 16-gauge, attached.

Complete bids follow:

Western Pipe & Steel Co., (1) $62.45, (2) $34.80, (3) $2, (4) $40.28; total, $477.56.

Amco Drainage & Metal Products Co., (1) $67.78, (2) $42.20, (3) $2.02, (4) $44.49; total, $536.98.

BIDS WANTED

BOULDER CANYON PROJECT. Arizona - California - Nevada — Until March 27, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1208 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Boulder City, Nev., two 24-inch jet pumps for unwatering sumps at the Boulder Power Plant, Boulder Canyon Project, Arizona-California-Nevada. The material will be installed by the government. No charge for copies of the specifications to prospective bona fide bidders; to others, $0.75, not returnable. For particulars, address the Bureau of Reclamation, Denver, Colo.

2/26-46 • 43
BIDS WANTED

PORTLAND, Ore.—Until March 4, 1:30 P. M., bids will be received by the Bonneville Power Administration, 1300 NE Union Ave., Portland 2, under Inv. 3601 for furnishing six oil storage tanks, 10,000-gallon capacity, above ground, fob Snohomish, Wash., and/or shipping point.

Specifications obtainable from the above office.

2/26/46 • 43
COMPLETE BIDS

CENTRAL VALLEY PROJECT, California.—The following submitted bids to the chief engineer, Bureau of Reclamation, Denver, Colo., under Spec. No. 1150 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Coram, Calif., at the option of the bidder, three motor-operated valve-drive mechanisms and accessories for operating three 57-inch butterfly valves now installed in the spillway section of the Shasta Dam, Kennett Division, Central Valley Project, California:

Pacific Coast Engineering Co., f.o.b. Alameda, $8400 (15,000 lbs.).

Monarch Forge & Machine Works, f.o.b. Portland, $8435 (18,000 lbs.).

Joshua Hendy Iron Works, f.o.b. San Francisco, $8657 (15,000 lbs.).

Harding Manufacturing Co., f.o.b. York, Pa., $10,960 (1600 lbs.).

Willamette Iron & Steel, f.o.b. Portland, $11,288 (18,400 lbs.).

Western Gear Works, f.o.b. Seattle, $11,475 (14,100 lbs.).

Consolidated Steel, f.o.b. Los Angeles, $11,798 (14,800 lbs.).

United Engineering Co., f.o.b. San Francisco, $14,355.49 (9900 lbs.).

Official Proposal

Pro. No. 1714—Lead Covered Cable

NOTICE TO CONTRACTORS

Sealed proposals will be received in Room 205 of the office of the East Bay Municipal Utility District, 512—16th Street, Oakland, California, until 5:30 P. M., Wednesday, March 6, 1946, and will at that hour be opened for furnishing approximately 2,000 Lin. Ft. of LEAD COVERED CABLE, as per specifications.

Proposal No. 1714 covering same may be obtained upon application at Room 312, Purchasing Department, of the office of the District.

Fifty-sixth Year—Vol. 56—No. 40 SAN FRANCISCO, WEDNESDAY, FEBRUARY 27, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

Monterey: Plans for a $45,000 to $50,000 street improvement job which would provide a permanent concrete paving for the Alvarado Street extension, from Fishermen's wharf to the Presidio curve were discussed at last week's meeting of the city council. Permanent surfacing of the Scott Street extension and Washington Street north of Del Monte Avenue is also contemplated. Bids will be asked as soon as the rainy season ends.

oOo

Visalia: A resolution urging the 1946-47 appropriation for Friant-Kern canal construction be increased from the currently asked $5,000,000 to $12,500,000 to insure enough funds for completion of the project, was passed at a meeting in Visalia of the Tulare County Water Commission and Tulare County Board of Supervisors in joint session last week.

oOo

Kern County: All explorations necessary to determine the type and characteristics of a structure necessary to provide 550,000 acre feet of water storage at the Isabella dam site on the Kern river have been completed, but research is continuing to obtain precise information on engineering details, according to Col. Lester F. Rhodes, district engineer for the United States engineers office in Sacramento. Present crews are testing soils on the site to determine the best source for impervious fill materials. Remaining to be solved is the best way to handle the problem of the Boral canal that flows through the project area.

oOo

Reno, Nevada: Voters at Reno's school election will give their undivided attention March 2 to the important vote on the proposal to issue $1,500,000 in bonds for the purpose of building a new high school, a new grammar school, and other improvements in Reno.

oOo

Gridley: The city of Gridley will use its share of the $90,000,000 appropriation of state funds to cities and counties in the financing of a sewer project estimated to cost in the neighborhood of $65,000. The city's share of the state fund has been estimated at $20,955.

oOo

Columbia Basin Canal Bids To Be Opened March 12

Bids on the first construction work on the canal system of the Columbia Basin project will be opened at Coulee Dam on March 12, according to an invitation to bidders issued by Chief Engineer Walker Young of the Bureau of Reclamation.

The work will be done in the vicinity of Stratford and Adrian, Wash., and its major items will be approximately 1,700,000 cubic yards of earth excavation, 340,000 cubic yards of rock, 100,000 station cubic yards of overhaul, and 300,000 cubic yards of compacting embankments. Bids are to cover the furnishing of labor and material and the performing of all work for the construction of earth work on about 35,000 feet of main canal. Some material will be furnished by the government. Copies of the standard bid forms and of the specifications can be obtained by bidders from Supervising Engineer Frank A. Banks, at Coulee Dam, Wash.

The work is to be commenced within 30 calendar days after the successful bidder receives notice to proceed, and is to be completed within 750 calendar days after the receipt of such notice.

This marks the beginning of a construction program which will ultimately require, in the construction of the water-distributing system of the Columbia Basin Project, a greater number of man-hours than were expended on the construction of the Grand Coulee Dam. This construction program will, in time, bring water to 17,000 family-size farms in the million-acre semiarid area to be irrigated.

Three areas are to be irrigated initially One northeast of Moses Lake, one near Quincy, and a third near Pasco, to be served by local pumping until the main canal system is extended to that section.

Coyote Lake To Be Stocked With Bass

Another effort to provide a potential new sportsmen's area will begin early in April, when Coyote Lake, five miles from Gilroy, will be stocked with large-mouth bass, it was announced today by Mayor George Milias of Gilroy, who heads a special subcommittee of the California State Chamber of Commerce's Central Coast Council, at work on the project.

Stock for Coyote Lake planting will be taken by the State Division of Fish and Game from a lake in the Los Gatos Creek drainage basin owned by the California Water Service Company. The first planting will be sufficiently large to provide necessary brood stock, Mayor Milias stated.

Coyote Lake in southern Santa Clara copunty, is easily accessible to sportsmen. It covers 30,000 acres and is one of the principal storage reservoirs in the Santa Clara County Water Conservation District. Research has indicated the lake to be ideal for development of (large-mouth bass for sportsmen's fishing.

Editor's Note.—While the foregoing news has no connection with construction activities, the "Builder" has every reason to believe the local construction industry can boast that the best (?) fishermen on earth can be found within its ranks.

#

Newly Created Maritime Division To Handle Sales

The newly created Division of Terminals and Real Estate will handle all matters with respect to the disposal of surplus shipyards and marine industrial real property, the U. S. Maritime Commission announced. Howard Marsden has been appointed Director.

The Contract Settlement and Surplus Materials Division will continue to be responsible for inventory, records, and control of surplus ships' materials and the Director of Construction will remain responsible for the care and preservation of shipyards. The Shipyard Disposal Committee has been abolished.

Financial, Industrial Leaders Warn Against Investment In Unwarranted New Hotels

Financial and industry leaders warned the American Public against investments in unwarranted new hotels such as wiped out the savings of countless investors after the unbridled hotel building boom which followed World War I.

At that time, hotel occupancy closely paralleled the near-capacity levels of today. Hundreds of new hotels were constructed thruout the nation but within a relatively short time the encouraging aspects disappeared with the collapse of business volume, property values and security prices.

The warnings were sounded by J. E. Frawley, President, American Hotel Assn.; Arthur S. Kleeman, President, Colonial Trust Co., New York City; J. B. Herndon, Vice-President, Hilton Hotels of America, Inc.; and Frank L. Andrews, Chairman, Public Relations Committee, American Hotels Association.

Mr. Frawley, of Detroit, contended that many cities need properly planned and wisely financed hotels. He emphasized that present national hotel occupancy of 90 per cent is abnormal and not a valid barometer for the future. He said: "By the time the new hotels could be completed, the unprecedented volume of guests created by wartime conditions, such as military and government ravel, will have receded to the point where unwarranted new construction might easily lead to a recurrence of the financial catastrophe which followed World War I.

Industry Now Profitable, Says Frawley

Reporting that the county's five billion hotel industry in the war years operated at a fair profit for the first time since the '20's, Frawley emphasized that it took world conflict to bring the condition about. He added: "Without the full facts, snap judgment might decree that the hotel industry faces a bright future. It faced equally as rosy a future after the last war, but without finding the facts, people invested their money and the worst happened."

Yardsticks for measuring the need of a new hotel included a warning from Kleeman. He said: "A community should be studied to decide whether it can profitably support a new hotel in normal times."

The new hotel project should be appraised in terms of 30 to 40 years, not five or ten, said Andrews.

It was pointed out that a new hotel project should be evaluated as a business, not a parcel of real estate.

The group offered three suggestions, "which, if adhered to, might prevent a poor investment in hotel bonds or properties." It recommended that the last drop of water be squeezed from the financing before the hotel is ready for operation; the plans and specifications should be prepared and supervised by experienced hotel architects; and the finest operating management and accountants should be retained for guidance through every step of the planning, financing, building and on through the management of the business.

Operating Costs Up

Pointing out that prewar hotels reached the "break-even" point where fixed capital charges and operating costs were covered when occupancy reached 65 per cent of capacity, Frawley disclosed that currently the "break-even point is over 80 per cent and is going up as a result of price ceilings on one hand and increased operating costs on the other. Government figures show hotel payrolls are up 68 per cent over 1939", he said.

Kleeman Reports Bankers' Attitude

Stating that banks and bankers had learned their lesson and would not enter into hotel financing until the project was thoroly studied. Kleeman reported that by 1928 comparatively few hotels showed six per cent return on their investment, yet in each year from 1927 through '30 an average of $130 million was invested in new hotels.

"The result," said Kleeman, "was that by 1932, 81 per cent of the nation's hotels — new, old, large, medium and small — went into bankruptcy, reorganization and

(Continued on Page Four)

J. E. MACKIE DIES IN ACCIDENT

Funeral services for J. E. Mackie, well-known structural engineer and western manager for the National Lumber Manufacturers' Assn., will be held today, February 27, at 11:00 a. m., at the parlors of Lanyg and Tinney, 717 Jefferson Avenue, Redwood City. Mr. Mackie was killed in a traffic accident on February 21.

A member of the Structural Engineers Association of Northern California, Mr. Mackie was also active in Oregon.

GROOVER AND I

ALUMINUM SOUFFLE

One of the larger Aluminum Companies has just run a national advertisement which gives ground for thought. The ad. states in part:

★ ★ ★

". . Pick it up . . In your bare hands . . Anything made of aluminum . . A sauce pan. . . You're not touching aluminum, you never have, never will. . . Aluminum is constantly covered with the thinnest of thin "skins" called Aluminum Oxide. . . . You can try to scrape it off but it doesn't make any difference. . . It starts to re-form immediately . . . In a split second. ."

★ ★ ★

During the past quarter century, the use of aluminum cooking vessels has become almost universal. It is probably safe to say that EVERY family uses SOME aluminum vessels and utensils in the kitchen.

★ ★ ★

Does not the stirring, scraping, boiling, and frying, incident to cooking, scrape off some of this aluminum oxide?

★ ★ ★

If so, it is true that only minute particles of aluminum are involved at any one time, but what is the effect of a small but contant intake of aluminum oxide over a long period of years?

★ ★ ★

Does the body pass this off or is it absorbed by the blood? Are our veins and arteries aluminum-lined? Is this a cause of squeaky joints, high blood pressure, and the death by strokes of people who should live longer, people in the 48-54 year age bracket? If aluminum oxide is cumulative in the body, has it anything to do with the prevalence of cancer?

★ ★ ★

Has any authoriative medical research been done on this question?

★ ★ ★

These are just questions occurring to an amateur cook of the iron-skillet school.

Better Planning Urged For New War Memorials

Warning to avoid the mistakes contained in war memorials built after World War I has been sent in a letter to all California Veterans organizations by the Association of Landscape Architects who have completed a survey of war memorials and discovered many of them neglected, forgotten and decayed.

"True to custom and the temperament of the American people, most communities, cities and states will seek to memorialize the dead and living who fought for freedom and a permanently peaceful new world," the letter states.

"We are sure you will agree with us that there are in existence today many war memorials which were ill-conceived and misplaced. They are now neglected and forgotten, their original concept and purpose lost in the passing of time."

Four suggestions are offered by the group as the best approach to the problem:

(1) Decide on the type of war memorial most desired, after thoro preliminary analysis and unbiased judgment. Both majority and minority local groups should be heard.

(2) Examine into its fitness with relation to plans of the local planning commission and other related public bodies. Seek proper official approval and adopt method of financing.

(3 Engage competent professional designers, working in collaboration with local committee for continuous consultation, technical recommendations and for actual designs and plans.

(4) Provide for adequate upkeep and maintenance in the form of endowment and other practical means.

Chairman of the architects' committee of war memorials is Thaddeus M. Grabow, McLaren Lodge, Golden Gate Park, San Francisco.

BIDS WANTED

DAVIS DAM, Arizona - Nevada.—Until April 1, 10 A. M., bids will be received b ythe U. S. Bureau of Reclamation, Kingman, Ariz., under Spec. 1206 for the construction of 7 six-room residences and 13 five-room residences at the Davis Government Camp, Davis Dam Project, Arizona-Nevada. The work is situated about 30 miles west of Kingman, Ariz.

The residences will be of wood-frame construction with half basements and the walls will be covered on the outside with insulating fiberboard sheathing and siding or shingles. The inside walls and ceilings will be covered with wood lath and three-coat lime or gypsum plaster. The floors for porches and basements will be concrete. All other floors will be oak flooring over wood subfloors. The floors in the kitchens and bathrooms and the counter tops and splashbacks of kitchen cabinets will be covered with linoleum. The roofs, except over dormers and porches, will be covered with asbestos - cement shingles laid over solid roof boarding. The roof of dormers and porches will be covered with built-up roofing laid over 1½-inch thick gypsum plank or solid roof boarding. The ceilings will be insulated. Certain residences will be constructed with bay windows and certain residences with fireplaces. All residences will be provided with evaporative cooling systems.

The government will furnish cement, electric storage water heaters, evaporative coolers, insulation for ceilings and certain items of window and door casings, door hardware and some plumbing fixtures and fittings. The contractor will furnish all other materials required to complete the residences.

This invitation for bids does not cover the purchase of materials which are to be furnished by the government. Materials to be furnished by the contractor and those furnished by the government are described in the specifications which will be a part of the contract.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; E. A. Moritz, regional director, Administration Bldg., Boulder City, Nev.; H. F. Bahmeier, acting construction engineer, Kingman, Ariz., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the acting construction engineer.

Specifications obtainable to prospective bidders without charge; to others, $3.50, not returnable.

2/27/46 • 26

New Hotels

(Continued from Page One)

foreclosure. Hotel recovery was sluggish, as evidenced by the fact that in none of the years up to 1942 did hotels earn even two per cent for interest on their estimated valuation."

Rely on Risk Capital, Advises Herndon

Three-quarters of the funds used to purchase land and construct hotels from 1929 through 1932 was raised on mortgages, according to Herndon, who added: "Recently, Hilton Hotels purchased the Stevens Hotel, Chicago, for 7½ million dollars. It cost $28 million to build. Completed in 1927, it showed a million dollar deficit the following year; lost about $700,000 in 1929 and by 1930 the bonds were selling for a few cents on the dollar.

Small Hotels Suffered, Reports Frawley

Speaking for small investors, Frawley disclosed that some community-financed hotels were the result of a genuine need for modern inns. "But in many cases the idea was planted by a land owner, a contractor, or an outside promoter. A tidal wave of enthusiasm was generated, and anyone resisting became a spoil-sport, totally lacking a sense of civic pride and responsibility," he said.

"Once the idea was slod," he continued, "land was purchased at a big profit to the owner, local contractors were hired at high figures and, as often as not, an inexperienced hotel manager was retained to try to make money from a grossly over-financed property. The result was that a large share of the 81 per cent of the hotels which failed was in smaller cities."

Building Costs Up, Says Andrews

Andrews said: "The definition of the future is 30 to 40 years, not five or ten. Without superior service, we know that the average new hotel might for a while take business from older competitors, but it will not retain it for long. Facts prove that in a short time the occupancy figure will level out and be about the same in all hotels, new and old."

Andrews revealed that many existing hotels would have a definite competitive advantage over new ones "because water has been squeezed out of the old hotels' financing, and fixed capital charges have been reduced."

PLANS and Speculations

Monterey: Cost of the recommended Navy post-graduate school at Del Monte will run between $25,000,000 and $50,000,000, according to official Washington. The Del Monte site was chosen by a board of high-ranking Navy officials after a nation-wide tour, and has been approved by Secretary Forrestal. Enrollment of more than 3000 officers will necessitate the huge expenditure for dormitory, classroom and other facilities. Final approval of the plan must come from Congress and the Navy.

oOo

Fresno County: The proposed $1,204,000 flood control project on Dry Creek, now authorized by both congress and the state legislature, should save approximately $180,000 in flood damage a year and increase land values in the floor area some $3,000 annually, according to F. G. Christian, head of the planning branch of the Sacramento district office of the U. S. Engineers, which will invite bids on the project shortly.

oOo

Crescent City: The urgent need for lumber for housing projects throughout the nation, may be the deciding factor in determining the construction of the main harbor at Crescent City this year, according to a letter received this week by George E. Tryon, chairman of the Del Norte County Board of Supervisors, from Representative Charles F. Lea. Lumber companies and timber interests in the county have pledged themselves to an almost immediate output of at least 97 million feet of lumber a year, following the completion of the harbor.

oOo

Firebaugh: The board of trustees of the Firebaugh Joint Elementary School District in Fresno County, has decided to proceed at once with a school construction program for which a bond issue of $140,000 was voted just before the war brought to a halt all building not needed for war purposes. Architects David Horn and W. D. Mortland have been instructed to resume the preparation of plans with a view to immediate construction.

GROOVER AND I

PERFECT TIMING

The element of timing is involved in all activities of life. Astronomers use time in terms of 187,560 miles per second. Time in the life of a redwood tree is measured in centuries.

★ ★ ★

Timing is involved in everything from phases of love-making as poetry, music and dancing, to the simplest form of cooking, such as boiling an egg.

★ ★ ★

For timing, just watch our Secretary of State Jimmy Byrnes. For instance, the Canadian spy story: Byrnes rushed to the front balcony and announced that no atomic bomb secrets were involved.

★ ★ ★

His timing was perfect! He was just one news-day ahead of a statement out of Moscow that Russia had stolen atomic secrets!

★ ★ ★

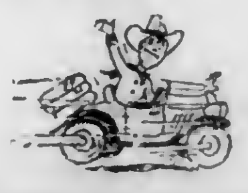
This is just one of the many instances where the State Department has been reversed by the facts. Mr. Byrnes is now claiming that no Americans are involved. Perhaps this means no Americans will be arrested if it would embarrass Russia.

★ ★ ★

Joseph E. Davies, alumnus of the State Department and former U. S. Ambassador to Russia, comes to the defense of the Soviet with his classic remark about Russia's "Moral Right" to obtain atomic bomb secrets through military espionage.

★ ★ ★

This official attitude toward the spy incident is my reason for frequently remarking that our State Department should take out U. S. citizenship papers.



Modglin and Harney Elected Officers Of National AGC

National recognition of two San Francisco construction contractors, B. F. Modglin, of the M & K Corp., and Charles L. Harney, of the construction company bearing his name, was made during the 27th annual convention of the Associated General Contractors of America in Chicago last week when these men were elected national directors of the association.

Past presidents and directors of the Northern California chapter of the contractors association, Mr. Modglin and Mr. Harney have for many years played a large part in the construction of many outstanding western projects. During the war their companies built some of the largest Army and Navy installations on the coast.

#

Frank T. Crowe, Boulder and Shasta Superintendent, Dead

Frank T. Crowe, 63, construction superintendent on Boulder and Shasta dams and internationally-noted construction engineer, died last Tuesday in his home in Redlands, Calif.

Known as a "hardrock" engineer, Mr. Crowe has been associated with nearly every major western reclamation job. He was active in construction of Yellowstone, McDonald Lake and Guernsey projects in Wyoming; Arrowrock and Deadwood dams in Idaho; Tieton in Washington and the Van Giesen in California.

He was born in Trenholmville, Canada, and graduated from the University of Maine in 1905. The following year he joined the Bureau of Reclamation and in recent years has been consultant engineer on dams and power plants for a group of prominent California contractors.

He is survived by his widow and two daughters.

For Better Building - -
A Central Vacuum Cleaning System

Modern efficient dustless vacuum cleaning is now available to homeowners in a small compact unit which is installed in the home preferably at time of building. The Unit, manufactured by the Spencer Turbine Company, Hartford, Conn., makers of vacuum cleaning equipment, has already been installed in many of the country's leading hotels, theaters, office buildings, and larger residences.

It is comprised of a series of pneumatic steel tubes sealed with streamlined aluminum castings which carry the dirt picked up in various rooms of the home to a central dire repository through the aid of a powerful vacuum producer.

The housewife operates only a flexible hose, similar to a portable vacuum cleaner, attaching the particular cleaning nozzle or tool required to do the job. This hose is attached to any of the outlets installed in all rooms of the home, including garage and basement. The dirt is whisked down to the basement via the pneumatic tubes and in a jiffy the room is clean with no bulky contrivances to continually move around, such as required by ordinary cleaners.

A labor saver for the housewife, it's easy to handle and operate. The man of the house will want to use it. He will find it a pleasure to clean the upholstery of his car, to remove dirt from the furnace and heating ducts with the Spencer Vacuum Cleaning equipment.

No cleaning job is too difficult for this equipment. It will remove cobwebs, polish linoleum, clean walls, draperies, rugs, floors, furniture and a hundred other things.

The Spencer Vacuum Cleaning system is easily installed in any home or factory, hotel, theater or office. Once installed you have a system which is built to serve and will prove satisfactory for a lifetime—with only infrequent oiling of the vacuum producing machinery to think about.

Any mechanic will tell you that a Spencer System is built to outlast small portable machines many times over. Many of these systems are in satisfactory operation throughout the country after more than a quarter century of use. It is an economy as well as a luxury —you can't afford to be without it in your new home.

Spencer representatives will submit a plan for the location of outlets in your home, designing an arrangement of sufficient outlets convenients to your needs. They will also help you select the vacuum tools you will need for the specialized cleaning operations in your home.

Lester F. Scott, factory representative in this area, has offices at 55 Brady Street, San Francisco, and will answer any questions about this modern, convenient, efficient method of household cleaning.

Did You Know That . . .

Don Kimball, George King and **Herbert Ginsberg** have been operating as the **Endurance Metal Products Company** for the past several months. The firm has the organization and facilities to make a diversified line of products for the construction industry. Present production includes light steel buildings for service stations and industrial purposes, miscellaneous iron and bronze items, and sheet metal work.

Each of the partners has had a background of twenty or more years experience in the metal fabrication business. "Empco" is located at 7490 Mission Street, Colma. Telephone JUniper 6-0352.

—O—

The California State Personnel Board has announced an opening for the position of Architectural Property Analyst. The final date for filing applications is March 27. Examination date has been set for April 11. Further information can be obtained from the offices of the "Builder". Complete information is obtainable from the California State Personnel Board.

E. L. Christian Appointed Assistant CVP Water Master

Eugene L. Christian, an engineer who for 20 years has been handling diversions from the San Joaquin River for private irrigation companies, including Miller & Lux, has been appointed Assistant Water Master of the Central Valley Project, Richard L. Boke, Regional Director of the Bureau of Reclamation, announced today in Sacramento.

Christian will assist Martin H. Blote, Chief of Irrigation Operations, of the Branch of Operation and Maintenance.

"Because of his familiarity with the behavior of the San Joaquin River, Christian is a welcome addition to our regional staff", said Boke. "With Friant and Shasta dams and the Madera and Contra Costa canals in partial operation and with construction under way on the Friant - Kern Canal and about to begin on the Delta-Mendota Canal, his experience will be of great value in the Bureau's preparation for full operation of these project features."

Christian, a native of Oregon, has been a resident of the San Joaquin Valley for 25 years. He is married and has one son.

Architects And Engineers Joint Meeting March 5

J. Francis Ward, AIA, and Wm. Popert, engineer, are chairmen for the dinner meeting of the Northern California Chapter of American Institute of Architects and the Sturctural Engineers Association of Nothern California. This meeting is to be held at the Engineers Club in San Francisco on Tuesday, March 5, with assembly scheduled for 5:30 p. m., and dinner to begin at 6:15.

The meeting will be a symposium on "Building Codes and Their Relationship to Modern Construction", with the following speakers giving talks on particular phases of the subject: Mark Falk, engineer, "An Approach to a Rational Solution of the Earthquake Problem"; Vincent Raney, architect, and member AIA Chapter Committee on Building Codes, "Conflicting and Overlapping Regulations Affecting Building Designs"; Harold Engle, engineer, "Suggestions for Improvement of Fireproofing Requirements in Building Codes".

L. Harold Anderson, President, California Railroad Commission, will act as moderator.

This is a very important meeting for the profession. Members are urged to attend and bring their guests.

(9) preparing 141,000 sq. yds. rock foundations for concrete lining;
(10) trimming 330,000 sq. yds. earth foundations for concrete lining;
(11) 6200 cu. yds. of backfill;
(12) 3300 cu. yds. compacting backfill;
(13) 200 sq. yds. dry-rock paving;
(14) 1775 cu. yds. concrete in structures;
(15) 22,600 c.y. reinf. conc. in canal lining;
(16) 22,600 c.y. unreinf. do;
(17) 1,170,000 lbs. placing reinf. bars in canal lining;
(18) placing 260,000 lbs reinf. bars;
(19) placing 760 sq. ft. elastic joint-filler material;
(20) placing 140 l.f. rubber water stops;
(21) erecting 283 M. bt. b.m. timber in structures;
(22) installing 2500 lbs. miscel. metal work;
(23) constructing 24 cattle guards;
(24) constructing 16 miles of barbed wire right-of-way fence;
(25) constructing two miles comb. barbed wire and woven wire right-of-way fence;
(26) removing 1800 l.f. existing pipe lines;
(27) laying 800 l.f. 2½- and 3-. diam. iron pipe;
(28) laying 5800 l.f. 4-, 6-, and 12-in. diam. thin-wall steel pipe;
(29) laying 16 l.f. 18-in. diam. corru. metal pipe;
(30) installing 145 units of orchard outlets and stand pipes;
(31) constructing 17,000 l.f. underdrains with uncemented joints;
(32) constructing 12,500 l.f. feeder drains.

This invitation for bids does not cover the purchase of materials which are to be furnished by the government. Materials to be furnished by the contractor and those furnished by the government are described in the specifications which will be a part of the contract.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.25 per copy, not returnable.

Guarantee will be required with each bid in an amount not less than 10 per cent of the amount of the bid.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: R. L. Boke, regional director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; R. K. Durant, acting construction engineer, Friant, Calif.; Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the acting construction engineer.

Specifications and drawings are on file for examination at the office of Daily Pacific Builder, 465 Tenth St., San Francisco.

BIDS WANTED

LOS ANGELES, Calif.—Until Mar. 27, 1 P. M., bids will be received by the U. S. District Engineer Office, 751 S. Figueroa St., Los Angeles, for the completion of embankment and spillway, Santa Fe Dam, Los Angeles County; Serial 150. The site of the work is on the San Gabriel River, 3½ miles southwest of the City of Azusa.

The work involves completion of embankment of the dam to final grade and section, requires filling with impervious core material obtained from an existing stockpile; filling with pervious material of varied grading obtained from a borrow pit and from excavations, and grouted stone ramps for service roads, walks and curbs. In the spillway portion of the dam, the new work consists of completing the concrete ogee and placing derrick stone below the stilling pool. The recorder house shall be completed above the existing construction joint.

The bids will be taken as follows:

(1) 2000 cu. yds. stripping;
(2) 28,300 cu. yds. stockpile excavation;
(3) 218,300 cu. yds. borrow excavation;
(4) 125,000 cu. yds. of construction ramp excavation;
(5) 18,600 cu. yds. zone I fill;
(6) 16,300 cu. yds. zone II fill;
(7) 160,700 cu. yds. zone III fill;
(8) 54,800 cu. yds. zone IV fill;
(9) 31,900 cu. yds. zone V fill;
(10) 16,500 tons of spillway derrick stone;
(11) 370 cu. yds. grouted stone ramps, stairways and curbs;
(12) 20,100 cu. yds. ogee concrete;
(13) 2250 sq. ft. ¾-in. expansion joint filler;
(14) 4 tons water stop material;
(15) 27,000 bbls. portland cement;
(16) 144 lin. ft. fencing;
(17) lump sum recorder house superstructure.

BIDS WANTED

CENTRAL VALLEY PROJECT, Calif.—Until March 12, 10 A. M., bids will be received by the Bureau of Reclamation, Denver, Colo., under Spec. No. 1172 for the construction of earthwork, canal lining and structures, Contra Costa Canal, station 2321+25 to the end, and Mountain View Reservoir, Delta Division, Central Valley Project, California. The work is situated from about one mile east to about 3½ miles southeast of Martinez, Calif.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.75 per copy, not returnable.

Guarantee will be required with each bid in an amount not less than 10 per cent of the amount of the bid.

Bids will be considered on either or both of the following schedules. Bidders may make such stipulations as they desire regarding a combination of the schedules but no bid will be considered for only a part of either schedule.

Work involves:

Schedule No. 1

Earthwork, canal lining and structures, Contra Costa Canal, station 2321+25 to station 2512+25.

(1) clearing 23 acres orchards and vineyards;
(2) grubbing 20 acres orchards and vineyards;
(3) 65,000 cu. yds. excavation, all classes, for canal;
(4) 400 cu. yds. of excavation, all classes, for subbase for structures;
(5) 100,000 sta. cu. yds. of overhaul;
(6) 1000 cu. yds. of compacting embankment;
(7) 400 cu. yds. of gravel subbase under structures;
(8) 51,000 cu. yds. of excavation, all classes, for structures;
(9) 18,800 sq. yds. of trimming foundations for concrete lining;
(10) 42,000 cu. yds. of backfill;
(11) 10,000 cu. yds. compacting backfill;
(12) 2350 cu. yds. of concrete in structures;
(13) 1550 cu. yds. of concrete in canal lining;
(14) placing 260,000 lbs. of reinforcement bars;
(15) placing 120 sq. ft. of elastic filler material in joints;
(16) placing 18,000 lbs. of metal water stops in joints;
(17) 200 sq. yds. of dry-rock paving;
(18) driving 500 lin. ft. timber piles;
(19) erecting 26 M ft. b.m. timber in structures except cattle guards;
(20) constructing 10 cattle guards;
(21) jacking 36 lin. ft. 6-ft. diameter corrugated metal pipe under railroad;
(22) jacking 50 lin. ft. of 5-ft. 6-in. diameter corrugated metal pipe under highway;
(23) laying 300 lin. ft. of 12-in. diameter concrete pipe;
(24) laying 200 lin. ft. of 15-in. diameter concrete pipe;
(25) laying 200 lin. ft. of 18-in. diameter concrete pipe;
(26) laying 60 lin. ft. of 24-in. diameter concrete pipe;
(27) installing 3500 lbs. of gates and gate hoists;
(28) installing 6500 lbs. of miscellaneous metal work.

Schedule No. 2

Earthwork, dam embankment and structures, Contra Costa Canal, station 2512+25 to end, and Mountain View Reservoir.

(1) clearing 13 acres orchards and vineyards;
(2) grubbing 13 acres orchards and vineyards;
(3) 2000 cu. yds. of excavation, all classes, for outlet and spillway channels;
(4) 9500 cu. yds. of excavation, stripping dam foundation and borrow pits;
(5) 350 cu. yds. of excavation, all classes, for embankment toe drains;
(6) 160,000 cu. yds. of constructing dam embankment;
(7) 10,000 lin. ft. of sand-filled drain holes;
(8) 17,000 cu. yds. of sand drain in dam embankment;
(9) 6000 cu. yds. of riprap on dam;
(10) 450 cu. yds. of gravel surface on dam crest;
(11) 10,000 cu. yds. of excavation, all classes, for structures;
(12) 3000 cu. yds. of backfill;
(13) 2500 cu. yds. of compacting backfill;
(14) 480 cu. yds. of concrete in structures;
(15) placing 55,000 lbs. of reinforcement bars;
(16) placing 25 sq. ft. of elastic filler material in joints;
(17) placing 10 lin. ft. of rubber water stops in joints;
(18) placing 360 lbs. of metal water water stops in joints;
(19) 600 sq. yds. of dry-rock paving;
(20) constructing 1400 lin. ft. of 12-in. diameter sewer pipe drain with uncemented joints;
(21) laying 100 lin. ft. of 12-in. diameter sewer pipe with cemented joints;
(22) installing 2100 lbs. of gates and gate hoists;
(23) installing 7100 lbs. of outlet pipes and valves;
(24) installing 13,400 lbs. of miscellaneous metal work.

Specifications and drawings are on file for examination at the office of Daily Pacific Builder, 465 Tenth St., San Francisco.

2.3 MILES GRADING, ETC., CONTRA COSTA COUNTY

CONTRA COSTA COUNTY, Calif.—Guy F. Atkinson Co., Orange and Railroad Aves., South San Francisco at $209,469.50 submitted low bid to the State Division of Highways, G. T. McCoy, State Highway Engineer, Public Works Bldg., Sacramento, for about 2.3 miles in length to be graded and paved with portland cement concrete in Contra Costa County between Concord Ave. and four-tenths mile west of Ohmer Station.

This is a national defense contract.

The work involves:

(1) 280 cu. yds. remove concrete;
(2) clearing and grubbing;
(3) 107,000 cu. yds. roadway excavation;
(4) 550 cu. yds. structural excavation;
(5) 50 cu. yds. ditch and channel excavation;
(6) 16,000 sq. yds. compact original ground;
(7) 42,000 tons imported base material;
(8) 3,200,000 sta. yds. overhaul;
(9) 21,500 sq. yds. prepare class C subgrade;
(10) develop water supply and furnish water equipment;
(11) 2600 M gallons apply water;
(12) 123 sta. finish roadway;
(13) 7000 tons crusher run base;
(14) 50 tons liquid asphalt MC-1 prime coat and penetration treatment;
(15) 21 tons liquid asphalt MC-2 penetration treatment;
(16) 155 tons sand penetration treatment;
(17) 20 tons asphaltic emulsion seal coat;
(18) 120 tons screenings seal coat;
(19) 3400 tons minimum aggregate plant mix surfacing;
(20) 175 tons paving asphalt plant mix surfacing;
(21) 300 lin. ft. raised bars;
(22) 4875 cu. yds. portland cement concrete pavement;
(23) 3500 each tie bolt assemblies;
(24) 65 cu. yds class A portland cement concrete structures;
(25) 75 cu. yds. class B portland cement concrete curbs;
(26) 40 each monuments;
(27) 400 lin. ft. laminated guard railing;
(28) 18 each culvert markers and project markers;
(29) 58 each guide posts;
(30) 3.3 miles new property fence;
(31) 0.3 mile remove and reconstruct existing property fence;
(32) 54 lin. ft. 15-in. reinforced concrete pipe, standard strength;
(33) 56 lin. ft. 21.in reinforced concrete pipe, standard strength;
(34) 660 lin. ft. 24-in. reinforced concrete pipe, standard strength;
(35) 56 lin. ft. 27-in. reinforced concrete pipe, standard strength;
(36) 37 lin. ft 18-in. reinforced concrete pipe, extra strength;
(37) 48 lin. ft. 21.in reinforced concrete pipe, extra strength;
(38) 10 lin. ft. 8-in. CMP downdrains, 16 gage;
(39) 1 each spillway assembly;
(40) 3500 lbs. bar reinforcing steel;
(41) 1 each frame and cover for drop inlet.

Total bids follow:

(A) Guy F. Atkinson Co., South San Francisco, $209,469.50.
(B) Fredrickson & Watson Constr. Co., Oakland, $210,606.80.
(C) Gunnar Corp., Pasadena, $219,231.50.
(D) Piombo Bros. & Co., San Francisco, $221,068.
(E) N. M. Ball Sons, Berkeley, $221,696.50.

CALIFORNIA STATE

PLANS and Speculations

Richmond: City officials were preparing today to lure Henry Kaiser and his gypsum plant back to Richmond after previously discouraging the production, king from building here because of the dust hazard which would be created. Tuesday city officials conferred with Kaiser executives in an attempt to "woo" them back and offered the proposed plant site a lot near Parr Terminal No. 1.

oOo

Redwood City: More than 1500 signatures of the needed 2500 voters, necessary to fill a petition asking for a south county hospital, have already been obtained and the quota is expected to be filled by March 15. Committeemen met Wednesday night in the city hall to discuss plans for the campaign.

oOo

Berkeley: Proposals for a well-planned community shopping area in the vicinity of Sather Gate, were revealed this week when members of the Sather Gate Business Association confessed that the proposal to rezone Durant Ave. from College to Shattuck Avenues, was only "a means towards an end". Larry Blake, president of the organization, asserted the plan is to make the area the "most modern and efficient business district in the state".

oOo

Klamath Falls, Ore.: The state board of higher education has inspected and approved the former Klamath Marine barracks site, tentative conversion project, to be made a 6½ million dollar co-educational college for 1500 veterans unable to study at Oregon's overcrowded schools. Acceptance of the site is assured provided the Navy turns it over "with no strings attached", board officials said.

oOo

Chico: A venetian blinds manufacturer is planning to open a small plant here, Ralph Lewis of Chico, has announced.

oOo

Redwood City: Plans are being considered for the repair and improvement of city water mains and facilities which deteriorated during the war and are needed to keep abreast of current building progress, city officials announced yesterday. The city council has approved a portion of the necessary funds, $27,000, which will be spent mainly for materials such as pipes. The project will be completed over a four-year period.

oOo

Richmond: Public Works Director E. A. Hoffman has been given approval from the city council to conduct a city-wide survey of street lighting for the purpose of determining the need of additional lighting.

U. S. Bureau of Reclamation To Aid China In Developing World's Largest Power Project

Aided by engineers of the U. S. Bureau of Reclamation, the government of China is planning development of the largest irrigation and hydroelectric power project the world has ever known. Key feature of the project which is designed to revitalize the heavily-populated, hunger - ridden, flood - menaced Yangtze valley, will be a huge dam in the gorge of the river about 300 miles east of Chungking.

Tall as a skyscraper, this dam as planned will reach higher into the sky than Boulder dam on the Colorado river, now the world's highest (750 feet compared with 726). Its hulking mass—a third greater than Grand Coulee dam on Columbia, dwarfs the largest pyramid. A record 250-mile reservoir backed up behind the dam (50 million acre-feet capacity, compared to Boulder's approximately 31 million) will store water for the mammoth irrigation project, to maintain navigation, for flood control, and for power production.

"It's gigantific!" exclaimed a visitor to the Bureau of Reclamation design office upon being shown artist conception drawings of the dam.

The Bureau of Reclamation of the Department of the Interior is participating in the planning of the project under a contract between the government of the United States and the National Resources Commission of China. Commissioner of Reclamation Michael W. Straus said that work on designs and specifications is underway at the Denver office, and that the government of China has advanced $250,000 toward payment of the cost of the Bureau's services. This is the first installment toward the $500,000 estimated total payment that will be required.

The arrangement which was arrived at in consultation with the State Department, covers only technical studies and design work as paid for by China. Specifically, the agreement sets forth that the United States assumes no responsibility for financing or construction.

Hinging on construction of the dam is a comprehensive plan to rebuild the valley from the rice roots up. Within a 300-mile range of the dam site recurrent famine and flood have devastated an area containing a population greater than that of the entire United States.

The dam will impound waters of the Yangtze to provide irrigation for 10,000,000 acres of land, and also protect the valley against floods.

(Continued on Page Three)

COMPLETE COVERAGE IN SAN MATEO CO.

With the recent appointments of correspondents in Atherton, Belmont, Hillsborough, San Bruno, South San Francisco and Daly City, the Daily Pacific Builder takes pleasure in announcing complete coverage for San Mateo County.

All building permits granted for $1000 and over in the entire county, including the unincorporated areas, are now or soon will be regular "Builder" features.

PLASTIC SPECIALTIES IDEAS

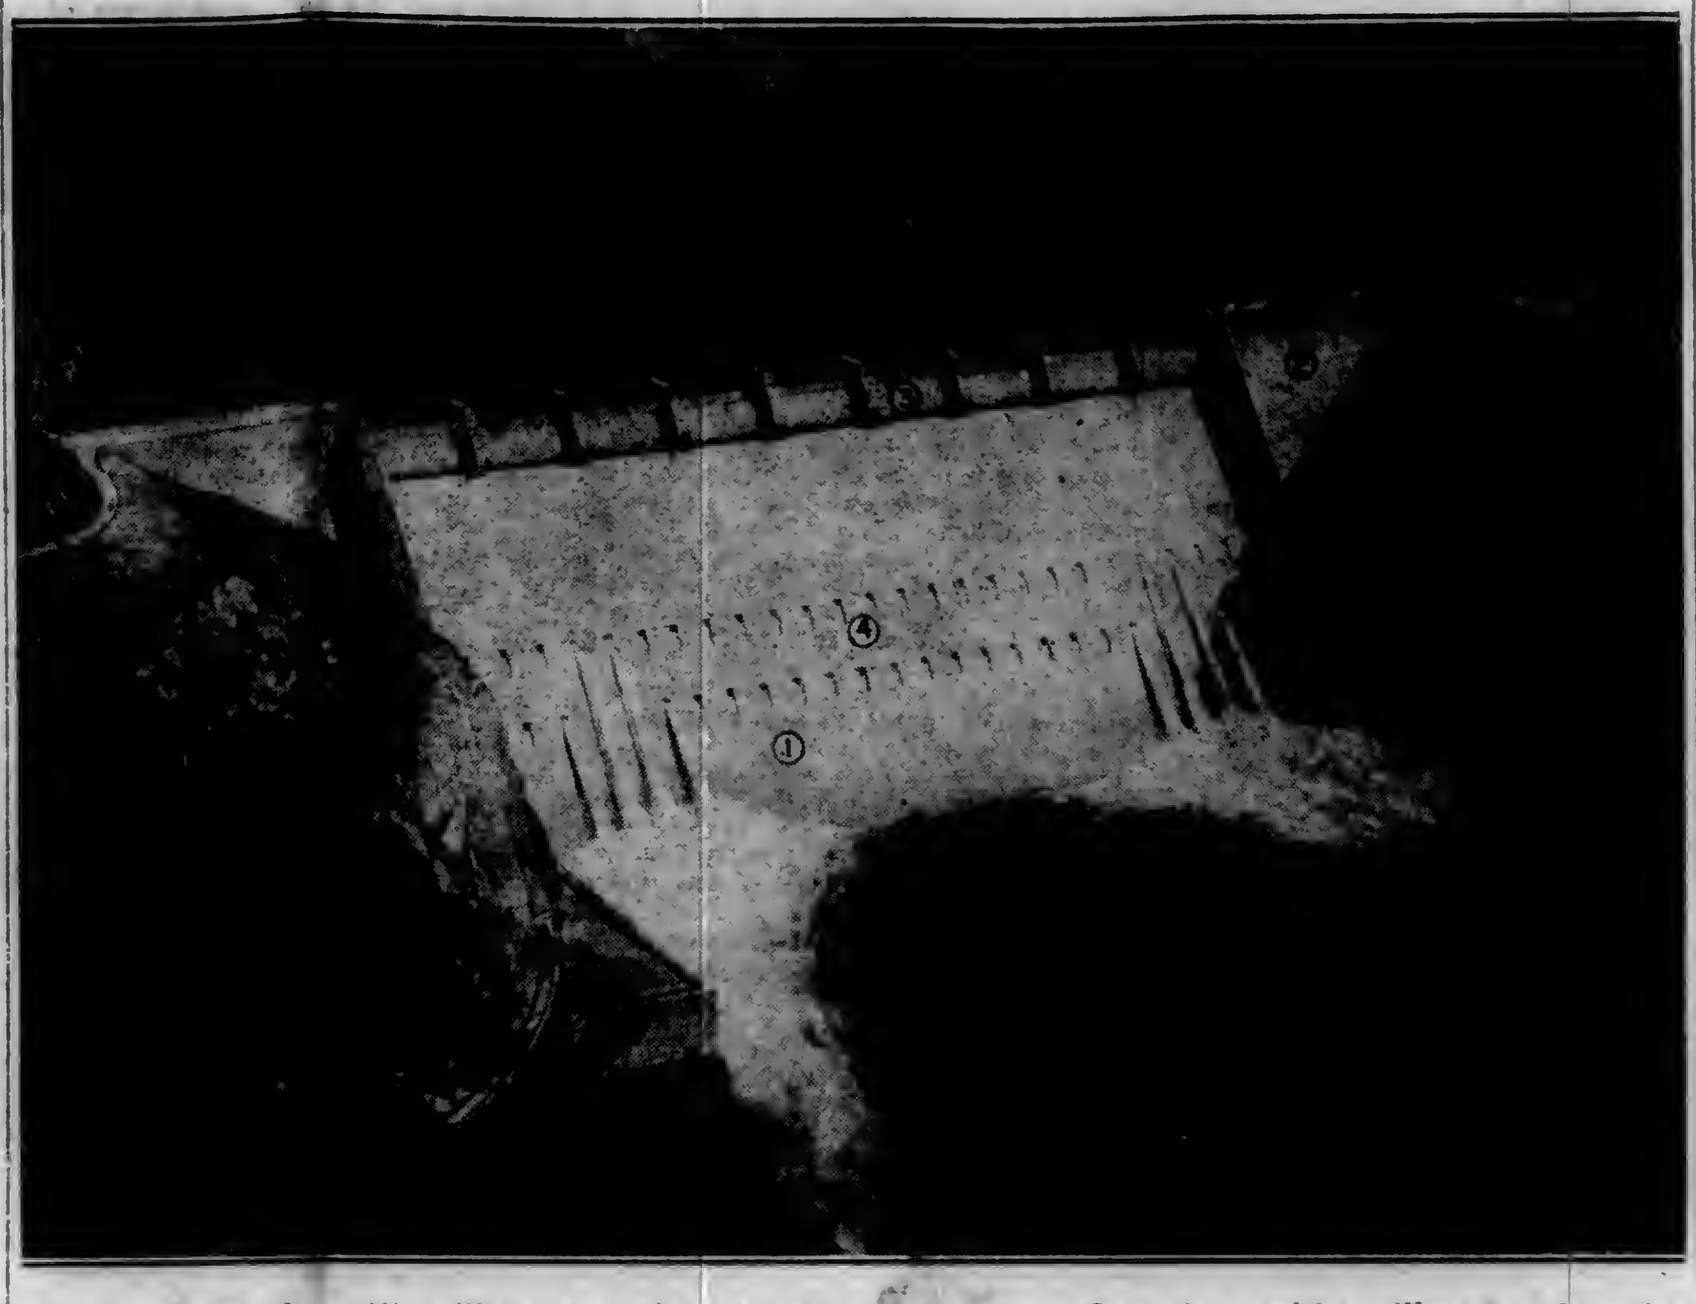
A new 24-page colorful catalog "Plastic Advertising Specialties of Distinction", has been prepared by The Emeloid Co., 286 Laurel Ave., Arlington, N. J., to stimulate sales of plastics specialties. One of the most completely equipped plastics plants in America, Emeloid offers advertising specialties custom-made to individual requirements. Write to them for the booklet.

#

CORROSIVE LINING BULLETIN

A new sales bulletin titled, "Lining for Industrial and Process Equipment", and thoroughly describing the complete range of synthetic rubbers, Bakelite, plastics, vinyl, thickol and neoprene lining manufactured by them to combat corrosion in a host of commercial equipment, is now available by writing to Industrial Lining Engineers, Inc., Edgeworth, Pa., c/o Sewickley Post Office.

YANGTZE DAM DWARFS PYRAMIDS



Yangtze Gorge dam (1) will be a straight gravity concrete overflow dam with spillway and outlet works occupying the whole river channel portion of the dam. A nonoverflow abutment portion of dam (2) will close the gap between the channel portion of dam and each wall of the gorge. Spillway discharge will be controlled by nine 135-foot by 56-foot drum gates (3) of Coulee Dam type. Outlet discharge will be controlled by 104 aerated jet gates installed in tandem in 52 102-inch conduits (4) extending through the dam. These outlet conduits will be protected against floating trash by means of trashracks installed on the upstream face of dam. At least one-quarter of the outlet conduits will be designed to facilitate the passing silt carried by the Yangtze (not shown). Energy dissipation of spillway and outlet flow will be controlled by an unusually long and massive hydraulic jump concrete apron (not shown). A highway and railway bridge (not shown) will be probably constructed over the spillway portion of the dam.

Sacramento Constr. Pioneer Dead

SACRAMENTO, February 27.—Adolph Teichert, Sr., 91, founder of the A. Teichert & Sons Constr. Co., died last night in his home at 2401 J Street.

Mr. Teichert came to Sacramento more than 50 years ago and was prominent in the construction business and Masonic circles here. The body is at the chapel of Miller & Skelton where funeral arrangements are pending. He is survived by one son, a daughter, and six grandchildren.

Industry Approves Copper, Brass Pipe Practice Plan

A simplified practice recommendation for copper water tube and copper and brass pipe has been approved for promulgation, according to an announcement of the Division of Simplified Practice of the National Bureau of Standards. It is effective from Mar. 15, and will be identified as R217-46.

The recommendation covers copper water tube and copper and brass pipe intended for plumbing uses. It establishes as a useful standard of practice in the production, distribution, and use of these items, a simplified list of types and sizes.

Until printed copies are available, free mimeographed copies may be obtained from the Division of Simplified Practice, National Bureau of Standards, Washington 25, D. C.

SURPLUS GOODS LISTINGS

National consumer goods listings are published in a new magazine-type format titled, "Surplus Reporter", by the Reconstruction Finance Corporation. Containing a complete, concise listing of material for sale, the booklet is obtainable by writing to the Tenth Regional Office of Consumer Goods Division, Office of Surplus Property, 30 Van Ness Ave., San Francisco 2, and requesting to be placed on their mailing list.

GROOVER AND I

WIN, PLACE AND SHOW

On Tuesday, the 26th, at Miami's Hialeah horse park, in the second race, a "sleeper" came in paying $120.70 for a win ticket. This means that very few of the horse players thought the nag had a chance.

* * *

On the same day, Winston Churchill, just awarded an Honorary Degree of Doctor of Laws by the University of Miami, was on the air with a "harmony, unity and peace talk".

* * *

Boys, get out your dream book—the horse paying $120.70 was "PEACE TALK".

* * *

Winston Churchill's pal, Joseph P. Kennedy, former U. S. Ambassador to the Court of St. James, and importer of excellent scotch whiskey (if there is any left) owns the Hieleah Park, if that means anything to you.

* * *

On the same day, off the coast of Miami, ex-President Herbert Hoover caught a bonefish weighing 10 lbs. 3 oz. This is the season's record to date and puts Mr. Hoover in place for first money.

* * *

The world record bonefish, weighing 13 lbs. 12 oz., was caught in March 1919 between Miami and Bimini, B.W.I., by B. F. Peek.

* * *

(Marguerite, how did Herbert Hoover manage to drag a fish in here. I started talking about horses.)

* * *

Florida, palm-fringed, chromium-plated and filled with brilliant sunshine, thousand-dollar bills and expensive sinning, is right now at the peak of the winter season.

* * *

The place is also crawling with baseball training camps—the Dodgers at Sanford, Giants at Miami, Cardinals at St. Petersburg, Tigers at Lakeland, Boston Braves at Ft. Lauderdale—this could go on into the eleventh inning.

* * *

If I ever expect to return to Los Angeles for my forgotten raincoat, I had better mention the Santa Anita track at Arcadia, California.

* * *

Hialeah considers a 1.5 million-dollar day as tops, while Santa Anita doesn't become excited over a three-million-dollar day.

OFFICIAL PROPOSALS

FIRST PUBLISHED TODAY

Highway Improvements—Mendocino County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 27, 1946**, at which time they will be publicly opened and read, in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Mendocino County, at Dooley Creek, 1 mile east of Hopland (I-Men-16-A), a reinforced concrete slab bridge on concrete pile bents to be constructed and about twelve hundredths (0.12) mile of approaches to be graded and surfaced with road-mixed surfacing and seal coat applied thereto.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.125
Cement finisher	1.75
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity)	1.70
Concrete vibrator operator	1.25
Flagman	1.00
Jackhammer operator	1.25
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equpment, shovel type controls (over one cubic yard)	2.00
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capaciyt)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime — one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specification. Each bidder must be licensed and also prequalified as required by law (see said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 27, 1946**, at which time they will be publicly opened and read, in the Assembly Room of said building, for construction in accordance with the specifications therefor, to which special reference is made, of a portion of State highway as follows:

Lake County, across Kelsey Creek at Kelseyville (I-Lak-89-D), a structural steel girder bridge and approaches to be constructed.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.125
Cement finisher	1.75
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity and paving type)	1.70
Derrick operator	2.00
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Painter (structural steel)	1.625
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Reinforcing steel worker	1.50
Roller operator	1.65
Structural steel worker	1.75
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Jackhammer operator	1.25
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. In case of any inconsistency the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements—Santa Clara County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 13, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Santa Clara County, on Bayshore Freeway at Santa Clara Street in the City of San Jose (IV-SCl-68,2-SJs), a separation structure to be constructed and approaches about six-tenths (0.6) mile in length to be graded and surfaced with Portland cement concrete and asphalt concrete on crusher run base.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.40
Asphalt paint mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.50
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity or paving type)	1.70
Electrician	1.70
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.00
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Plumber	1.625
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (8 cubic yards water level capacity or more)	1.50
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.25
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Headerboard man	1.375
Jackhammer operator	1.25
Oil distributor bootman	1.00
Oiler, power shovels or cranes	1.40
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.10
Truck driver (less than 4 cubic yards water level capacity)	1.00
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal office or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposal to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids

Highway Improvements—Lake Co.

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 20, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Lake County, between 1.2 miles north of Rodman Narrows Road and Route 15 (I-Lak-89-E), a total length of about two (2) miles of highway to be graded and surfaced.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.125
Cement finisher	1.50
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity)	1.70
Concrete vibrator operator	1.25
Flagman	1.00
Jackhammer operator	1.25
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.00
Oiler, power shovels or cranes	1.25
Operator of power shovel or other excavting equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or mere)	1.4375
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.3125
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.25
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.0625
Truck driver (less than 4 cubic yards water level capacity)	0.90
Any classification omitted herein not less than	1.00

Overtime—One and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—One and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (see said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

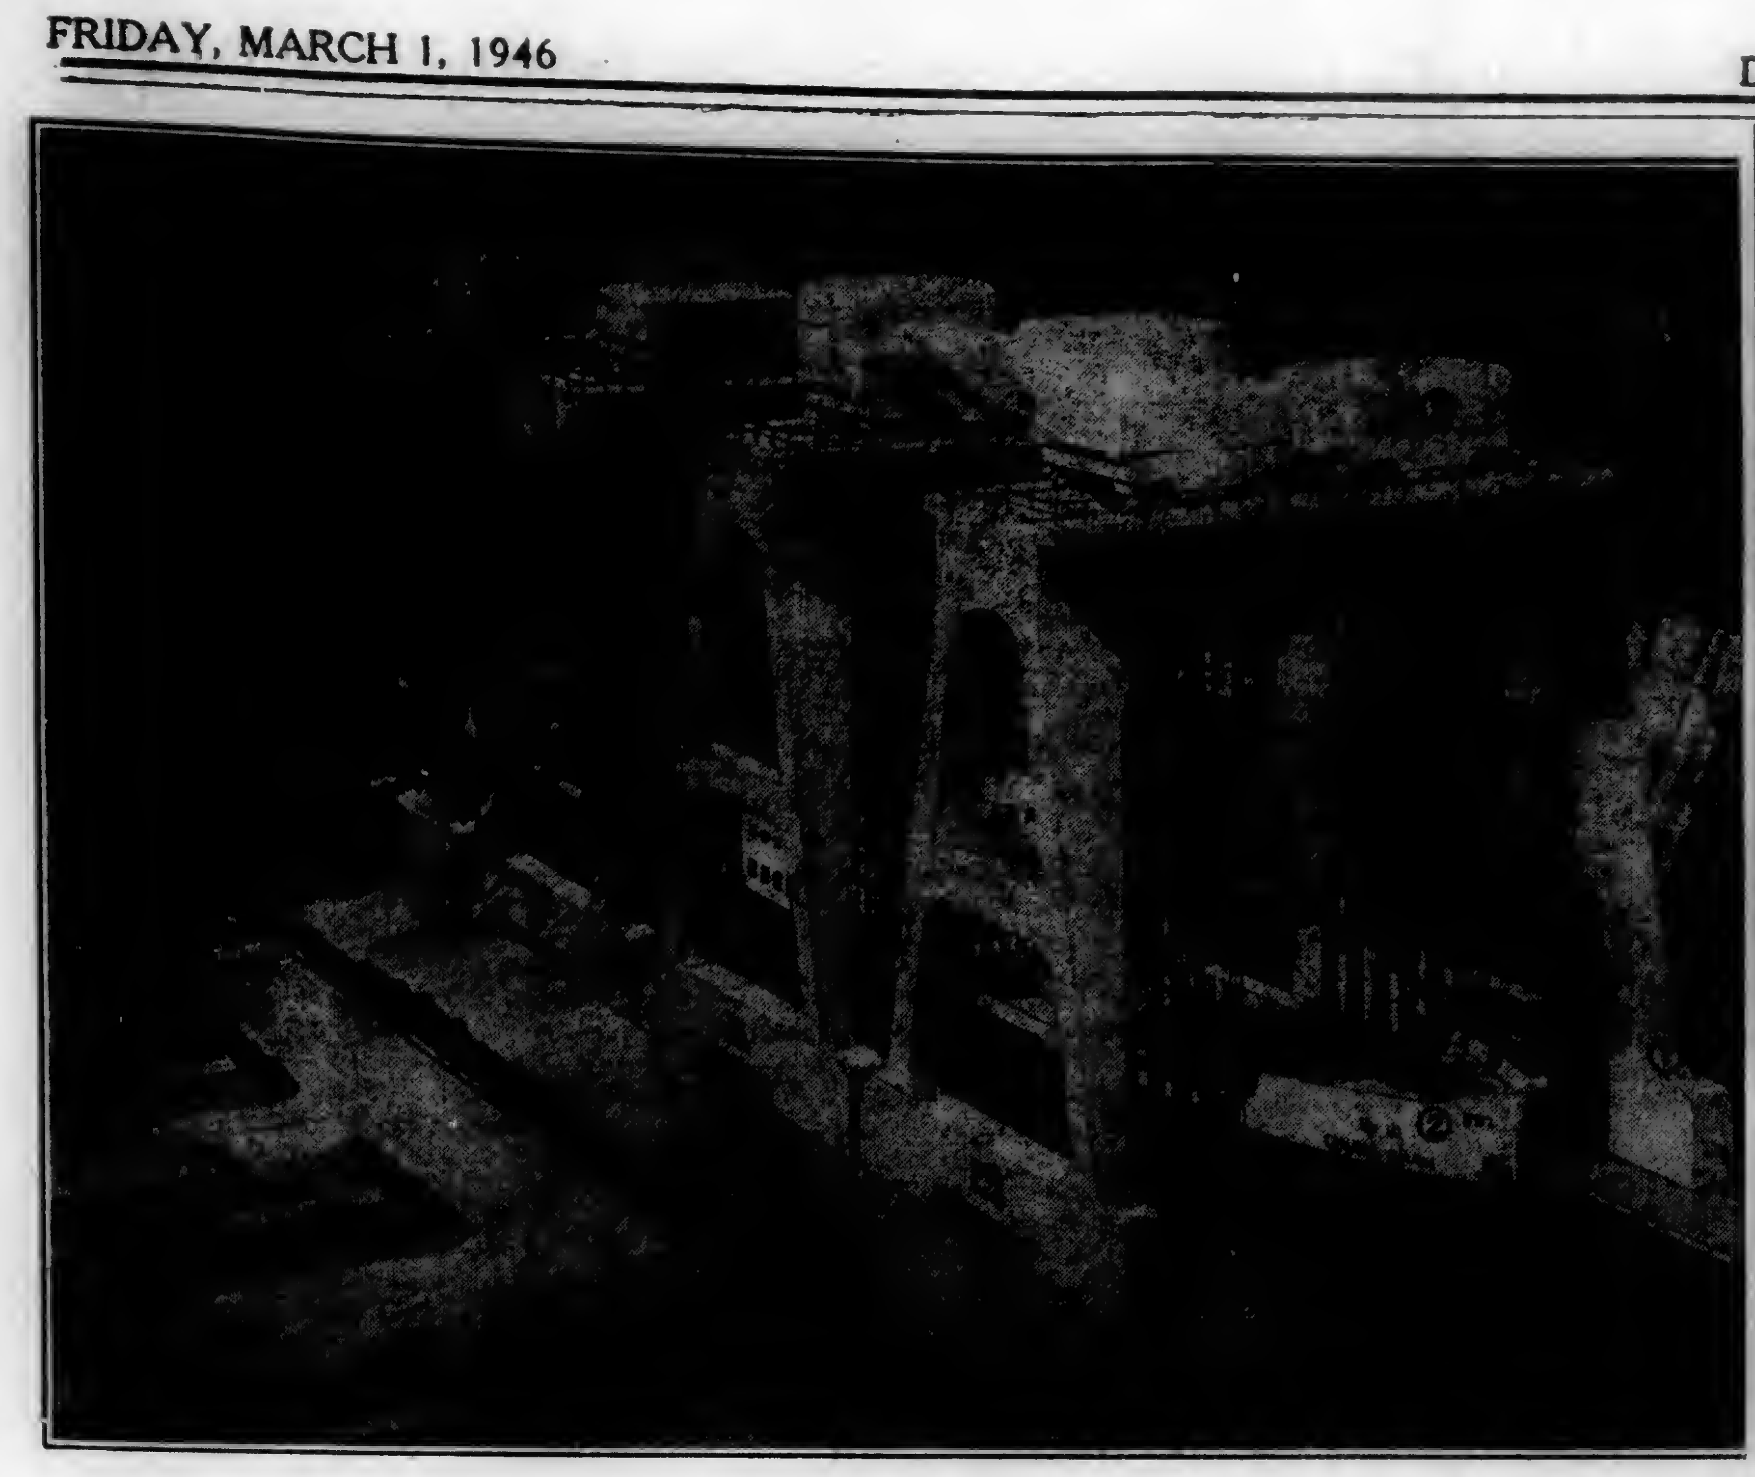
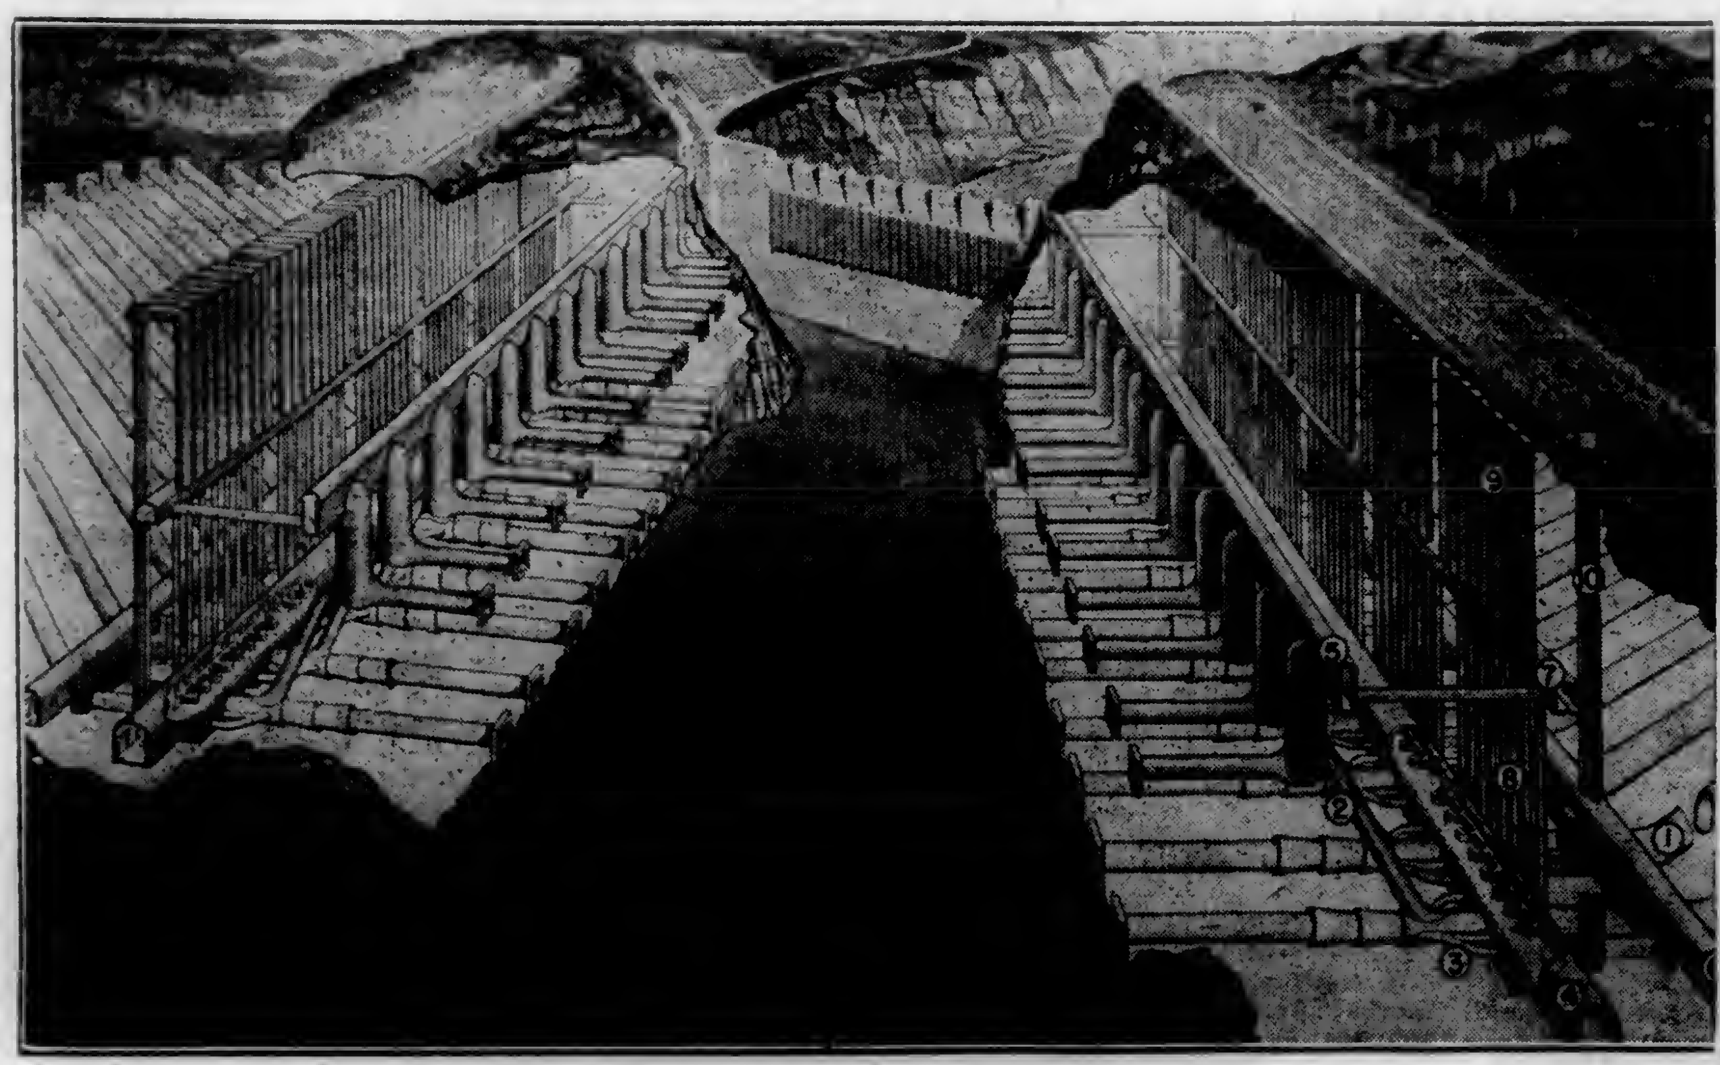
4- 1— 2:00 P.M.—	Louvers	Central Valley Project	2-19



The mechanical lock facilities will include mammoth gantry cranes (1) capable of hoisting a loaded vessel (2) of several thousand tons displacement capacity. Some of the ships plying the Yangtze (China Merchant Marine) will be specially constructed with hull and framing designed to carry the weight of the loaded vessel from cable fastenings (3) distributed along the top edge of the hull. The reeving of the cables (4) will be such that the tension in all cables of a hoisting unit is equalized. The hoists (5) will be connected together either mechanically or electrically so that they divide the load properly and operate at exactly the same speed. A large corrugated tank (not shown(into which many small boats can be moored in rows will be raised and lowered by the gantry cranes in handling the large traffic of sampan and junk boats.



Here is the way Ichange Dam will look from theair. In the center is the big dam itself stopping up Ichang Gorge. The dam (1) like Grand Coulee is concrete gravity type. The spider-web dashed lines indicate a maze of underground concrete-lined tunnels and shafts. Only the portals of these would show from the air.

City of Ichang is about three miles downstream from the Gorge. It is a city of more than 100,000 population.

Facilities shown include: (2) twelve diversion and power tunnels on each side of the Yangtze discharging into tributary streams that join the Yangtze downstream from the dam; (3) a power-house tunnel normal to and above the diversion and power tunnels, housing 48 Grand Coulee capacity power units on each side of the Yangtze, or a total of96 108,000-kw. units; and (4) navigation facilities comprising a single-lock basin extending from the roadway elevation of the dam down to a bottom elevation 30 feet below minimum tail water levelof the Yangtze downstream from the dam.

China Project

(Continued from Page One)

Plans also call for construction of the world's largest hydroelectric plant, with a generating capacity three times that of plants at Boulder, Grand Coulee, and Shasta combined.

China plans to utilize this power production to more fully develop the resources of the valley, repay the estimated billion-dollar cost of the dam, and to raise living standards in the area beyond anything previously existent. The dam will turn the flow of the Yangtze thru 96 Coulee-type 108,000 kilowatt turbine generators nested in tunnels drilled into the solid rock walls of the gorge. All main power facilities except the switchyard will be underground.

A shop-lock of revolutionary design is also under consideration as a means of getting ships past the dam. This would be a ship lift designed to raise or lower loaded ships mechanically a distance of 550 feet. Ships may also be floated through by filling and emptying locks of conventional design. The alternate method of dry - lifting ships past the dam with mammoth gantry cranes has been conceived by designing engineer John Lucian Savage.

"I'll be disappointed if no one says 'it can't be done'," Savage declares.

A 200-foot high tunnel through solid rock leads ships from downstream into the lock basin at river level. While the ship floats in the basin, cables from gantry cranes straddling the top of the lock are dropped down and fastened to the hull. The crane hoists the ship above the dam, moves with it along tracks until the vessel is suspended over the navigation channel and then plunks it back into the water. Ships taking this lift will have to be especially designed and built with strengthened hull and frame. A ship of normal design if suspended in this manner would break or buckle.

Sampans and junks will be gathered into a big corrugated metal tank and hoisted over the dam like a basket of milk bottles.

The lock gates are as revolutionary as the main lock design. Huge in size, 200 feet high, they will operate hydraulically and when closed form a perfect steel arch dam. The outlet gates of the lock basin are designed to withstand the pressure of a 530-foot column of water.

Design and planning work is being done at the Denver office of the Bureau of Reclamation under supervision of Chief Engr. Walker R. Young. Preliminary over-all designs were prepared by John Lucian Savage, until recently chief designing engineer of the Bureau, and world-renowned designer of Boulder, Grand Coulee, and other dams. Savage is participating in the work as consulting engineer for the Chinese Government.

Under the contract with the Chinese Government the Bureau will assist in the preparation of final reports, including review of preliminary studies, hydraulic model tests, stress and stability studies, design studies and cost estimates, and contract designs and specifications.

Chinese engineers and technicians, paid by their own government, are participating. The contract specifies that Bureau work in connection with domestic Reclamation projects in the United States has priority over the Yangtze Gorge project at all times, and that this counttry is no way obligated to assist in either the financing or construction of the project in China.

The navigation facilities include two means for passing ships over the dam, namely, the usual hydraulic method of filling and emptying the lock basin and the mechanical hoisting method using mammoth gantry cranes. The principal features of the structure passing from reservoir to tail water are: (1) the curved entrance; (2) emergency bulkhead slots; (3) bascule bridge; (4) ship channel 230 feet deep; (5) pair of hydraulically operated lock gates 200 feet high; (6) ship lock basin about 580 feet deep; (7) pair of hydraulically operated lock gates 200 feet high at upstream portal of ship tunnel (not shown); (8) ship tunnel 200 feet high extending from lock basin to downstream navigation channel (not shown); and (9) four or more mammoth gantry cranes will serve for the mechanical handling of ships and boats.

ADVANCE CONSTRUCTION REPORTS

ENGINEERING SECTION

(Continued from Page Five)

20-21—SOCIAL AND RECREATIONAL BLDGS.

3/1/46 21
PLANNED

HOLLYWOOD, Los Angeles Co., Calif.—Huber E. Smutz, Los Angeles zoning administrator, has granted Earl Carroll permission to build a new theater on Sunset Blvd. contiguous to De Longpre and El Centro Avenues, for the Radio City Realty Corp. The structure will seat 6000 people and will have a frontage of 204 feet on Sunset Blvd. with a depth of 585 feet.

Preliminary plans are being prepared by Architects Kaufmann, Lippencott & Eggers, 627 S. Carondelet St., Los Angeles.

3/1/46 26
PREPARING SKETCHES

SAN FERNANDO Valley, Los Angeles Co., Calif.—Scherer-Ayers and Associates, architects, 13,111 Ventura Blvd., North Hollywood, are preparing sketches for the development of a new community housing development on a 200-acre tract in the San Fernando Valley, for clients. The project will include a riding ring, clubhouse, store buildings and residences.

34—DAMS, RESERVOIRS & DREDGING

3/1/46 34
BIDS WANTED

BALMORHEA PROJECT, Texas.—Until March 27, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Amarillo, Texas, under Spec. 1186 for construction of earthwork and structures, Phantom Lake canal and inlet feeder canal, Balmorhea Project, Texas. The work is situated in the vicinity of Balmorhea, Texas.

The work involves:

Schedule No. 1—Phantom Lake Canal
(1) 8400 cu. yds. excavation, common, for canal;
(2) 200 cu. yds. excavation, rock, for canal;
(3) 200 sta. cu. yds. overhaul;
(4) 3300 cu. yds. excavation, common, for structures;
(5) 50 cu. yds. excavation, rock, for structures;
(6) 1000 cu. yds. compacting embankments;
(7) preparing 200 sq. yds. of rock foundations ftor concrete lining;
(8) trimming 19,000 sq. yds. earth foundations for concrete lining;
(9) 2000 cu. yds. backfill;
(10) 300 cu. yds. compacting backfill;
(11) 175 cu. yds. concrete in structures;
(12) 1640 cu. yds. concrete in canal lining;
(13) placing 105,000 lbs. reinforcement bars;
(14) 25 sq. yds. dry-rock paving;
(15) 160 cu. yds. rubble masonry;
(16) erecting 2 M ft. b.m. of timber in structures;
(17) laying 240 lin .ft. 15-in. diameter precast concrete pipe;
(18) laying 1360 lin. ft. 27-in. diameter precast concrete pipe;
(19) laying 132 lin. ft. 30-in. diameter precast concrete pipe;
(20) erecting 24 lin. ft. No. 84 metal flume;
(21) installing 2000 lbs. gates and miscellaneous metal work.

Schedule No. 2—Inlet Feeder Canal
(1) 11,500 cu. yds. of excavation for canal;
(2) 160 cu. yds. backfill;
(3) 80 cu. yds. compacting backfill;
(4) 600 cu. yds. compacting embankments;
(5) 22,000 sq. yds. preparing surface for concrete lining;
(6) 80 cu. yds concrete in structures;
(7) 1880 cu. yds. concrete in canal lining;
(8) placing 110,000 lbs. reinforcement bars;
(9) erecting 20 M ft. b.m. of timber in structures.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; W. R. Nelson, regional director, P. O. Box 1609, Oliver-Eakle Bldg., 6th and Polk Sts., Amarillo, Texas, and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the regional director.

Specifications obtainable by prospective bidders without charge; to others, $2, not returnable.

3/1/46 34
BIDS WANTED

ALTUS PROJECT, Oklahoma.—Until March 15, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Altus, Okla., under Spec. 1179 for the construction of earthwork and structures, station 1+00 to station 590+36, west canal, Altus Project, Oklahoma. The work is situated north and west of Blair, Okla.

The principal items of work and the estimated quantities involved are as follows:

(1) 200,000 cu. yds. excavation for canal;
(2) 125,000 sta. cu. yds. overhaul;
(3) 50,000 cu. yds. compacting embankments;
(4) 46,000 cu. yds. excavation for drainage channels and dikes;
(5) 17,000 cu. yds. excavation for structures;
(6) 12,000 cu. yds. backfill;
(7) 7500 cu. yds. compacting backfill;
(8) 2090 cu. yds. concrete in structures;
(9) placing 214,000 lbs. reinforcement bars;
(10) 1500 sq. yds. dry-rock paving;
(11) erecting 30 M ft. b.m. timber in structures;
(12) laying 48 lin. ft. 18-in. diameter concrete pipe;
(13) laying 264 lin. ft. 24-in. diameter concrete pipe;
(14) laying 108 lin. ft 30-in. diameter concrete pipe;
(15) laying 84 lin, ft. 48-in. diameter concrete pipe;
(16) placing 2100 lbs. metal water stops in joints;
(17) installing 14,000 lbs. of gates;
(18) installing 4500 lbs. miscellaneous metal work.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Ceclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; W. R. Nelson, regional director, P. O. Box 1609, Oliver-Eakle Bldg., 6th and Polk Sts., Amarillo, Texas; H. E. Robbins, construction engineer, Altus, Okla., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer.

No charge for specifications to prospective bidders; to others, $2.50, not returnable.

3/1/46 • 34
BIDS WANTED

ALTUS PROJECT, Oklahoma.—Until April 3, 10 A M., bids will be received by the U. S. Bureau of Reclamation, Altus, Okla., under Spec. 1182 for the construction of earthwork and structures, west canal laterals W-6.2 to W-11.5 and sublaterals, Blair laterals and sublaterals, Altus Project, Oklahoma. The work is situated in the vicinity of Blair, Okla.

The principal items of work and the estimated quantities involved are as follows:

Schedule No. 1
West Canal Laterals and Sublaterals, W-6.2, 7.4, 8.4, 9.5 and 10.6
(1) 60,000 cu. yds. excavation for laterals;
(2) 30,000 sta. cu. yds. overhaul;
(3) 3500 cu. yds. compacting embankments;
(4) 1000 cu. yds. of excavation for drainage channels and dikes;
(5) 7000 cu. yds. of excavation for structures;
(6) 6500 cu. yds. backfill;
(7) 4000 cu. yds. compacting backfill;
(8) 600 cu. yds. concrete in structures;
(9) placing 48,000 lbs. reinforcement bars;
(10) 600 sq. yds. dry-rock paving;
(11) erecting 12 M ft. b.m. timber in structures;
(12) laying 188 lin. ft. 18-in. diameter concrete pipe;
(13) laying 892 lin. ft. 24-in. diameter concrete pipe;
(14) laying 356 lin. ft. 30-in. diameter concrete pipe;
(15) laying 56 lin. ft. 36-in. diameter concrete pipe;
(16) laying 192 lin. ft. 42-in. diameter concrete pipe;
(17) laying 116 lin. ft. 48-in. diameter concrete pipe;
(18) placing 400 lbs. metal water stop in joints;
(19) installing 13,000 lbs. of gates;
(20) installing 2000 lbs. miscellaneous metal work.

Schedule No. 2
West 11.3 Laterals and Sublaterals
(1) 51,000 cu. yds. excavation for laterals;
(2) 25,000 sta. cu. yds. overhaul;
(3) 3500 cu. yds. compacting embankments;
(4) 750 cu. yds. of excavation for drainage channels and dikes;
(5) 3200 cu. yds. of excavation for structures;
(6) 3000 cu. yds. backfill;
(7) 1800 cu. yds. compacting backfill;
(8) 425 cu. yds. concrete in structures;
(9) placing 29,000 lbs. reinforcement bars;
(10) 400 sq. yds. dry-rock paving;
(11) erecting 9 M ft. b.m. timber in structures;
(12) laying 268 lin. ft. 18-in. diameter concrete pipe;
(13) laying 836 lin. ft. 24-in. diameter concrete pipe;
(14) laying 204 lin. ft. 30-in. diameter concrete pipe;
(15) laying 290 lin. ft. 36-in. diameter concrete pipe;
(16) laying 60 lin. ft. 42-in. diameter concrete pipe;
(17) installing 17,300 lbs. of gates;
(18) installing 2100 lbs. miscellaneous metal work.

Schedule No. 3
West 11.5 Laterals and Sublaterals
(1) 55,000 cu. yds. excavation for laterals;
(2) 30,000 sta. cu. yds. overhaul;
(3) 2000 cu. yds. compacting embankments;
(4) 3000 cu. yds. of excavation for drainage channels and dikes;
(5) 6000 cu. yds. of excavation for structures;
(6) 5000 cu. yds. backfill;
(7) 3000 cu. yds. compacting backfill;
(8) 470 cu. yds. concrete in structures;
(9) placing 34,000 lbs. reinforcement bars;
(10) 600 sq. yds. dry-rock paving;
(11) erecting 5 M ft. b.m. of timber in structures;
(12) laying 160 lin. ft. 18-in. diameter concrete pipe;
(13) laying 428 lin. ft. 24-in. diameter concrete pipe;
(14) laying 288 lin. ft 30-in. diameter concrete pipe;
(15) laying 100 lin. ft. 36-in. diameter concrete pipe;
(16) laying 420 lin. ft. 42-in. diameter concrete pipe;
(17) placing 350 lbs. metal water stop in joints;
(18) installing 13,500 lbs. of gates;
(19) installing 1600 lbs. miscellaneous metal work.

Schedule No. 4
Blair Laterals and Sublaterals
(1) 94,000 cu. yds. excavation for laterals;
(2) 65,000 sta. cu. yds. overhaul;
(3) 3000 cu. yds. compacting embankments;
(4) 8000 cu. yds. of excavation for drainage channels and dikes;
(5) 10,000 cu. yds. of excavation for structures;
(6) 9000 cu. yds. backfill;
(7) 5000 cu. yds. compacting backfill;
(8) 975 cu. yds. concrete in structures;
(9) placing 77,000 lbs. reinforcement bars;
(10) 1000 sq. yds. dry-rock paving;
(11) erecting 17 M ft. b.m. timber in structures;
(12) laying 436 lin .ft. 18-in. diameter concrete pipe;
(13) laying 1372 lin. ft 24-in. diameter concrete pipe;
(14) laying 492 lin. ft. 30-in. diameter concrete pipe;
(15) laying 160 lin. ft. 36-in. diameter concrete pipe;
(16) laying 180 lin. ft. 42-in. diameter concrete pipe;
(17) layign 196 lin. ft. 48-in. diameter concrete pipe;
(18) placing 600 lbs. metal water stop in joints;
(19) installing 22,000 lbs. of gates;
(20) installing 3300 lbs miscellaneous metal work.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; W. R. Nelson, regional director, P. O. Box 1609, Oliver-Eakle Bldg., 6th and Polk Sts., Amarillo, Texas; H. E. Robbins, construction engineer, Altus, Okla., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer. No charge to prospective bidders; to others, $2.50, not returnable.

3/1/46 34
BIDS WANTED

DAVIS DAM, Arizona-Nev.—Until March 29, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1205 for furnishing and delivering fob cars at the shipping point or fob cars at Louise, Ariz., three gate frames and anchorages for the 50x 50-ft. spillway regulating gates for Davis Dam, Davis Dam Project, Arizona-Nevada. The gate frames and anchorages will be installed by the Government. No charge for copies of the specifications to prospective bona fide bidders; to others, $1.00, not returnable. For particulars, address the Bureau of Reclamation, Denver.

3/1/46 • 34
BIDS OPENED

LONG BEACH, Los Angeles Co., Calif—Standard Dredging Corp., 800 Central Bldg., Los Angeles, submitted the low bid and awarded contract by the Board of Harbor Commissioners of the City of Long Beach, office of E. J. Amar, port manager, 1333 El Embarcadero, Long Beach, February 19, at (1) $.95 per cu. yd., total $76,000, and (2) at $100, for the dredging at channel No. 3, slip No. 5, entrance channel and adjacent to Pier D, Long Beach Harbor.

(1) dredging, transporting and dumping approximately 80,000 cu. yds. of material;
(2) rental of clamshell dredge, completely equipped and manned, unit price per hour.

The bids submitted were:

Standard Dredging Corp., (1) $.95, total $76,000; (2) $100.

Case Construction Co., (1) $.98, total $78,400.

Guy F. Atkinson, (1) $1.35, total $108,000; (2) $55.

CONTRACT AWARDED

SOLANO COUNTY, Calif.—Colberg Boat Works, 41 E. Weber St., Stockton, at $5452.50, awarded contract by state director of public works, Sacramento, for repairing an existing ferry moored on the Sacramento River about 0.5 mile upstream from Rio Vista, Solano County (X-100-A).

38— ELECTRIC LIGHTING TRANSMISSION LINES

3/1/46 38
BIDS WANTED

MISSOURI BASIN PROJ., Wyo.—Until March 29, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Denver, under Spec. 1200 for the construction of the transmission lines and distribution system for the Boysen Unit, Wyo., Missouri Basin Project, as follows:

(a) Approximately 12 miles of 34.5-kv. transmission line from a tap connecting to the existing 34.5-kv Pilot Butte-Thermopolis transmission line to the proposed construction substation at the Boysen dam site.

(b) Approximately 1½ miles of 2,300 volt line from the construction substation at the Boysen dam site to the proposed Boysen Government camp.

(c) The distribution system for the proposed Boysen Govt. camp.

The 34.5-kv transmission line will be connected to the existing Pilot Butte-Thermopolis transmission line at a point in T. 5N., R4E., Fremont Co., Wyo., and will extend in an easterly direction for approximately 12 miles to Boysen dam site, where it will terminate at the proposed construction substation. The 34.5-kv transmission line will be a three-phase, single circuit, 60 cycle, single wood pole transmission line of triangular configuration, using pin-type insulators. The conductors will be No. 1/0 AWG aluminum cable, steel reinforced, or No. 2 AWG, 3-wire, copper conductor, or No. 2 copper equivalent, type 2A, three-wire copper-copperweld conductors. Two disconnecting switches will be installed in Pilot Butte- Thermopolis line, one on each side of the tap, and fuses will be installed in the tap line. The 2,300 volt line from the proposed construction substation at the Boysen dam site to the Boysen Govt. camp will be a three phase, single circuit, 60 cycle, single wood pole line with pin type insulators. The conductors will be No. 2/0 AWG bare copper conductor. The Boysen Government camp distribution system will be of wood pole construction, and the work will include setting of poles, installation of guys, installation of cross arms and insulators, stringing conductors for primary, secondary, and street lighting circuits, installation of distribution transformers on poles, installation of street lighting fixtures, and the installation of service drops to the residences. The conductors for the distribution circuits will be No. 2 AWG and No. 4 AWG weatherproof copper. The work is situated near Shoshone, Wyo.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; H. D. Comstock, Regional Director, P. O. Box 2130, Billings, Mont.; Paul H. Berg, Engineer, P. O. Box 658, 301 Federal Bldg., Cheyenne, Wyo., and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Engineer.

No charge for specifications to prospective bidders; to others, $1.25, not returnable.

BIDS WANTED

RIO GRANDE PROJECT, New Mexico.—Until March 29, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. No. 1198 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Engle, Alamogordo, Tularosa or Socorro, N. M., as indicated in the specifications, the following electrical equipment for the Elephant Butter power plant and the Alamogordo, Hollywood and Socorro substations, Rio Grande Project, New Mexico: four (4) 667/517/233-kv-a., 115,000 delta- to 34,500 delta-/7200/12,470 Y-volt, 3-winding, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor type transformers, each with one single-pole lightning arrester for 34,500-volt, 3-phase, ungrounded-neutral circuit, and one single-pole lightning arrester for 12,470-volt, 3-phase, grounded-neutral circuit mounted on the case; four (4) 500-/200-/400-kv.-a., 115,000 delta- to 34,500 delta-/7200/12,470 Y-volt, 3-winding, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor type transformers, each with one single-pole lightning arrester for 34,500-volt, 3-phase, ungrounded-neutral circuit, and one single-pole lightning arrester for 12,470-volt, 3-phase, grounded-neutral circuit mounted on the case; one (1) 15-kv.-a., 33,000- to 120/240-volt, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor, distribution type transformer with four 2½ per cent taps below rated voltage and with two cover bushings, complete, in accordance with Federal specification W-T-631, except for 33,000-volt primary; two (2) 10-kv.-a., 7200 to 120/240-volt, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor, distribution type transformers, with standard taps and with two cover bushings, complete, in accordance with Federal specification W-T-631; one (1) 90/180-ampere, single-phase, oil-immersed, self-cooled, outdoor type Petersen coil; two (2) 8000-kv.-a. (approximate) 115,000-volt, 3-phase, oil-immersed, outdoor type, iron-core shunt reactors; one (1) 115,000-volt, 800-ampere, 3-pole, single-throw, outdoor type oil circuit breaker with automatic reclosing mechanism; five (5) 34,500-volt, 600-ampere, 3-pole, single-throw, outdoor type, automatic power circuit breakers; two (2) 15,000-volt, 3-pole, single-throw, outdoor type, automatic power circuit breakers; four (4) 115,000-volt, 600-ampere, 3-pole, single-throw, manually-gang operated, horizontal mounting, outdoor type disconnecting switches with manually-gang operated grounding blades; five (5) 34,500-volt, 400-ampere, 3-pole, single - throw, manually - gang operated, horizontal mounting, outdoor type disconnecting switches with manually-gang operated grounding blades; two (2) 15,000-volt, 400-ampere, 3-pole, single-throw, manually-gang operated, horizontal mounting, outdoor type disconnecting switches with manuallygang operated grounding blades; six (6) 115,000-volt, 600-ampere, single - pole, single - throw, hook - operated, vertical mounting, outdoor type disconnecting switches; thirty (30) 34,500-volt, 400-ampere, single-pole, single-throw, hook-operated, vertical mounting, outdoor type disconnecting switches; twelve (12) 15,000-volt, 400-ampere, single-pole, single-throw, hook-operated, vertical mounting, outdoor type disconnecting switches; fifteen (15) 115,000-volt, 200-ampere, single-pole, hook operated, vertical mounting, outdoor type, expulsion-fuse disconnecting switches with eighteen (18) 50E fuse units, nine (9) 20E fuse units, nine (9) 15E fuse units, and nine (9) 10E fuse units; two (2) 34,500-volt, 200-ampere, single-pole, hook-operated, vertical mounting, outdoor type, expulsion-fuse disconnecting switches with six (6) 2E fuse units; two (2) 7500/12,470-volt, grounded wye, 50-ampere, single - pole, hook - operated, angle - mounting, outdoor, enclosed, indicating type fuse cutouts, with fuse holders, hangers and twelve (12) 5-ampere fuse links; four (4) 34,500-volt-insulated 30/60- to 5-ampere, double primary, single - phase, 60 - cycle, oil - immersed, self-cooled, outdoor type current transformers; four (4) 34,500-volt-insulated, 20/40- to 5-ampere, double - primary, single - phase, 60 - cycle, oil-immersed, self-cooled, outdoor type current transformers; two (2) 34,500-volt-insulated, 10/20- to 5-ampere, double-primary, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor type current transformers; three (3) 15,000-volt-insulated 40- to 5 - ampere, single - phase, 60 - cycle, compound-filled, outdoor type current transformers; three (3) 15,000-volt-insulated 50- to 5-ampere, single-phase, 60-cycle, compound-filled, outdoor type current transformers; six (6) 34,500-volt-insulated, 34,500- to 115-volt, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor type potential transformers; six (6) 15,000-volt-insulated, 7200- to 120-volt, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor type potential transformers; two (2) 2-element, 3-phase, 3-wire, watt-hour recording demand meters, four (4) induction-type, overcurrent relays and associated test devices, fuses and terminal blocks, mounted in a weatherproof cabinet; one (1) 3-element, 3-phase, 4-wire, watt-hour meter with contact device, one (1) 2-element, 3-phase, 3-wire, watt-hour meter with contact device, one (1) 2-element, 3-phase, 3-wire, watt-hour recording demand meter, one (1) totalizing, recording demand meter, seven (7) induction type, overcurrent relays and associated test devices, fuses and terminal blocks, mounted in a weatherproof cabinet; one (1) 3-element, 3-phase, 4-wire, watt-hour recording demand meter, one (1) 2-element, 3-phase, 3-wire, watt-hour recording demand meter, five (5) induction type overcurrent relays and associated test devices, fuses and terminal blocks, mounted in a weatherproof cabinet, and nine (9) single-pole, thyrite or autovalve, outdoor, station type lightning arresters, designed for base mounting and suitable for service on 115,000-volt, 3-phase, ungrounded neutral circuits. The equipment will be installed by the Government. No charge for copies of the specifications to prospective bona fide bidders; to others, $2.25, not returnable. For particulars, address the Bureau of Reclamation, Denver, Colo.

PLANS and Speculations

Willows: A $25,000 recreational construction project will be voted on at the April election to deter- wishes of the electorate for a new swimming pool and youth recreational center.

oOo

Klamath Falls, Ore.: A blueprint survey of Klamath Basin's land and water resources has been drafted by federal reclamation bureau officials and a staff will be set up in July to study the basin and its tributaries.

oOo

Anderson: Authority to employ an engineer to survey and estimate the cost of a water district for Anderson was approved recently at a meeting of the Anderson Public Utility District Association. The chamber of commerce was authorized to do the work.

oOo

Paradise: Officials of the Bank of America have announced plans to open a branch bank here within 90 days, structure and furnishings to cost about $25,000. It will be the first bank for this community.

oOo

Fresno: R. L. Cochran, assistant chief of the federal bureau of the budget's estimates division, on tour of Central Valley Projects sites, visited the Friant dam and the Friant-Kern canal last week to absorb first-hand information about VCP problems. Cochran said he hopes to gather information which will be of assistance in resolving any differences which might exist between the bureau of reclamation and the corps of army engineers over the question of what part each is to have in CVP construction.

oOo

Redding: A new Catholic grammar school will be erected on Eureka way between Willis and Rose, Dr. Julius M. Kehoe, chairman of the fund-raising committee, has announced. Further plans for development of the two-acre site are being discussed.

oOo

Reno: Immediate acquisition of a site for the proposed civic center is advocated by Deming L. Tilton, regional planning director for San Francisco, who outlined a plan for constructing the center at a meeting of the city council recently. An auditorium approximately 250 feet square and a large memorial building are included in plans.

oOo

Turlock: Members of the Turlock Elementary School Board are considering plans which may develop into a building program to relieve Turlock's overcrowded school conditions, Harold F. Markley, board president, announced.

Red Cross Veteran's Friend In War or Peace

Red Cross was their friend thru the years of war. And Red Cross still stands hand in hand with the wounded, the man overseas, the returned veteran and his family.

Its war job is only partly finished. And, in order to finish the task, Red Cross will ask San Francisco to contribute $1,547,000 as its share of the 1946 Red Cross fund which opens March 1.

Jean C. Witter, chairman of the successful 1945 drive, again is general campaign chairman for San Francisco and has as his aides most of the committee heads who assisted him last year. These leaders are eager to give their efforts because of their appreciation of the vital services performed by Red Cross and of the necessity of continuing them.

Several thousand Red Cross field workers remain on foreign duty

SYMPOSIUM TO BE HIGHLIGHT OF SEA MEETING MARCH 5TH

A symposium on "Building Codes and Their Relationship to Modern Construction", will be a feature of a joint meeting with architects of the Structural Engineers' Association, Tuesday, March 5, 5:30 p. m., at the Engineers' Club, 206 Sansome St.

The following speakers will give 15-minute talks: (1) Mark Falk, "An Approach To A National Solution of the Earthquake Problem"; (2) Vincent Raney, "Conflicting And Overlapping Regulations Affecting Building Design"; (3) Harold Engle, "Suggestions For Improvement of Fireproofing Requirements In Building Codes". L. Harold Anderson, President, California Railroad Commission, will act as moderator.

Because of limited seating capacity, members are asked to return their dinner reservation cards immediately. Dinner will be served at 6:15 p. m., with the program starting at 7:30 p. m.

Electrical Ideas Booklet In Color

For consumers, architects, builders and contractors, a new "Electrical Living" booklet illustrated in color, with scenes from the Walt Disney production "The Dawn of Better Living" is announced by the Westinghouse Electric Corporation for distribution through utilities and dealers.

The 40-page booklet contains many practical ideas on planning and equipping kitchens, laundries and other rooms, and outlines four degrees of electrification according to the size and type of home. New ideas for lighting beauty and comfort are included. Wiring essentials are listed and discussed, and the booklet stresses the necessity for planning wiring adequate for immediate and future electrical needs.

Copies are available to utilities and dealers at 10 cents each from any Westinghouse distributor.

Price Increase Authorized by OPA For Small Boilers

The Steel Boiler Institute, Inc., announces that it has received from the Office of Price Administration an increase of 14 per cent in ceiling prices which were frozen October 1, 1941. Effective Feb. 16, under Amendment 10 to Order 48 of MPR-591, this increase applies to any steel boiler designed to operate at less than 100 pounds steam pressure per square inch; also to sub-assemblies, jackets, repair and service parts specifically designed and produced as a sub-assembly, repair or service part for use on or in connection with a low pressure steel boiler.

Steel Boiler Industry figures show an average increase of 32.94 per cent in basic wage rate schedules since October 1941, and 13.07 per cent increase in material prices during the same period.

The increase in ceiling prices, therefore, is an effort to adjust current costs so as to permit many manufacturers of residential and low pressure steel boilers to produce these items without the losses which some of them have recently sustained. It will also stimulate the production of residential steel boilers which are so badly needed for the President's Veterans' Housing Program, and the volume production of which has been retarded by the prohibitively high costs of producing them.

For Better Building - - New Plan Stops Electrical Job Chiseling

Protection to the electrical contractor who bids competitively on jobs is assured now through the organization of the Electrical Industry Depository of California, a group designed to further the interest of fair and better business practices in the electrical trade.

The following article explains the reasons for the existence of this group, how they operate and what it means to electrical contractors. It protects the building public as well as mutually benefiting the building industry and the electrical contractor.

WHAT IT IS

Under California state law (The Unfair Practices Act) a procedure is set up wherein a large majority of a service industry may be called together and under legal procedure set up regulations which will eliminate a practice that is detrimental to the public and the trade. Under such law the Electrical Industry Depository of California was established; a non-profit, completely independent organization, and its membership is open to anyone. Membership becomes automatic with the filing of a bid with the Depository, no other requirement being necessary, except compliance with its by-laws. The entire process is handled by an absolutely independent agency, having no connection with any association or union.

WHAT IT DOES

By establishing a definite closing time for the receipt of bids and then, after that closing time ONLY, making a public declaration of what the bids are, it discourages the wasteful and unfair practice known as "bid peddling" or "bid shopping." In governmental public works this fixed time and place for bid opening and publishing is established by law. Hence no need exists for electrical contractors to use the Bid Depository in bidding direct to the government, or on private work where the bids are opened in the presence of the bidders. The filing of bids extends to private work this same government process that is fair to all.

WHAT IT MEANS

To the public, to architects and builders, this means that you get the lowest bids possible and you get them first, without the need for sebsequent horse-trading. Under fair bidding practice the public can expect an honest dollar value for electrical work.

To the bidder it means the same fair treatment accorded on public work. It insures that the considerable time and expense he goes to in order to prepare a bid at a fair price gives him a just chance under honest rules to get the work. No one, in fairness, should ever ask a contractor to bid to whom he would not be willing to award the work if his bid is low.

HOW THE OBJECTIVE IS ACCOMPLISHED

A member bidding on a job must secure a definite Closing Time, Date and Place for the receiving of bids. This Closing Time is verified by the Custodian and all bidders are notified to file copies of their bids with the Depository. The Filing Time deadline in a case where the bidding is direct to the owner is two hours prior to the Closing Time set. In the case of a general contractor, where the Closing Time is in the a.m., the Filing Time deadline is at 4:00 p.m. the previous day, and where the Closing Time is in the p.m. the Filing Time deadline is at 9:00 a.m. the same day. After bids have been opened by the owner or his agent, the Custodian will open the filed copies of the bids deposited and furnish each bidder with a tabulation of all bids submitted. Registering or depositing of bids in the Depository is not required where bids are publicly opened and tabulated.

Further information, if required, may be obtained by calling the Custodian of the Electrical Industry Depository of California, 660 Mission Street, San Francisco 5. Telephone YUkon 0553.

GROOVER AND I

LEST WE FORGET

Remember the Bretton Woods Agreement and the International Monetary Fund? You should—it cost you about seven billion dollars!

* * *

As I understand the double-talk of international finance, the Bretton Woods Agreement was to stabilize the exchange of the signatory nations. Then the International Monetary Fund was to permit "slight inflation" or limit the change in established value to 20 per cent.

* * *

Nothing was said about, nor recognition taken of, the Official Black Market which is a recognized and thriving industry in all other countries.

* * *

When inflation becomes rampant, attempting to control the black market is about like trying to pick up a drop of quicksilver with your fingertips.

* * *

This isn't critical of France; it is merely using the French franc to illustrate the figures:

* * *

Under the Bretton Woods Agreement, the franc was stabilized at 119 per U. S. dollar. Under the monetary pact, the exchange was increased to 143 francs per dollar.

* * *

At the time of the Bretton Woods Conference, the French franc was selling in the open black market at 250 per dollar.

* * *

Latest report indicates that the exchange is not less than 300 per dollar.

* * *

Here is the little deal in "sweetness-and-light" arranged by our State Department: **Millions of our soldiers in France were paid in French franc at the rate of 50 per dollar!**

* * *

This means that for the $50 we thought we were paying our GI's, they were receiving, instead, 2,500 frances and their purchases were at French inflated prices.

* * *

Had the GI been paid 50 U. S. dollars, he could have gone around the corner to Pierre's Place and bought 12,500 francs!

Veterans' Guide Published For Construction Field

A complete thorough analysis of opportunities for veterans in the construction industry has been printed in booklet form titled, "Opportunity Unlimited—A Guide for Veterans Interested in the Construction Industry", and is now available to veterans.

Although the 56-page booklet was prepared specifically for veterans, it is of sufficient interest to capable men in the construction industry to warrant inquiry by them.

It is distributed by E. L. Chandler, Secretary, Room 703, Defense Building, 1026 17th Street, N.W., Washington, D. C., who will mail it upon receipt of 10 cents in coin.

Chapters are devoted to the problem of returning servicemen, those interested in acquiring a new trade, persons who wish to take advantage of the apprentice training program and learn the construction industry, "GI's" interested in starting their own business, professions in the construction industry, and information pertinent to the employers' viewpoint and problems in handling returned veterans.

"Opportunities in the industry are greater than ever before," the booklet states, "not only because of prospects for greatly increased construction activity, but also because of the special benefits extended to honorably discharged veterans by legislation which, on the federal level, offers various forms of educational and vocational assistance, loan guarantees to help veterans get started in small business, and veterans' preference in old jobs.

"In many cases," the booklet continues, "such assistance will enable the veteran to train himself for work in the industry and to get started on a sound basis.

"Because all signs in the construction industry point to a greatly increased volume, the industry offers a variety of opportunities to veterans anxious to start small manufacturing plants, go into distribution, work on construction projects, or prepare themselves for technical and professional fields."

NOTICE

The Paulson Lumber Sales Agency, 681 Market Street, San Francisco, is continuing business as usual until further notice, following the recent death of Arthur M. Paulson.

Wanted

ARCHITECTURAL DRAFTSMAN, to work for long established ARCHITECTURAL FIRM. Applicant must be experienced in all types of DESIGN and WORKING DRAWINGS. High salary, ideal working conditions. Centrally located in East Bay. Reply Box 228-A c/o Daily Pacific Builder.

COMPLETE BIDS
OROVILLE to Sacramento, Calif. As previously reported, H. H. Walker, Inc., 1816 S Grand Ave., Los Angeles, and P. O. Box 389, Ellensburg, Wash., at $281,760.70 submitted low bid to the Bureau of Reclamation, Denver, Feb. 25, for construction of a 230-kilovolt transmission line from Oroville to Sacramento; Spec. No. 1152.

The transmission line, approximately 56 miles in length, will be a 230,000-volt, 3-phase, 60-cycle, 3-wire, single-circuit of steel-tower construction. The towers will be from 60 feet to 110 feet in height. The conductors for the line will be either 795,000-circular mil aluminum, steel reinforced, or 500,000-circular mil expanded type copper. Two transpositions will be constructed in the line. The tower footings will be of the reinforced concrete type.

Bids were taken as follows:
(1) lump sum, clearing land and right of way;
(2) 3000 c.y. common excavation for foundations;
(3) 600 c.y. rock excavation;
(4) 1800 c.y. place concrete in tower foundations;
(5) 240,000 lbs. furnish, fabricate and place reinf. steel in tower foundations;
(6) 75,000 lbs. place steel stubs for tower foundations;
(7) 4,500,000 lbs. erection of towers complete;
(8) 56 3-phase circuit miles of line stringing 500,000 circular mil-segmented hollow-copper conductors;
(9) 858 assemblies, assemble and attach single string suspension insulator assemblies with 16 insulator units;
(10) 36 assemblies, same as above, double string;
(11) 60 assemblies, same as above, double string with 17 insulator units per string;
(12) 56 miles of line stringing, 2 ½-in. galv. steel overhead ground wires;
(13) 350 posts, place fence, ground posts and grounding fences.

Total bids were:
(A) H. H. Walker, Inc., Los Angeles, $281,760.
(B) nderground Constr. Co., Oakland, $426,883.
(C) Stolte, Inc., Oakland, $487,616.

Official Proposal

FIRST PUBLISHED TODAY

Purchase of One Stage Control Board of the Modified Preset Type and Appurtenees.

NOTICE TO BIDDERS

NOTICE IS HEREBY GIVEN that sealed bids will be received by the High School Board of the John Swett Union High School District of the County of Contra Costa, State of California, at the schoolhouse of said District until eight o'clock P.M. of Tuesday, the 19th day of March, 1946, and opened at said time and place for the purchase of one stage control board of the modified preset type, consisting of a composite pilot board and dimmer bank, a circuit breaker panel, a cross connecting panel and a magnetically operated contactor board. Entire board shall be designed for operation on 230/115 volt, 60 cycle alternating current.

Plans and specifications for this control are on file in the office of the Clerk of the High School Board of said District in the High School Building in Crockett, California.

All bids must be accompanied by a certified check on some solvent bank, or cash deposit equal to ten percent (10%) of the amount of the bid, conditioned that if the contract is awarded to the party submitting the accepted bid, he will enter into a contract and furnish such bonds as may be required by the Board within five (5) days after notice of such award, or failing to do so, the amount of such deposit or certified check to be forfeited as liquidated damages for such failure. All checks shall be payable to the order of the John Swett Union High School District.

The High School Board reserves the right to reject any and all bids, and to waive any formality in any bids received.

By order of the High School Board of the John Swett Union High School District of Contra Costa County, California.

Dated: Crockett, California, February ...., 1946.

J. F. MERCHANT,
Clerk of the High School Board of the John Swett Union High School, Contra Costa County, California.

Red Cross

(Continued from Page One)

and many will stay there until the last American soldier is brought home. In the military camps and hospitals in this country thousands of other workers wear the tiny red emblem that is a sort of magic symbol to those in pain. Tens of thousands of wounded are still in these hospitals—and will be there longer than you think. And Red Cross will stay there, too, with its arts and skills, its recreation and welfare programs, its Gray Ladies.

For the veteran with the snarled family problems, with financial troubles, Red Cross must provide guidance and help on the largest scale in the organization's history. The parades are over but not the veteran's problems.

At the same time Red Cross must assume peacetime obligations that should be curtailed no longer now that the war has ended. Disaster relief, home nursing, first aid—all vital community services—will be expanded to meet increased civilian needs.

Some idea of the task confronting Red Cross may be obtained any day at the docks where thousands of returning servicemen stream across the piers and are met, day and night, by the Red Cross volunteers. Since the first year of war, Red Cross canteen workers have seen off every transport, giving a parting wave and some small comfort to the men going out to fight. And today, Red Cross remains at the docks, serving as many as 30,000 of those same men a day as they return. Red Cross truly is San Francisco's hospitality committee. At Christmas when shiploads of high point veterans were tied up at the piers, stranded here, Red Cross set up emergency canteens and worked the clock around. For every returning soldier, for every wounded man there was a Christmas gift.

The war record of San Francisco Red Cross was really a testimonial to a city's heart. Foremost in homefront activities was the Blood Donor Service which produced over 700,000 pints of blood and plasma. No city in the country contributed so generously of its own self in relation to population as did San Francisco. In this city 10,000,000 surgical dressings were prepared by Red Cross volunteers. Its Motor Corps has driven two million miles on vital missions for the military, the blood service, and those never-ceasing dock activities.

On the lager scale, American Red Cross proudly presents a magnificent national and world record:

Sixty million dollars in loans and grants to servicemen and their families since war began;

Almost nine million servicemen and their families assisted by various chapters;

Twenty-seven million prisoner of war packages produced in chapters throughout the nation;

More than 25,000,000 items sent to Army and Navy stations in the United States;

More than 50,000,000 persons in 41 countries given $150,000,000 in civilian war relief.

And this gigantic task of dispensing mercy goes on. One hundred million dollars is needed "to keep Red Cross at his side in 1946"—in the hospitals, in bases overseas, on the streets at home. Local Red Cross leaders are confident that San Francisco, as always, will do its share. Truly it is said that the war is never over for Red Cross.

Fifty-sixth Year—Vol. 56—No. 44 SAN FRANCISCO, TUESDAY, MARCH 5, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

San Francisco: The state public works review board has allotted $12,603 to San Francisco for preparation of plans for two major street projects. The allotment includes plans for a $245,000 widening and improving of Monterey boulevard, and for designing a $220,000 viaduct to carry Mission street traffic across Alemany boulevard. The allocated money will come from the $10,000,000 state fund, and be matched by city funds.

oOo

Washington: An appropriation bill before the House asks for $1,300,000 for additional work on the Deschutes project in Oregon, enabling building of laterals to serve the last 6500 acres in the first unit of the irrigaton project. Another $500,000 was asked for work on the Klamath project to develop the Tule Lake division in Northern California, Michael D. Straus, reclamation commissioner, revealed.

oOo

Sacramento: The purchase of a new prison site near Soledad, in Monterey county, was recommended to the state property acquisition board late last week. A $300,000 appropriation is available for land purchase and $4,000,000 for construction.

oOo

Corcoran: Construction on a new airport, two and one-half miles north of this city, has started with a 3,000-foot runway planned and other buildings necessary to operate a flying school. E. A. Harvey, former Army flight instructor, and his brother, W. C. Harvey, manager of Corcoran Hardware Company, will operate the airport.

oOo

Paso Robles: A war memorial hospital will be built on Terrace hill, directors of the hospital district announced last week. Nearly $20,000 in cash and notes has been collected to defray additional excavation expenses because of the hilly site.

oOo

Napa: Call for bids on a 700-bed state hospital are being held up pending receipt of new orders from Washington, D. C., regarding the restrictions of building materials, W. K. Daniels, assistant state architect, revealed in Sacramento.

oOo

Pasadena: Capacity of the famed Rose Bowl will be increased to 116,000 seats, making it the largest stadium in the country, Chas. A. Strutt, tournament chairman, has announced. The 20,000 seats to be added will be installed at either the rim or at the bottom of the deepened bowl.

Gold Medal, $1,000 Award In Plastics Achievement Contest

Entries for the 1946 John Wesley Hyatt Award for outstanding achievement in the plastics industry will be accepted until March 15, William T. Cruse, secretary of the award committee, announced today.

The award of a gold medal and $1,000 is sponsored by Hercules Powder Company and was created five years ago to honor the individual who, in the opinion of the judges, has made an outstanding contribution to the plastics industry during the preceding year.

"Any person, whether he be a molder, tool-maker, laboratory technician, executive, or engaged in any other capacity, is eligible to submit one or more entries, Cruse said. Entry blanks are available at committee headquarters, 295 Madison Avenue, New York 17, New York.

William I. Beach, chief plastics engineer, North American Aviation, Inc., won the award last year for his research and development on the process of post-forming phenolic laminates, which helped increase production and improve performance of airplanes through the replacement of metals with plastics.

The five points which determine eligibility of the award are:

(1) Its practicability, with special reference to availability of materials and production equipment, and to restrictions in fields of application.

(2) Degree of permanence of the development, and the scope for further applications in the plastics industry and similar fields.

(3) Importance of the achievement to the plastics industry in the year for which the award is given, regardless of the year of its conception.

(4) Potentials of the development in future years.

(5) Ingenuity required in the development of the achievement.

Included on the award committee are prominent engineers, designers, chemists and researchers including Charles F. Kettering, vice president in charge of research, General Motors Corp.

GROOVER AND I

UNO NEEDS MORE "NO"

When UNO was in the maternity ward in San Francisco, it contracted infantile paralysis. This was caused by Molotov's insistence that there be a "one-vote veto", or he would pick up his marbles and go home.

* * *

Later, at the Yalta "strip-poker game", Russia demanded and got three votes: One for the Soviet and one each for the Ukrane and White Russia.

* * *

This would have justified Britain asking one vote for England and one each for Scotland and Wales; and our asking one vote for the United States and one each for California and Texas.

* * *

Why should Russia not continue to make demands so long as these demands are always granted? Russia pounds the table and growls—and we immediately pass hunks of appeasement served on our best Spode.

* * *

Russia asks for "more pie"—instead of telling her she has had her half of the pie, the appeasers have trembled, backed up, and said: "Yes sir, right away; do you want it with whipped cream or cheese on the side?"

* * *

Senator Arthur H. Vandenberg, member of the UNO Assembly, has just returned from a spell of being pushed around in London. He has "laid it on the line" and stated that the time has come for us to adopt a strong and positive attitude.

* * *

A 27-word quote summarizes Vandenberg's report: **"I assert my own belief that we can live together and in reasonable harmony if the United States speaks as plainly on all occasions as Russia does; . . ."**

* * *

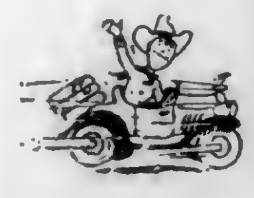
The Michigan Senator can find good precept for an attitude of honest and forthright firmness.

* * *

Over nineteen hundred years ago Jesus Christ, the Prince of Peace, stated: (St. Matthew, 5:37): **"But let your communication be Yea, YEA; Nay, NAY; for whatsoever is more than these cometh of evil."**

* * *

Bombastic table-pounding is not necessary. If we take a firm stand for the Right "As God gives us to see the Right" we can slowly climb back up the slippery, muddy hill of appeasement and regain our national self-respect—after which we may gain the respect of other nations.



Mill Ceiling Prices Of Hemlock and Fir Adjusted by OPA

Adjustments in the mill ceiling prices of Douglas fir, western hemlock and true fir lumber are in effect today, the OPA has announced.

The action does not increase costs to builder and home owner, the OPA warned, as the margins of retail distributors are ample to absorb the increase to an extent which will hold the average level of prices to that existing before the increase.

Ceilings on some items will be increased and reduced on others, resulting in an average increase of approximately $1.10 per 1000 board feet, or three per cent over present average realizations.

Today's action is designed primarily to stimulate production of lumber items urgently needed for postwar residential construction, the OPA said. The directive does the following:

(1) Increases prices for basic grades of lumber used in residential construction, other than common boards, from $2 to $10 per 1000 board feet.

(2) Eliminates premiums for special grade and grain specifications which were seldom charged before the war but which have been charged considerably during the war. The premiums eliminated range from I1 to $6 per 1000 board feet and largely offset the price increases granted in the basic construction grades.

(3) Lowers the ceilings on some items not used in construction which are cut from the same part of the log as certain construction items, such as flooring.

(4) Makes other changes in prices designed to bring them in proper relationship to peace-time demand.

(5) Scales down the ceilings for off-standard fractional widths and thicknesses. In Tables 2, 3, 4 and 11, the footnotes pricing odd or fractional widths and thicknesses now require that footage shall be computed on the nominal fractional rough size.

In explaining today's action, OPA pointed out that before the war clear grades of Douglas fir were normally cut into flooring, ceiling and siding which are used extensively in the construction of homes. During the war, however, there was vital need to cut clear grades of Douglas fir into ship decking, pontoon lumber, and finish and thick clears. Price ceilings have, accordingly, made the cutting of wartime items more profitable than the less urgently needed home construction items.

The end of the war reversed the demand for Douglas fir items. Today's increase in the ceilings of basic grades of Douglas fir is expected to stimulate production of construction fir items, OPA said.

Today's price changes were determined after a series of consultations with representatives of the Douglas fir industry, OPA said, and affect dimensions, plank and small timbers, timbers, flooring, ceiling, finish and clears, thick clears, car lining, roofing, siding, ship decking and margin pieces, and pontoon lumber.

A.I.A. Favors Continued OPA Price Controls

The American Institute of Architects shares the desire of most Americans to get rid of the restrictions involved in price control. We should, as soon as possible, allow prices to be based on the operation of a free competitive market. In the construction industry there are many commodities in which there is a very wide gap between supply and demand.

The sudden removal of price controls for these commodities would probably result in price distortions that would be more serious than the present restrictions.

For this reason we favor a continuation of OPA for a limited period with the proviso that there be a continual re-examination of the relationships between supply and demand and that price controls be gradually and continuously removed as soon as the gap between supply and demand for individual commodities has been sufficiently reduced. This might be done on an experimental basis, at first, with respect to items that would not seriously affect the prices of other commodities.

In the meantime, price levels should be established on a basis that will assure full production of the commodities involved, since that is the only ultimate protection against inflation.

Subject to the above limitations, we believe that Congress should immediately renew the authority of the OPA. The possibility of serious changes in or even abolition of the OPA at the expiration of the present Act on June 30, necessarily results in creating uncertainty and has a tendency to inhibit production.

Congress should remove these uncertainties by a prompt decision with respect to continuation of OPA controls.

Bethlehem Erects New Steel Depot

Without fanfare and while some strike-bound Bay Area industries were marking time, one of the speediest steel erection jobs recorded in these parts was taking place at 3rd and Mariposa streets. Here, a 4-acre plot of ground suddenly became a beehive of activity as a seasoned crew of steel erectors from the Bethlehem Pacific Coast Steel corporation started placing the steel columns for a new mill depot for the Bethlehem-Pacific company. The entire steel framework, consisting of five 86-foot wide bays, each 375 feet in length and covering four acres, was erected in 17 working days.

The 1250 tons of structural steel used in putting up the steel framing for the building had been fabricated at the Alameda Works of Bethlehem-Pacific's Steel Construction division. During these preliminary operations, the foundations had been placed to support the structural steel framing members of the building.

Laying of the 170,000 square feet of steel roofing for the building is now nearing completion. Brick masonry work on the front wall of the building is finished. The mill depot is expected to be ready for occupancy by May 1. It will be operated under the direction of W. C. Eshelman, General Superintendent of Bethlehem-Pacific's South San Francisco steel plant.

The methods employed for decades by steel fabricators in prefabricating and partly assembling the structural steel before actual erection are very similar to the mass production shipbuilding operations which were so widely publicized during the war. Many of these improved production methods were pioneered by Bethlhehem's Fabricated Steel Construction division and later adapted to shipbuilding practice in Bethlehem shipyards.

Use "Builderads"— They Bring Results

Arthur A. Hood Featured Speaker At P. C. Luncheon

"A Challenge to the Construction Industry", was the subject of a talk made yesterday by Arthur A. Hood, director of dealer relations of the Johns-Manville Sales Corporation before the Northern California chapter of the Producers' Council and their prospective new members in a meeting at the Palace Hotel, San Francisco.

Hood's talk was based on experiences of his long and active career in the building industry. He claims he was "born in a lumber yard" and has spent 15 years of his business career as a retailer, five years as a wholesaler, and 12 years in the manufacturing branch of the building industry.

His keen interest in distributor problems is shown by his chairmanship of the marketing committee of the Producers' Council, Inc. He is also chairman of the educational committee of the National Homes Foundation, a member of the distribution committee in The American Marketing Association, Society for the Advancement of Management, and the National Association of Manufacturers. He serves as chairman of the joint committee of research, education and marketing for the building industry.

His hobbies include the study of economics, and, with a very human touch, fishing, poker and golf.

BIDS POSTPONED

ROUGH AND READY ISLAND, near Stockton, San Joaquin Co., Calif. —Until March 14, 11 A. M. (postponed from March 12), bids will be received by the officer in charge of construction, U. S. Naval Supply Annex, Rough and Ready Island, Stockton, under Spec. 17620, NOy 13469, for reconstruction of railroad tracks at the U. S. Naval Supply Annex, Stockton.

Work consists of replacement of approximately eight track miles of worn rails, switches, etc., with new or acceptable relayer rails and accessories complete and ready for use.

The existing 70-, 72-, 75-lb. rails, turnouts, etc., are to be removed and replaced with new 75-lb., new 90-lb. or acceptable 110-lb. relayer rails and accessories. Spike holes in ties will be plugged and defective ties replaced. Track will be brought to grade and ballast properly retamped. Material removed will remain the property of the Navy and will be placed in a nearby storage area on the Naval Supply Annex, Stockton, by the contractor, Alternate bid items will be included for supplying and installing new 75-lb. rails and turnouts, new 90-lb. rails and turnouts or 110-lb. relayer rails and new turnouts and a separate bid item will be called for on cost per unit tie for removing the defective ties and furnishing and installing new ties.

Bids will be asked as follows:

(1) work complete using new 90-lb. rails, fittings and accessories;
(2) work complete using new 75-lb. rails, fittings and accessories;
(3) work complete using 110-lb. relayer rails, fittings and accessories;
(4) price per tie for removing any existing defective ties which are part of the track to be reconstructed and furnishing and installing new ties.

A copy of plans and specifications are on file for examination at the office of DAILY PACIFIC BUILDER, 465 Tenth St., San Francisco.

As previously reported, the following contractors have taken out plans:

Sharp & Fellows Construction Co. and Wm. A. Smith, 593 Market St., San Francisco.

$3,500,000
ANNUAL SAVINGS TO NATURAL GAS USERS
Yes sir, that's right! Natural Gas rates go down again.

Living costs have gone up and UP, Natural Gas—down and DOWN

Since August 1939 the cost of living here has gone up 35 per cent. In this same period of rising costs the average price of Natural Gas in your home has dropped 33 per cent.*

*This 33 per cent includes the 10.3 per cent Natural Gas rate cut effective after February 28. There were other Gas Rate cuts in August 1939—in October 1940 and in February 1943.

At the new reduced rates, the cost of Natural Gas is more than one-third LOWER than it was in August 1939, while general living costs are one-third HIGHER.

For example: Most any household item that cost $3.00 in 1939, now costs $4.05—BUT an amount of Natural Gas that cost $3.00 in 1939 now costs only $2.00.

It is a tremendous job to keep ahead of Northern California's growth and demand for low cost Natural Gas. It takes an experienced organization and a lot of money. But your gas company is going ahead earnestly and eagerly in the American spirit of giving the public more and better service than ever before.

COMPLETE BIDS
CENTRAL VALLEY PROJECT, California—The Bureau of Reclamation, Custom House, Denver, Colo., received bids February 28 for the furnishing and delivering f.o.b. cars at Coram and Redding, Calif., or f.o.b. cars at shipping point, at the option of the bidder, fabricated structural steel for the 230-kva. switchyard, Shasta power plant, and 230-kva. switchyard and 230-kv. transformer circuits, Keswick power plant, Kennett Division, Central Valley Project, Calif.: Specification 1160. The structures will be erected by the government.

The bids were:

Charles Shuler Manufacturing Co., Newark, Ohio, (1) $750, (2) $43,125, (3) $450, (4) $19,125, (5) $2700; total, $66,150, f.o.b. Newark, Ohio.

Bethlehem Pacific Coast Steel Corp., San Francisco, (1) $850, (2) $42,320, (3) $510, (4) $22,822.50, (5) $6740.50; total, $73,257.90, f.o.b. San Francisco.

American Bridge Co., Denver, Colo., f.o.b. Pittsburgh, (1) $970, (2) $48,300, (3) $582, (4) $24,225, (5) $3096; total, $77,173, f.o.b. Pittsburgh.

Kaiser Co., Inc., Richmond, Calif., (1) $876, (2) $50,370, (3) $525, (4) $22,338, (5) $3153.60; total, $77,263.20, f.o.b. Richmond.

Nashville Bridge Co., Nashville, Tenn., (1) $1000, (2) $54,625, (3) $600, (4) $25,500, (5) $3240; total, $84,965, f.o.b. Besemer, Ala.

Lehigh Structural Steel Co., New York, (1) $1058, (2) $60,825, (3) $6034, (4) $26,979, (5) $2541.60; total, $92,048.40, f.o.b. Allentown, Pa.

Emsco Derrick & Equipment Co., Los Angeles, (1) $1115, (2) $64,112.50, (3) $669, (4) $28,432.50; total, $89,631, f.o.b. Los Angeles.

Monarch Iron Works, San Francisco, (1) $1090, (2) $69,000, (3) $900, (4) $30,600, (5) $4320; total, $106,320, f.o.b. San Francisco.

43— MACHINERY AND EQUIPMENT

3/5/46 • 43
NOTICE OF SALE
SACRAMENTO, Calif.—Until Mar. 11, 3 P. M., bids will be received by the State Division of Highways, R. H. Stalnaker, equipment engineer, 1805 34th St., Sacramento, for sale of the following equipment:

CHC 6131 truck, FWD, 3-yd. steel dump body and hydraulic hoist; 1936 Model S. S. D. OPA ceiling $2686.44.

CHC 887 tractor, Allis - Chalmers diesel, Model H.D.7. Electric lights; OPA ceiling, $2813.30.

CHC 187 with bulldozer, trailbuilder, 12-ft. blade, single drum, cable operated; OPA ceiling $663.

CHC 9 oil-heater, portable, type 15-h.p., locomotive boiler, 5¼x3½x15-in. duplex steam pump, fuel 8 water tank, all on four-wheel RT trailer; OPA ceiling, $793.18.

CHC 19 harrow, two-gang 6-ft. 9-in. width cultivator, 18-24-in. discs w/ scrapers, bar attached for right or left - hand turning; OPA ceiling, $182.09.

CHC 12 harrow - cultivator, 6-ft. Dyrr Jr. Model L.M. with 15-⅞-in. spring teeth; OPA ceiling, $68.37.

CHC 384 drill for rock, Chicago Pneumatic CP No. 32, jackhammer type, dry; OPA ceiling, $108.73.

CHC 443 kettle, asphalt, Littleford heavy duty, 75-gallon capacity, torch type burner, 20-gallon fuel tank, 2-wheel pneumatic tires; OPA ceiling, $155.38.

Compressor, Rix, single-stage upright, size 6x6-in. with belt tightener; OPA ceiling, $200.

Vises, two 4½-in. and 5½-in. jaw, machinist type; OPA ceiling, $30.

12 engine blocks, 10 with crankshafts, for Ford, Chevrolet, Plymouth and Pontiac automobiles; also various other parts for each.

3/5/46 • 43
BIDS WANTED
CENTRAL VALLEY PROJECT.—Until April 24, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, chief engineer, Denver, Colo., under Spec. 1220, for furnishing and installing three drum gates for the spillway at Shasta Dam, Kennett Division, Central Valley Project. The Shasta Dam is situated on the Sacramento River near Redding.

The drum gates will be installed between piers in the spillway section of Shasta Dam and when installed will be structural-steel buoyant vessels forming modified sectors of cylinders having an approximate radius of 26 feet and an axial length of 110 feet. Each gate will be pivoted along its axis on castings anchored in the crest of the spillway.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; R. L. Boke, Regional Director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; I. C. Harris, Acting Construction Engineer, Redding, Calif., and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Acting Construction Engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.00 per copy, not returnable.

3/5/46 • • 43
BIDS WANTED
CENTRAL VALLEY PROJECT.—Until April 9, 2 P M., bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1223 for furnishing and delivering fob cars at the shipping point or fob cars at Coram, Calif., at the option of the bidder, three 15x19.05-ft. coaster gates for installation at the intakes of three of the penstocks at Shasta Dam, Kennett Division, Central Valley Project. The rubber sealing strips for the gate seals will be furnished and installed by the Government. The coaster gates will be installed by the Government.

No charge for copies of the specifications to prospective bona fide bidders; to others, $1.25, not returnable.

3/5/46 • 43
BIDS WANTED
RIO VISTA, Solano Co., Calif.—Until March 14, 7:30 P. M., bids will be received by the Rio Vista Joint Union High School District, Mrs. D. C. McCormack, Clerk, Rio Vista, for one Crown super coach model A-477-10, 73 - high school passenger school bus equipped with Model 135 Hall-Scott engine.

PLANS and Speculations

Butano Park: The state division of beaches and parks has appointed John Hennessey, formerly with the purchase department of the city of Los Angeles, to the job of facilitating negotiations for the purchase of Butano Forest in San Mateo county as a state park. The land will be acquired under two appropriation bills, totaling $15,000,000, passed by the legislature.

oOo

Redwood City: San Mateo county officials ar econtemplating a multi-million dollar highway expansion program which is being discussed with city and state officials.

oOo

Oakland: Approval of the DeLeuw, Cather & Co. recommendation as to the "most feasible solution to congested traffic conditions over the 12th Street Dam" was postponed indefinitely by the City Council last week at the conclusion of a 2½-hour public hearing. By a 7-to-1 vote, the council referred to the "committee of the whole" a resolution approving the plan, "subject to such refinements in engineering details as may be necessary."

oOo

Santa Clara County: Recommendations for a primary sewage treatment plant for the district that includes San Jose, Santa Clara and Campbell will be submitted to the Santa Clara County Board of Supervisors at a meeting early this summer, according to Dean George L. Sullivan of the University of Santa Clara engineering school, in his report on the county-wide sewage disposal survey he has made in collaboration with Prof. Charles Gilman Hyde of the University of California. This would consist of a clarifier for sludge digestion and thousand-acre oxidization ponds in the tidelands at the southern end of San Francisco bay.

oOo

St. Helena: A bond issue to finance partial reconstruction of the Saint Helena grammar and high school buildings to render them safe from earthquake damage has been proposed to the school board of trustees by D. C. Willitt, supervising structural engineer of the State Division of Architecture.

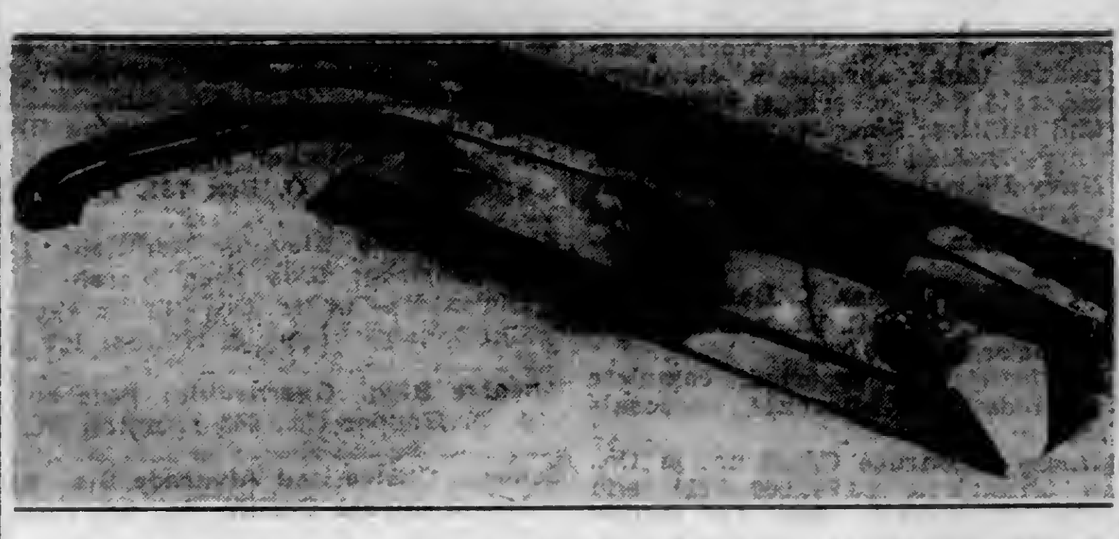
For Better Building - - Streamlined Plumbing For Modern Home



In announcing the "Commodore" ledge-type swingpout faucet, illustrated above, the General Tire and Rubber company of California, in Pasadena, is "setting the pace" in design for kitchen and future plumbing fixtures.

New war-proven methods of production, adaptable to postwar plumbing fittings, serve to offer to the public new graceful sweeping lines in keeping with the latest home designs and interiors.

The "Commodore", the first in a line of plumbing fixtures to be manufactured by this company, boasts many unique features of interest to the home owner and prospective owner. Emphasis has been placed on the ease of cleaning, maximum coverage and working clearance in these units, yet offering modern functional design for smart eye appeal and lasting service.

New methods of fabricating these units insure contractors and owners of a production supply equal to the demand at a minimum cost.

Trevor Gardner, vice - president and general manager, stated that General Tire plans to supplement its commercial activities with additional items in the plumbing fixture line and by manufacturing other products which are now under development.

Architects Will Meet Tonight

The motion picture, "Heat and It's Control", produced by Johns-Manville Corp., will be shown tonight before members of the San Francisco Architectural club following the regular business meeting and dinner. L. C. Hillut and Deacon Jones, of the Johns-Manville Corp., will conduct the program which will be held at 8 p. m. in the Builders' Exchange, 666 Mission Street.

Members will assemble in club headquarters at 6 p. m. and leave in a group for dinner.

The Class Committee will outline the proposed educational program, which will be submitted to the membership for approval.

Persons connected with the building industry are invited to attend, and members are urged to bring guests.

War Assets Corp. Opens New Sales Display Room Today

Formal opening of the War Assets corporation surplus property sales display room at 460 Market street, San Francisco, is announced today.

"This display room will feature the capital-producer goods items which are to be offered for sale through the War Assets corporation San Francisco regional office," Floyd S. Leaver, deputy regional director, states, "and startting today this display will be officially open Monday through Friday each week."

Included in the items displayed are electric generator sets, some machine tools, wire, cable, rope and wire rope, electric fittings including switches, terminals and junction boxes.

"Though actual sales are not concluded out of the display stock, the samples fairly represent items available for immediate delivery from warehouse stocks in the San Francisco area," Leaver declares, "and purchasers may arrange for detailed inspection, complete buying arrangements and obtain detailed or general information from the trained staff of the display room."

H. M. Tayler Dead; Stricken In Office With Heart Attack

Howard Mathew Tayler, 59, president of Tayler & Spotswood company, distributors of iron and steel products in this city, died Monday in his office when stricken with a heart attack.

Funeral services will be held at 2 p. m. today from N. Gray and Co. parlors, Divisadero at Post Streets. Burial will be in Mountain View Cemetery, Oakland.

Mr. Tayler, a native of San Francisco, was a member of the Olympic Club, San Francisco Rotary Club, the OPA advisory board representing steel jobbers on the Pacific Coast, and was a past master of San Mateo Lodge 226, Free and Accepted Masons.

He is survived by his widow, two brothers and a sister. The family home is at 531 St. Francis boulevard.

Use "Builderads"— They Bring Results

Taxpayers' Law Suit Blockades City Improvement Plan

The city of San Francisco is being blocked from over eight million dollars of public improvements, according to a report given the San Francisco Chamber of Commere today.

The report made by Frank S. Hanlon, chairman of the San Francisco Municipal Conference, took the form of a statement commenting on a taxpayers' suit which has been filed against the city.

"Some $8,246,000 allocated to San Francisco for its public improvement program is being bottlenecked," Hanlon declared.

Bottleneck, he said, is the taxpayers' suit against the city which would prevent payment for preparation of plans and specifications for a proposed sewage treatment plant.

To break this bottleneck, Hanlon said, Clyde C. Kennedy, with whom the Public Works Director entered into a contract to provide plans and specifications for the North Point Sewage Treatment Plant, has applied to the Supreme Court for a writ of mandate to compel City Controller Harry D. Ross to make the first payment under his contract.

This proceeding has been instituted by attorneys John L. McNab and Walter E. Hettman.

The San Francisco Municipal Conference has obtained permission for its attorneys, Allen G. Wright and Sylvester J. McAtee, to file a brief as friend of the court in support of Kennedy's petition.

In addition to the North Point Sludge Treatment Plant which involves $3,000,000, other public projects for which funds have been allocated and which await the decision of the court to determine their future progress are:

Juvenile Detention Home, costing $1,250,000, for which bonds have been voted by the people; Sunset Junior High School, costing $975,000; Richmond - Sunset Treatment Plant Extension, costing $600,000; San Francisco Junior College Hot House Buildings, costing $46,000; New Mission Police Station, costing $75,000; and for geologist consultation required in connection with tunnels in the Lake Merced District Sewer System, a project estimated to cost $3,400,000.

Commenting on the issues involved in the taxpayers' suit, Hanlon said, "The questions submitted for decision demand prompt answer if the best interests of San Francisco are to be served. Otherwise, San Francisco will be brought to a standstill in the very inception of a program of public improvements long postponed due to war restrictions and now urgently required to meet demands."

Members of the Municipal Conference participating in the suit are the San Francisco Chamber of Commerce, Downtown Association of San Francisco, San Francisco Real Estate Board, Apartment House Association of San Francisco, Inc., Building Owners and Managers Association, and the California Northern Hotel Association.

GROOVER AND I

A LONELY MAN

Earl Browder was born in Wichita, Kan. Among the high points of his eventful life was a term in the gow for opposing the draft law during the first World War. He joined the Commies and has been quite active in the affairs of the Communist Party, becoming Secretary of the Party in 1929. In the eyes of the Supreme Court, the objectives of the Commies are not in keeping with the ideas of the Founding Fathers of this Republic.

★ ★ ★

When things were going tough for Russia in May 1943, the Comintern went underground. The reason was quite obvious—both political and lend-lease!

★ ★ ★

Recently, the boys have been dusting off their world-wide revolution idea. However, to make it look good, a sacrificial goat was necessary and what was more fitting than to nominate a native-born American?

★ ★ ★

Just recently, Browder was quoted as saying: "After fifteen years as party spokesman, I was faced with the necessity, rather suddenly and unexpectedly, to find private employment in order to support my family. But all normal private employment is closed to me. . . ."

★ ★ ★

Browder is probably the loneliest man in the world today. I am wondering what the effect would be were he given an executive job by Automobile, Steel, or some other big industry **where he would be concerned with meeting a payroll rather than sabotaging it.**

★ ★ ★

Pete Monahan, Trainmaster of the old W. S. & J. Line, once told me that he never hesitated to employ a locomotive fireman who had burnt up a boiler. Pete said:

★ ★ ★

> **"If he burns up one boiler and lives through it, he will never do it again."**

Surplus 6-in. Pipe Marketed Here By Pacific Pipe Co.

The War Assets Corporation has just completed one of the largest sales of war surplus pipe which was manufactured to play an important part in the invasion of the Japanese mainland but was never shipped due to termination of war.

The sale was for 12,500 tons of 6-inch O. D. 12 gauge steel pipe, equipped with quick couplings. Totaling more than 600 miles of invasion piping, the lot was purchased jointly by the Pacific Pipe Company, San Francisco and Oakland; Dulien Steel Products, Inc., Seattle and Los Angeles; and the Morse Bros. Machinery company, Denver.

The buyers expect to market most of this purchase on the West Coast.

The pipe is suitable for low and high pressure lines such as used in irrigation and mining for the carrying of water and oil.

The quick couplings enable speedy laying of the pipe and were designed to expedite the completion of the job in the shortest possible time, which was essential to this type of work on the battle front.

The sale price of the pipe was reported to be "close to $900,000" when disposed of to the three companies, government officials said.

New Light-Weight Mixer Manufactured By Chain Belt Co.

Chain Belt Company of Milwaukee announces the manufacture of a new Rex end discharge 3½S tilting mixer.

The new Rex mixer weighs 150 pounds less than the former side discharge model, making it considerably easier to hitch and spot. Its wheel tread has been increased to 62 inches—about the same as that of an automobile. A lower center of gravity is obtained by cradling the mixer body between the wheels, resulting in faster and safer towing.

Other features include a choice of two engine sizes, an enclosed roller chain motor-drum drive, an all-welded pressed steel drum bowl, a ring gear driving the drum that can be easily replaced when wear occurs, a large size (24-in.) control handwheel equipped with a safe ratchet-type lock, cantilever springs and a removable tow pole.

Additional details can be had by writing Chain Belt Co., 1600 West Bruce St., Milwaukee 4, Wis.

BIDS WANTED

COLORADO-BIG THOMPSON PROJECT, Colorado.—Until March 26, 2 P M., bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1215 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Sterling or Holyoke, Colo., as stated in the specifications, one (1) 6000-kv-a., 110,000 delta- to 39,840/69,000 Y-volt, 3-phase ,60-cycle, oil-immersed, self-cooled, outdoor type power transformers for Sterling substation, with 3 single-pole lightning arresters for 69,000-volt, grounded-neutral circuit mounted on the case; three (3) 833-kv-a., 66,000 delta- to 7200/12,470 Y-volt, single phase, 60-cycle, oil-immersed, self-cooled, outdoor type power transformers for Sterling substation, each with one single-pole lightning arrester for 69,000-volt, ungrounded-neutral circuit and one single-pole lightning arrester for 12,470-volt, grounded-neutral circuit, mounted on the case; three (3) 833-kv-a., 66,000 delta- to 7200/12470 Y-volt, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor type power transformers for Holyoke substation, each with one single-pole lightning arrester for 69,000-volt, ungrounded-neutral circuit, and one single-pole lightning arrester for 12,470 - volt, grounded - neutral circuit, mounted on the case; one (1) 10-kv-a., 7200- to 120/240-volt, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor type distribution transformer, with taps and two high-voltage cover bushings for Sterling substation; one (1) 5-kv.-a., 7200- to 120/240-volt, single-phase, 60-cycle, oil-immersed, self-cooled, outdoor type distribution transformer, with taps and two high-voltage cover bushings for Holyoke substation; three (3) single-pole, thyrite or autovalve, outdoor, station type lightning arresters, designed for base mounting and suitable for service on 115,000-volt, 3-phase, ungrounded - neutral circuits for Sterling substation; one (1) 300-kv-a., 12,470-volt, 3-phase, 60-cycle, oil - immersed, self - cooled, outdoor type, automatic step-voltage regulator for use with the transformer under item 2 for Sterling substation; one (1) 300-kv-a., 12,470-volt, 3-phase, 60 - cycle, oil - immersed, self - cooled, outdoor type, automatic step-voltage regulator for use with the transformer under item 3 for Holyoke substation; one (1) 69,000-volt, 600-ampere, 3-pole, single-throw, outdoor type power circuit breaker with automatic reclosing equipment for Sterling substation; one (1) 15,000-volt, 600-ampere, 3-pole, single-throw, outdoor type power circuit breaker for Sterling substation; one (1) 15,000-volt, 600-ampere, 3-pole, single-throw, outdoor type power circuit breaker for Holyoke substation; one (1) 115,000-volt, 600-ampere, 3-pole, single-throw, manually-gang operated, outdoor type disconnecting switch with manually - gang operated grounding blades for Sterling substation; two (2) 69,000-volt, 600-ampere, 3-pole, single - throw, manually - gang operated, outdoor type disconnecting switches, one with manually - gang operated grounding blades for Sterling substation; one (1) 69,000-volt, 600 - ampere, 3 - pole, single - throw, manually-gang operated, outdoor type disconnecting switch with manually-gang-operated grounding blades for Holyoke substation; two (2) 15,000-volt, 400-ampere, 3-pole, single-throw, manually-gang operated, outdoor type disconnecting switches for Sterling substation; two (2) 15,000-volt, 400-ampere, 3-pole, single-throw, manually-gang operated, outdoor type disconnecting switches for Holyoke substation; six (6) 69,000-volt, 600-ampere, single-pole, single-throw, hook-operated, outdoor type disconnecting switches for Sterling substation; twelve (12) 15,000-volt, 400-ampere, single-pole, single-throw, hook-operated, outdoor type disconnecting switches for Sterling substation; twelve (12) 15,000-volt, 400-ampere, single-pole, single-throw, hook-operated, outdoor type disconnecting switches for Holyoke substation; three (3) 115,000 - volt, 200 - ampere, single-pole, hook-operated, outdoor type expulsion - fuse disconnecting switches for Sterling substation; three (3) 69,000-volt, 200-ampere, single-pole, hook-operated, outdoor type expulsion-fuse disconnecting switches for Sterling substation; three (3) 69,000-volt, 200-ampere, single-pole, hook operated, outdoor type, expulsion-fuse disconnecting switches for Holyoke substation; one (1) 15,000-volt, 200-ampere, single - pole, hook - operated, outdoor type, expulsion-fuse disconnecting switches for Holyoke substation; one (1) 15,000-volt, 200-ampere, single - pole, hook - operated, outdoor type, expulsion - fuse disconnecting switch for Sterling substation; one (1) 15,000-volt, 200-ampere, single-pole, hook-operated, outdoor type, expulsion-fuse disconnecting switch for Holyoke substation; three (3) 15,000-volt-insulated, 7200- to 120-volt, 60-cycle, oil-immersed, self-cooled, outdoor type potential transformers for Sterling substation; three (3) 15,000-volt-insulated, 7200- to 120-volt, 60-cycle, oil-immersed, self-cooled, outdoor type potential transformers for Holyoke substation; three (3) 15,000-volt-insulated, 150- to 5-ampere, 60-cycle, compound-filled, outdoor type current transformers for Sterling substation; three (3) 15,000-volt-insulated, 150- to 5-ampere, 60-cycle, compound-filled, outdoor type current transformers for Holyoke substation; one (1) 3-element, 3-phase, 4-wire, watt-hour, recording demand meter with 30-minute interval, mounted in a weatherproof cabinet for Sterling substation; three (3) induction type, overcurrent relays and one (1) induction-type, residual ground relay, mounted in the cabinet under item 30 for Sterling substation; three (3) alternating current ammeters with 0-150-ampere scale, mounted in the cabinet under item 30 for Sterling substation; one (1) 3-element, 3-phase, 4-wire, watt-hour, recording demand meter with 30-minute interval, mounted in a weatherproof cabinet for Holyoke substation; three (3) induction - type, overcurrent relays and one (1) induction-type, residual ground relay, mounted in the cabinet under item 33 for Holyoke substation; and three (3) alternating current ammeters with 0-150-ampere scale and mounted in the cabinet under item 33 for Holyoke substation. These substations are part of the Colorado-Big Thompson Project, Colorado. All of the apparatus will be installed by the government. No charge for copies of the specifications to prospective bona fide bidders; to others, $1.75, not returnable.

PLANS and Speculations

Sonoma: Construction of a new airport on the B. F. Keechler ranch, west of Sonoma, appeared to be a certainty today. Plans call for two runways about 200 feet wide and between 1500 and 2000 feet long. Ed Smith, former Army pilot, will manage the airport.

oOo

Oakland: Reports on technical and engineering studies for the solution of this city's sewage disposal project are expected to be ready for review by a board of engineers on April 15, John S. Longwell, chief engineer and general manager of the East Bay Municipal Utility district, has announced.

oOo

Hollister: The long - awaited building and expansion program for San Benito County high school and junior college is going ahead this Spring. Supt. A. S. Cakebread gave the go-ahead signal to architects and the planning will approach final stages next week. A total of $195,000 has been earmarked for the project.

oOo

Sacramento: Valley flood control seemed again indefinitely delayed as the issue once more became ensnarled in a maze of politics and conflicting ideas. Plans prepared by the Army engineers for a comprehensive flood control program have been approved by the legislature and authorized by Congress. But no appropriation bill is prepared for the federal legislative body. The Bureau of Reclamation is opposed to the Army plan and is proposing a plan of its own, but Rep. Clair Engle, in Washington, declared certain plans from both agencies are gathering dust on Gov. Warren's desk.

oOo

Chico: The library board is considering a $9,000 improvement plan for Chico Public Library. Changes include installation of new fluorescent lighting, heating equipment alterations, new book stacks, and other changes.

oOo

Crescent City: County planning commissioners, lead by E. F. Benedict, chairman, have okeyed the building of three parks. A master plan is being prepared by Floyd Puter, with provisions made for land use, roadside restricted areas, and residential restricted areas of the county.

oOo

GROOVER AND I

SAFETY CODE

Among the mail received by that guy Groover on a controversial subject is a letter written by Edgar N. Goldstine, Consulting Engineer. (As Groover insists upon "painting himself into a corner", I am going to leave him there until the floor dries or let him figure his own way out.)

★ ★ ★

The letter mentioned brings to mind that Goldstine is the Editor of "Construction Safety", the newsletter of the National Safety Council. **SAFETY ISN'T CONTROVERSIAL!**

★ ★ ★

There is nothing paying quite so high a dividend as the few moments required to exercise caution and be safe.

★ ★ ★

I was impressed by, and still remember, a "Safety" sign I saw years ago up in the Redwood country. The Pacific Lumber Company had a safety sign similar to the old railroad cross-arm sign, reading "Stop, Look and Listen", except this sign read: **"THINK FIRST, SAFETY ALWAYS".**

★ ★ ★

The problem of safety in the construction industry is especially important as it is one industry not yet subjected to a standardized operation — every job is slightly different from any other job.

★ ★ ★

Moses wrote the first safety law for the building industry about 3400 years ago — Deuteronomy, 22:8 — read it:

★ ★ ★

> **"When thou buildest a new house, then thou shalt make a battlement for thy roof, that thou bring not blood upon thine house, if any man fall from thence."**

Select 12 Sites For Study Of Flood Control

The Alternate Tributary Plan, possible substitute for flood control and storage on the Sacramento river at the Table Mountain or Iron Canyon sites, has been receiving continuous attention from the bureau of reclamation office at Redding, under direction of C. W. Burningham, project planning engineer.

As a result of preliminary studies of a selected group of twelve of the many possible sites on tributaries which enter the river between Shasta Dam and the mouth of Stony Creek, the Sacramento regional bureau office has now proposed that a basin-type project report be made on the plan during the fiscal year following June 1946.

Of the possible sites, the twelve which have been selected for study are: Hulen, Gallatin, Fiddlers, Millville, Tom Head, Paskenta, Whiskytown, Pain, Ingot, Diversion, Clay and Clough. Topographical surveys of seven of these dam sites and four reservoir sites have been completed, while a fifth reservoir study is underway. Preliminary geological mapping and a diamond drill program have been carried on for six of the dam sites, and geological investigations are being conducted at the remainder of the site in advance of the testing work.

Diamond drilling operations went on a two-shift schedule on January 23, according to James K. Carr, district engineer of the reclamation bureau at Chico.

REAL ESTATERS MEET THURSDAY IN WHITCOMB

National leaders of the real estate profession will be guests at the regular meeting of officers and directors of the Real Estate association of San Francisco, Thursday evening, Mar. 7, in the Whitcomb hotel, according to past president David F. Supple, treasurer of the local organization.

President Cleland O. Whitton is to officiate at the meeting, with heads of standing and special committees of the Real Estate association reporting on activities in urban development, property rehabilitation, new construction, and ways and means to provide adequate housing for returning war veterans and their families.

Surplus Steel Pontoons, Small Craft, Rubberized Suits Now On Sale Here

Large quantities of war surplus materials, adaptable to the building and construction industry, have been announced for sale by agencies of the government during the last few days. Included are steel pontoons, miscellaneous commercial and work boats, and rubberized life saving suits which have many uses.

Steel Pontoons For Sale

The steel pontoons, declared surplus by the Army Engineers, are being offered for sale by the U. S. Maritime Commission. Part of the 1800 pontoons are located at Lathrop, Calif., Oakland, and Billings, Mont. The rest are at Long Island, N. Y., Davisville, R. I., Jeffersonville, Ind., and Camp Gordon Johnson, Fla.

The pontoons are 5x5x7 feet, of 3/16-inch deck plate, fully braced and reinforced, and have a capacity of 1000 gallons. They sell for $45 each, f.o.b. location, and can be used for many purposes such as assembling in barges, floating docks, and as water or fuel storage tanks.

Permission to inspect may be obtained by writing the Materials Disposal Section, U. S. Maritime Commission, Washington 25, D. C. or the Maritime Commission's Settlement Section office, 14th and Franklin Streets, Oakland.

Work Boats For Sale

Sealed bids on 18 miscellaneous surplus commercial and work boats, four located on the Pacific Coast, will be opened in the Washington offices of the War Shipping Administration, Commerce building, on March 21.

The local craft consist of the 78 - foot self - propelled twin scow "James F. Mickenna", located in the Oakland Estuary, the 51-foot motorboat "Streamline" at Bellevue, Wash., the 55-foot fishing vessel Defender", and the 164-foot stern paddle wheel freight boat "Skagit Belle" at Seattle. The rest are in the East, Gulf and Great Lakes ports. The vessels range from 44 to 164 feet in length and include fishing boats, tugs, freighters, motorboats, and a freight passenger vessel.

West Coast bidders may obtain copies of the invitation to bid from the Director, Division of Small Vessel Procurement and Disposal, Commerce Building, Washington 25, D. C.; Ass't Deputy Administrator for the Pacific Area, 220 Bush street, San Francisco; Acting Director, North Pacific Division, 1488 Dexter Horton building, Seattle; and Port Representative, 601 Porter building, Portland, Oregon.

Rubberized Life Saving Suits

Want to buy a new rubberized life saving suit? The United States Maritime Commission has a couple of hundred of the suits for sale at a bargain price of $15 each. If you buy 12 or more of the suits the cost will be cut 40 per cent.

Interested purchasers may inspect the suits at Room 203, Financial building in Oakland, or Rm. 998, Mills building, San Francisco.

The suits are completely waterproof and include built-in rubber boots and gloves. The material is lightweight cotton duck rubberized on one side. While originally intended to afford waterproof protection to passengers of torpedoed ships, they can be worn for working out of doors and should find favor with sportsmen and outdoor workers. The suits are designed to fit any adult except exceptionally small persons.

Did You Know That . . .

J. H. Fitzmaurice, eastbay concrete and asphalt contractor, has announced the association of his two sons in the business. Robert Fitzmaurice, formerly of the engineering staff of the Standard Oil Company and recently returned from a far eastern project, is now the estimating engineer. John H. Fitzmaurice, Jr., just discharged from the U. S. Marine Corps after lengthy duty in the Pacific, is superintendent of construction.

Engineer Charles T. Broughton has moved his offices from the Bank Building to 425 Grand Avenue, South San Francisco.

Slum Clearance Chamber Objective To Speed Building

Clearance of slum dwellings from San Francisco areas destined for industrial and commercial development is the object of action taken by the San Francisco Chamber of Commerce Board of Directors, it was announced today.

This action results from a recommendation by the Sites and Buildings section of the Chamber's Industrial department.

The Chamber advocates an agreement between the San Francisco Housing Authority and the Board of Supervisors whereby funds made available by the Authority shall be used as a revolving fund for slum clearing purposes.

According to J. F. Barrett, chairman of the Sites and Buildings section, "The Housing Authority is not required to pay taxes on its housing properties. However, provisions are made for the payment of certain portions of its income from rents to the city. These payments for the past year will aggregate $403,810.94. Of this total amount $238,145 are 'mandatory' payments to be made on war housing properties, and $13,691are 2½ per cent of the shelter rent on permanent public projects, leaving $151,974 as a 'voluntary' payment which the Authority proposes to make to the city but which it could use for bond redemption or other purposes."

Under the proposed agreement between the Authority and the Supervisors, the Supervisors would return the $151,974 to the Authority to acquire slum properties by condemnation, clear them and then sell them by competitive bid. By this procedure an attempt would be made to increase areas in appropriate districts of the city available for industrial purposes.

In his report to the Chamber Board, Barrett said, "Your Sites and Buildings section is vitally concerned over the availability of factory sites in San Francisco and is engaged in a number of activities to counteract the increasing use of San Francisco real estate for non-productive purposes. Anything which will tend to make more land available for commercial and industrial use merits the most careful consideration."

It is understood that the funds which are to be used have accumulated because of the occupancy of public housing by comparatively high - income families during the war, resulting in profitable rentals rather than the need of subsidies, and that any reduction in slum dwellings will be more than offset by plans of the Housing Authority for new dwellings in San Francisco.

Craftsmen Wanted For Civil Service Jobs Overseas

A recruiting drive is being conducted by the Army Engineers for construction workers to be employed on the Tripler General Hospital project in Honolulu, T. H.

Present needs include carpenters, electricians, plumbers and steamfitters. Journeymen mechanics are also acceptable at the present time.

A medical examination and proof of citizenship will be required of all applicants. Passage will be furnished from San Francisco and return after completion of the year's contract.

Army - style living accommodations are provided at the site of construction at nominal rates and recreational facilities are readily available. Among other Civil Service benefits employees are credited with annual leave at the rate of two and one-half days per month.

Additional information and applications may be obtained by contracting Edw. M. O'Toole, Overseas Branch, U. S. Engineer office, 74 New Montgomery street, San Francisco (YUkon 0667).

12-13—INDUSTRIAL BUILDINGS

3/7/46 • 11
FUNDS GRANTED

FRESNO, Calif.—The U. S. District Engineer Office, 74 New Montgomery St., San Francisco, has been granted funds by the Veterans' Administration for the construction of a 250-bed veterans' general hospital buildnig on N. Fresno Ave., Fresno, for the Veterans' Administration. The funds were turned over to the Army subject to the approval of Attorney General Tom C. Clark and is the first assignment of Veterans' Administration hospital construction to the army engineers since General Omar Bradley announced the engineers had agreed to take over a large portion of the Veterans' Administration's $448,000,000 building program.

The funds were granted as a part of $6,590,219 for the construction of two projects in California and one in Arizona.

The projects are the Fresno hospital to cost $2,634,676 initially; a 150-bed tuberculosis addition at San Francisco, costing $1,581,103, and a 200-bed general hospital costing $2,380,440 at Phoenix, Ariz., on a site to be acquired.

The individual projects are to be turned over to the district engineer office involved and bids will be taken after the plans are completed.

3/7/46 • 13
TO ASK BIDS

FORT PECK, Mont.—The U. S. District Engineer Office, Fort Peck, Mont., expects to issue plans and specifications about Tuesday, March 12, for labor, materials and equipment in connection with the construction of the following projects, bids for which are expected to be opened about Friday, April 12:

Job No. 1

Installation of machinery, equipment and concrete work in Fort Peck power house and main control shaft No. 1, required in placing in operation the second generating unit (capacity 16,667-kva) at Fort Peck, Mont.

The work involves:

(1) 8600 cu. yds. reinforced concrete;
(2) 240 tons miscellaneous and structural steel;
(3) oil, air and gas piping, valves and tanks;
(4) heating and ventilating equipment;
(5) removal of certain minor existing temporary structures;

The government will furnish and the contractor will install the following:

(6) 2 butterfly valves (16-ft. and 12-ft diameter);
(7) one 20,000-hp. turbine and its associated hydraulic governor;
(8) one 16,667-kva., 13.8-kv. generator accessories;
(9) three 13.8-kv. electrical cubicles.

Job No. 2

Furnishing all plant, labor and materials (except materials and equipment to be furnished by the government) and performing all work required for completion of the additions to certain electrical conduit and wiring systems; the installation of the high-voltage bus work and control wiring for a 16,667-kva., 13.8-kv. AC generating unit and associated switch gear; the installation of additional control and meter wiring; the installation of certain miscellaneous electrical equipment; the installation of an air conditioning unit; the exterior cleaning and paintig of certain specified trasformers, regulators and a reactor in the outdoor substation yard, and the installation of the conduit and wiring for certain other specified equipment furnished and installed by others but to be electrically connected under this contract in the Fort Peck power house, substation and penstock areas, Fort Peck, Mont.

Prospective bidders may submit a combination bid for jobs Nos. 1 and 2, or separate bids for job No. 1 or job No. 2. Award will be made on the basis of the combination bid or separate bids, whichever results in the **lowest cost** to the government for the entire work.

A deposit of $50 will be required for specifications and drawings for job No. 1 and a deposit of $25 will be required for specifications and drawings for job No. 2.

3/7/46 12
PLANNED

BIDS OPENED
MONTEREY COUNTY, Calif. — Granite Constr. Co., Box 900, Watsonville, at $227,373 submitted low bid to the State Division of Highway, G. T. McCoy, state highway engineer, Public Works Bldg., Sacramento, for about one and nine-tenths miles in length to be graded, paved with asphaltic concrete on cement-treated base and on existing surfacing and plan mix surfacing to be placed on the shoulders, between two miles south of Salinas and Salinas in Monterey County.

The work involves:
(1) 800 cu. yds. remove concrete;
(2) 100 sta. clearing and grubbing;
(3) 35,000 cu. yds. roadway excavation;
(5) 100 cu. yds. ditch and channel excavation;
(6) 40,000 sq. yds. compact original ground;
(7) 24,500 cu. yds. imported borrow;
(8) develop water supply and furnish water equipment;
(9) 2300 M gallons apply water;
(10) 100 sta. finish roadway;
(11) 33 tons liquid asphalt SC-2 prime coat;
(12) 95 tons asphaltic emulsion paint binder, curing seal and seal coats;
(13) 200 tons screenings seal coat;
(14) 4700 tons minimum aggregate plant mix surfacing;
(15) 250 tons liquid asphaltic SC-5 or SC-6 plant mix surfacing;
(16) 2700 sq. ft. place plant mix surfacing in ditches;
(17) 13,900 tons minimum aggregate cement-treated base;
(18) 5900 bbls. portland cement cement-treated base;
(19) 5200 tons asphaltic concrete leveling course;
(20) 4900 tons asphaltic concrete, type B surfacing;
(21) 300 lin. ft. raised bars;
(22) 22 cu. yds. class A portland cement concrete structures;
(23) 900 lbs. bar reinforcing steel;
(24) 100 lbs. steel nagles curb inlets;
(25) 620 cu. yds. portland cement concrete curbs and gutters;
(26) 56 each ruby reflectors;
(27) 26 each monuments;
(28) 52 each culvert markers, project markers and guide posts;
(29) 490 lin. ft. move and reconstruct existing guard railing;
(30) 0.4 mile remove and reconstruct existing property fences;
(31) 450 lin. ft. 18-in. CMP, 16-gage;
(32) 44 lin. ft. 24-in. CMP, 14-gage;
(33) 120 lin. ft. 36-in. CMP, 12-gage;
(34) 190 lin. ft. salvage existing pipe culverts;
(35) 130 lin. ft. relay salvaged CMP.

Total bids follow:
(A) Granite Constr. Co., Watsonville $227,373.
(B) Fredrickson & Watson Construction Co., Oakland, $243,650.02.
(C) Louis Biasotti & Son, Stockton, $348,740.50.
(D) Union Paving Co., San Francisco, $249,943.

1.4 MILES RESURFACING, ETC., OAKLAND

ALAMEDA COUNTY, Calif.—Lee J. Immel, Box 65, Station A, Berkeley, at $135,659, submitted low bid to State Division of Highways, G. T. McCoy, state highway engineer, Public Works Bldg., Sacramento, for about one and four-tenths miles in length to be widened with portland cement concrete pavement and existing pavement to be resurfaced with asphalt concrete between distribution structures and 7th St. in Oakland, Alameda County.

The work involves:
(1) 650 cu. yds. remove concrete;
(2) 10,000 cu. yds. roadway excavation;
(3) 85 cu. yds. structura lexcavation;
(4) 11,500 tons imported borrow;
(5) 6100 tons imported base material
(6) 14,400 sq. yds prepare class C subgrade;
(7) develop water supply and furnish water equipment;
(8) 400 M gallons apply water;
(9) 41 sta. finish roadway;
(10) 1050 tons crusher run base;
(11) 4 tons liquid asphalt SC-1 prime coat;
(12) 9 tons liquid asphalt C-6 armor coat;
(13) 160 tons screenings armor coat;
(14) 40 tons asphaltic emulsion paint binder and seal coat;
(15) 5400 tons asphaltic concrete leveling course;
(16) 5400 tons asphaltic concrete, type A, surface;
(17) 3200 cu. yds. portland cement concrete pavement;
(18) 154 each tie bolt assemblies;
(19) 9 cu. yds. class A portland cement concrete structures;
(20) 52 cu. yds. portland cement concrete curbs and sidewalks;
(21) 20 lin. ft. 18-in. CMP siphon, 14-gage;
(22) 2 each field joints for siphon;
(23) 12 lin. ft. 10-in. vitrified clay pipe;
(24) 152 lin. ft. salvage existing pipe culverts;
(25) 152 lin. ft. relay salvage CMP culverts;
(26) 4100 lbs. bar reinforcing steel;
(27) 20 each manholes adjusted to grade;
(28) 2 each timber covers for drop inlets.

Total bids follow;
(A) Lee J. Immel, Berkeley, $135,659.
(B) Louis Biasotti & Son, Stockton, $136,170.
(C) Gallagher & Burke, Oakland, $142,204.90.
(D) Independent Construction Co., Ltd., Oakland, $147,991.

Curtis Gravel Co., Spokane, $194,356.

Wahington County — Campbell Bridge-Hazeldale section of Farmington Highway. Federal Project No. S-202 (2). 4.56 miles regarding, surfacing, oiling, approximately 7400 cu. yds. excavation, 2 M ft. b.m. untreated lumber, drive state-furnished piling and place of state-furnished treated lumber, 28,300 cu. yds. crushed rock or crushed grave, 234 tons asphalt materials.

Contract awarded to Porter Yett, Portland, tar, $109,690.

Other bidders:

T. W. Thomas, Portland, tar, $121,323.

A. H. Sexton & Sons, Corvallis, Ore., $134,172.

Babler Bros., Portland, tar, $139,846.

C. J. Eldon, Portland, tar, $142,180; other, $142,203.

3/7/46 40

BIDS OPENED

OLYMPIA, Wash.—Following submitted bids to the office of the director of highways, Clarence D. Shain, Olympia, Wash., for the construction of the following highway improvements:

1. Grading, surfacing, constructing light bituminous surface treatment and constructing treated pile and timber trestle on 2.15 miles of primary state highway No. 1, Mt. Baker branch, Welcome Grange Hall to Kendall Creek in Whatcom County, Federal Aid Project No. F-202(6), involving about 13.8 acres of clearing, 7.9 acres of grubbing, 36,120 cu. yds. of common excavation, 3100 cu. yds. of solid rock excavation, 14,120 cu. yds. of selected roadway borrow, 5200 cu. yds. of screened gravel surfacing, 500 cu. yds. f crushed cover stone, 680 tons of bituminous cement MC-2, 500 lin. ft. of beam guard rail, 1155 lin. ft. of culvert pipe, 22 M b.m. of treated timber and lumber, 500 lin. ft. of treated timber piling and other items.

Low Bidder: C. V. Wilder Co., 2006 State, Bellingham, $80,001.

Second and third low bidders: R. H. Sussex, Bellingham, $87,713; Bay Constr. Co., Inc., Seattle, $88,946.

2. Constructing a reinforced concrete T-beam bridge, 356 ft. long, across the Wenatchee River on primary state highway No. 2, Dryden vicinity in Chelan County, Federal Aid Project No. F-299(2), Unit 2, involving about 690 cu. yds. of structure excavation, 1030 cu. yds. of class A concrete, 110 cu. yds. of class B concrete, 140 cu. yds. of class D concrete, 712 lin. ft. of reinforced concrete bridge railing, 260,000 lbs. of steel reinforcing bars, 11,000 lbs. of structural steel and other items.

Low bidder, Cascade Contractors, Inc., P. O. Box 4056, Seattle, $89,723.

Second and 3rd low bidders: Neukirch Bros., Seattle, $89,808; M. P. Butler, Seattle, $97,746.

3. Constructing a steel and reinforced concrete overcrossing structure, 618.5 ft. long, to carry primary state highway No. 15 over Great Northern Railway tracks, Scenic vicinity in King County, Federal Aid Project No. FG-293(11), involving about 1024 cu. yds. of structure excavation, 1110 cu. yds. of class A concrete, 245 cu. yds. of class F concrete, 1244 lin. ft. of reinforced concrete bridge railing, 327,000 lbs. of steel reinforcing bars, 552,000 lbs. of structural carbon steel, 3800 lbs. of cast steel and other items.

Low bidder, Neukirch Bros., 745 Bellevue N., Seattle, $178,950.

Second and 3rd low bidders, M. P. Butler, Seattle, $182,620; M. P. Munter, Seattle, $183,914.

4. Grading ,surfacing, constructing bituminous surface treatment plantmix, type class F, preseal treatment, nonskid single seal treatment, on 14.391 miles of secondary state highway No. 5-H, Tenino to Pierce County line in Thurston County, Federal Aid Project No. S-261(8), involving about 3760 cu. yds .of unclassified excavation, 8060 cu. yds. of shoulder material, 2340 cu. yds. of selected roadway borrow, 9710 cu. yds. of crushed stone surfacing, 1120 cu. yds. of crushed stone filler, 2570 cu. yds. of coarse crushed screenings, 1480 cu. yds. of fine crushed screenings, 124 tons of bituminous cement MC-2, 195 tons of bituminous cement RC-5, 22,350 tons of bituminous mixture plantmix, type class F, 435 lin. ft. of culvert pipe and other items.

Contract awarded low bidder, Peter Kiewit Sons Co., 1403 W 45th St., Seattle, $173,519.

Second and 3rd low bidders, Rush & Baird, Seattle, $177,722; Western Asphalt Co., Seattle, $178,512.

Fifty-sixth Year—Vol. 56—No. 47 SAN FRANCISCO, FRIDAY, MARCH 8, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

Chico: The Chico School District will vote, probably June 4, on a plan to issue $1,250,000 in 20-year bonds, to finance construction of school buildings, to eliminate the over-crowded and unwelcome conditions of the school systems there. The necessary papers for presentation of the bonds to the people will be brought before the board at its next regular meeting on March 13.

oOo

Butte County: The Butte County Board of Supervisors March 1 unanimously approved plans for the proposed Bidwell Bar Bridge roadway, agreeing on a 26-foot width for the road. It was brought out that this will entail an expenditure of $67,500 plus an additional $4,050 for designers' fees.

oOo

Roseville: Meeting in adjourned session last week, the Roseville city council heard Frank Packard, civil engineer, explain that he hopes to have plans for bidding purposes by March 15 for the proposed sewer project in the Elm Court district. The cost has been estimated at approximately $30,000.

oOo

Sparks, Nev.: Sparks' proposed bond issue, now expected to be $135,000 instead of $100,000 as originally estimated, probably will go before the city's voters around May 1, according to Mayor D. J. Fodrin. The bond will be issued to cover the expenses of three projects: extension of the city sewage system to homes south of the S. P. railroad's tracks, modernization and enlargement of the present Sparks sewage disposal plant, and construction of a new city garage and storage yard.

oOo

Clovis: The construction of a $75,000 elementary school to replace the present inadequate structure is announced by Glenn D. Reavis, Clovis district school superintendent. A $4,200 loan from the Federal Public Works Administration has been received to cover cost of preparing plans.

oOo

Salinas: Monterey Board of Supervisors voted Saturday to purchase 20 acres of land adjacent to the county hospital for the proposed new county jail. Cost of the property for the planned Bastille was $6,000.

oOo

Martinez: Houses for veterans have received approval and the city council has instructed City Administrator Leonard McClintock to locate a site suitable for 24 FPHA houses to be erected.

oOo

Joseph B. Peebles Appointed To Sales Manager Position

Joseph B Peebles, until recently general manager of Gladding McBean company's central division, has been named sales manager of the Stran-Steel Division of Kraftile company, Niles, it was announced this week by C. W. Kraft, president. Peebles will work under Kraftile's James Crawford, vice-president, who has been promoted to the post of general sales manager directing the sale of all the organization's products and services, including acid brick and structural clay units.

Kraftile's Stran-Steel Division distributes the Quonset-type steel "packages" buildings, similar in design to those war-time buildings erected on Pacific islands by the Seabees during the invasion drive. Kraftile's sales since last December, when the line was added, are the largest among all national distributors of the Stran-Steel buildings, according to word received from the company's Chicago headquarters.

JOINT SAN FRANCISCO ENGINEERING COUNCIL MEETING

Members of the American Society of Mechanical Engineers are invited to the Annual Joint Meeting of the Member Societies of the San Francisco Engineering Council, Wednesday, March 13, at 8:00 p. m., P. G. & E. Co. Auditorium, 245 Market street, San Francisco.

The program: "Proposed Water Resources Development of the Central Valley Basin of California", by Lester S. Ready, consulting engineer.

Various plans for development of the State's water resources will be described, including their engineering, social and economic implications.

Please Note: A dinner will precede the meeting, starting at 6:30 p. m. at the Engineers' Club, 206 Sansome street. Since attendance will be proportioned among the Member Societies, please return this attached card immediately if you can attend.

Structural Steel January Bookings Total 211,182 Tons

The estimated total bookings of fabricated structural steel for bridge and building construction for the month of January, according to reports received by American Institute of Steel Construction, amounted to 211,182 tons. Estimated shipments for the month totaled 86,371 tons.

Starting with January, the Institute's monthly statistical releases will be issued on the basis of the estimated total for the industry, the same as was its practice up to 1943.

During the war years the volume of fabricated structural steel for construction purposes was so small and the conditions were so unusual it was felt unsafe to continue following the established practice. Accordingly for the years 1943, 1944 and 1945 the Institute's statistics were limited to an actual report of the data that was filed with it by the reporting companies.

The statistics of the war years do not serve as a basis of any comparison with the normal operations of the industry. Accordingly, the Institute will during 1946 give a comparison of the industry's current data with the average of the five pre-war years 1936 through 1940.

Following is the complete tabulation of bookings and shipments:

	(A)	(B)
Contracts Closed		
January	211,182	107,578
Shipments		
January	86,371	92,578
Tonnage available for fabrication within next four months	552,135	302,607

(A) Est. total tonnage for the entire industry, 1946.

(B) Est. total tonnage for the entire industry, average 1936-1940.

#

BIDS INVITED FOR EGYPTIAN HYDROELECTRIC PROJECT

Specifications for the Aswam Dam hydroelectric project in Egypt have been prepared in London and bids are to be placed before June 2, 1946, according to the Department of Commerce. Construction of the project is expected to take three years and is said to present unique engineering problems since the surface earth and underlying granite must be moved mechanically instead of dynamiting to avoid weakening the dam.

Reclamation Bureau Offers Diversified Job Opportunities

Opportunity to put war-learned skill to work on a permanent and "essential" peace-time job is offered to veterans and home-front workers by the stepped-up program of the federal bureau of reclamation for development of the Central Valley project.

The postwar construction program of the reclamation bureau, which will carry the giant reclamation undertaking until 1960, has been estimated to require the continuous employment of 18,000 men for 15 years. Numbers of positions are being filled daily, but many remain open.

Positions offered in Region II of the Bureau, together with salary ranges, are electrical engineer, $2980 - $4300; stenographic clerk, $1902 - $2100; engineering aide, (survey), $1902 - $2980; engineering draftsman, $2100 - $2980; inspector, $2100 - $2980; hydraulic engineer, $2980 - $3640; civil engineer, $2320 - $4300; right-of-way agent, $3640; land appraiser, $3640 - $4300; engineering aide (various) $1902 - $2980; agriculturist, $2320-$3640; agricultural aide, $1902 - $2980; engineer (various), $2320 - $5180; miscellaneous duplicating machine operator, $1506 - $1902; typing clerk, $1704 - $1902; and laborers at $1 per hour.

Numerous positions in each of these categories remain to be filled. Applicants will be interviewed at the Sacramento headquarters of the Region II office or at any of the local offices, which are located at Antioch, Tracy, Friant, Redding, Colusa, Chico, Modesto, Visalia, Bakersfield, Santa Barbara, and Klamath Falls, Ore.

RUSSIA PLANS TO EXPAND LUMBER OUTPUT

A 30 to 40 per cent increase in lumber production as compared with prewar output is expected in Russia during the next five years, according to reports received by the Department of Commerce. A program for mechanization and technical improvements in lumbering Russia's 3,700,000 square miles of forest tracts, comprising about one-third of the total forest area of the world, has been initiated. The program aims to increase output sufficiently to provide lumber needed for Soviet reconstruction and new developments and also a surplus for exports to place Russia among the chief lumber exporting countries.

GROOVER AND I

RSVP

Gen. A. A. Vandergrift
Commandant
U. S. Marine Corps
Washington, D. C.
Sir:

In one of the local papers there appeared a story under a San Diego February 28 dateline regarding the plight of ex-Marine Corps Officer Maurice Savage.

★ ★ ★

According to the story, ex-Marine Savage has just been billed for an itemized list of gear totaling $17.85, which he lost upon leaving Iwo Jima.

★ ★ ★

The article states that Savage was evacuated on a stretcher, unconscious, and wearing a donated pair of pajama pants.

★ ★ ★

I realize that according to the Traditions of the Corps, a Marine never lets go of his helmet, gas mask or canteen, even though unconscious; however, there is one item among the missing articles which I would like to bring to your attention: "1 packet, first aid, 31c".

★ ★ ★

There are many possible explanations which might account for this loss, ranging from carelessness to the use of the kit on Marine Savage while he was unconscious.

★ ★ ★

During this last Show, your Boys added many gleaming chapters to the untarnished record of the Marine Corps, but I would like to protest against one of our fighting men having to pay for his own bandages. **This would be establishing a dangerous precedent.**

★ ★ ★

I am, therefore, enclosing a postal money order payable to the U. S. Marine Corps for 31c to cover the cost of the first aid kit charged to ex-Marine Savage.

Respectfully,
GROOVER.

★ ★ ★

Readers: This cost me 31c plus 6c fee for postal money order No. 312999 and 8c airmail, or 45c. There will be a reply which may cause me to buy a steamship ticket for a midnight sailing.

★ ★ ★

Now, on the serious side: You do not have to be "sold" on YOUR American Red Cross, but may I make a suggestion regarding the solicitor who will call on you during the current funds campaign? This person is pavement-pounding and doorbell-ringing for you—doing more than you and doing it "for free".

★ ★ ★

As a courteous consideration, BE PREPARED AND DO NOT KEEP THE SOLICITOR WAITING.

Whipple and McGarry To Speak On Credit C.E.D.A. Meeting

Gordon Whipple, credit manager of the Paraffine Companies, and A. J. McGarry, head of the Construction and Industrial section, Credit Managers association of Northern and Central California, will be the featured speakers Monday at the regular monthly meeting of the Construction Equipment Distributors association at the St. Julian Cafe, 140 Battery street, San Francisco. The meeting is scheduled to start at 6:30 p m., A. E. Mason, secretary, announces.

The two credit authorities will speak on "The Credit Trend as Applied to Our Industry and the General Credit Picture". A question period will follow the talks. Reservations should be made before Saturday noon by telephoning OVerland 1515.

Chain Belt Company Offers Catalog Of New Concrete Mixers

The new Rex 11S and 16S concrete mixers are described in bulletin #481 just published by Chain Belt Company of Milwaukee. These new machines feature portability, high production, low over-all cost, dependability, easy operation and streamlined appearance.

Mechanical details such as 3-way mixing action, chain drum drive, shimmy skip, accurate water system, one-man hitch, etc., are plainly illustrated and described. Complete specifications on all parts of the mixers are also included.

The new Rex 11S and 16S concrete mixers are a part of the complete line of Rex construction machinery which includes Rex tilting and drum type concrete mixers, Moto-Mixers, plaster and mortar mixers, road pavers, water pumps and Rex Pumpcrete, the pump that pumps concrete.

This new catalog, and others describing any item in the line may be obtained by addressing Chain Belt Company, Milwaukee 4, Wis.

#

Carbon Monoxide gas is particularly dangerous to motorists because it is odorless, colorless and tasteless, the California State Automobile Association warns, and its presence is therefore often unnoticed. Motorists should always keep one window of the car partially open as a safeguard.

Radiant Baseboard Newest Method Of Home Heating

One of the few really new and practical developments in the heating industry which is sure to find wide application when new construction and modernization get under way is the radiant baseboard, says the plumbing and heating industries bureau.

The radiant baseboard is a hollow cast-iron unit approximately the same size and appearance as the conventional wooden baseboard. Supplied with hot water from the heating boiler, the radiant baseboard replaces the wooden baseboard on one or more of the outside walls, usually extending the full length of the room.

Painted to match the woodwork and trim in the room, the radiant baseboards blend perfectly into the general decorative scheme and are almost as invisible as the heat itself.

Radiant baseboards send heat rays straight out into the room at ankle height conforming to the engineering ideal of a low source of heat. Tests at the University of Illinois have disclosed that the floor - to - ceiling temperature differences are the smallest ever achieved by the University with any type of heating system. In other words, most of the heat is concentrated in the lower or occupied portion of the room.

ATTENTION HOMELESS VETS . . .

A pertinent message to homeless veterans giving ex-servicemen the lowdown, with no punches pulled, on their chances of getting a new home this year, is printed on page three.

Utterly frank and devoid of misleading phrases and promises, "A Message to a Homeless Veteran" gives the former G. I. Joe an honest answer to his searching quetions concerning home building now.

The message is sponsored by J. H. Fitzmaurice, contractor of concrete and asphalt, and the Alta Building Material company, both of 2857 Hanah street, Oakland, two of the Bay Areas' most progressive and civic minded business concerns.

To insure distribution of this message to veterans in the area, this editon of the Daily Pacific Builder has been circulated to veterans groups throughout Central and Northern California.

OFFICIAL PROPOSALS

FIRST PUBLISHED TODAY

Highway Improvement—Siskiyou Co.

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 27, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Siskiyou County, portions between Weed and Yreka (II-Sis-3-B), about twenty and four-tenths (20.4) miles in length to be surfaced with imported borrow base and plant-mixed surfacing.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Flagman	1.00
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Operator of power shove lor other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President of any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements — Monterey County at Priest Valley Maintenance Station

STATE OF CALIFORNIA
DTPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 50 Higuera Street, San Luis Obispo, California, until 10:00 A. M. o'clock, on **March 21, 1946**, at which time and place they will be publicly opened and read, for performing work as follows:

Monterey - County, at the Priest Valley Maintenance Station, about 23 miles east of San Lucas (V-Mon-10-C) a water well to be drilled and cased.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

The rates of wages, including overtime, holiday or Sunday rates, herein specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Laborer	$1.00
Drilling machinery operator	1.70
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates. Sundays and holidays (except watchmen, guards and flagman) — one and one - half (1½) times the above rates.

State Highway Engineer's Estimate

Item 1. 150 lineal feet drilling and casing well.

Item 2. 10 hours pumping well.

Intention No. 1-26-46F—Sanitary Board of the San Pablo Sanitary District of California

NOTICE INVITING SEALED PROPOSALS FOR SEWER IMPROVEMENTS UNDER IMPROVEMENT ACT OF 1911 AND UNDER IMPROVEMENT BOND ACT OF 1915

Pursuant to statute and to resolution by the Sanitary Board of the San Pablo Sanitary District of California, ordering the work and directing this notice, said Sanitary Board hereby invites sealed proposals or bids for doing the work and improvement described in Resolution of Intention No. 1-26-46F of said Sanitary Board of the San Pablo Sanitary District of California adopted January 26, 1946. Said Resolution of Intention is hereby referred to for a description of said work and improvement, the grades to which it is to be done, a description of the District to be assessed to pay the costs and expenses thereof, the bonds to be issued upon the security of the unpaid assessments and for all other particulars contained in said Resolution of Intention. Reference is hereby further made to the plans and specifications for said work and improvements on file in the office of the Secretary of said Sanitary Board, in accordance with which said work and improvement shall be done and made.

All proposals or bids shall be accompanied by a check payable to the Sanitary Board of said San Pablo Sanitary District and certified by a responsible bank for an amount which shall be not less than ten percent (10%) of the aggregate amount of proposal, or by a bond for said amount and so payable, signed by the bidder and two sureties, who shall justify, before an officer competent to administer an oath, in double the said amount, over and above all statutory exemptions.

Notice is hereby given that in accordance with law, said San Pablo Sanitary District, California, has determined and established the general prevailing rate of per diem wages for each craft or type of workman needed to execute and perform said work and improvement, a schedule thereof being hereto appended and designated ".Schedule of Per Diem Wage Rates".

SCHEDULE OF PER DIEM WAGE RATES

Classification	Per Diem Wage
Pipe Layer (Ironstone Sewer Only)	$13.60
Plumbers	13.60
Tractor Operator	13.60
Power Grader Operator	14.80
Drag Line or Crane Operator (Under 1 cubic yard)	16.00
Drag Line or Crane Operator (Over 1 cubic yard)	18.00
Trenching Machine Operator	14.80
Power Roller Operator	13.20
Power Shovel Operator (Under 1 cubic yard)	16.00
Power Shovel Operator (Over 1 cubic yard)	18.00
Oilers and Firemen	11.20
General Laborers	10.00
Pneumatic Tool Operators	11.00
Powder Men	12.00
Bricklayer (plus transportation)	16.40
Hod Carrier (plus transportation)	17.20
Guards, Flagmen and Watchmen	10.00
Labor Foremen	12.00
Concrete Mixer Operator	12.00
Cement Finishers	14.00
Carpenters	14.00
Pilemen-Bridgemen	14.88
Truck Driver:	
(Dump—under 4 cubic yards)	9.20
(Dump—4 cu. yd., under 6 cubic yards)	10.10
(Dump—6 cu. yds., under 8 cubic yards)	11.00
(Dump—8 cubic yards)	13.80
(Pickup under 1000 lbs.)	8.50
(Flat rack over 1000 lbs., less than 4500 lbs.)	9.20
(Flat rack over 4500 lbs.)	9.80
(Transit Mix Concrete under 2 cubic yards)	9.28
(Transit Mix Concrete, 2 cu. yds. and under 3 cu. yds.)	9.88
(Transit Mix Concrete, 3 cu. yds. and under 5 cu. yds.)	10.58
(Winch Truck)	10.38
(Road Oil)	9.78
(Water Truck)	9.78

The minimum wage paid to all skilled laborers for which rates are not shown above shall be not less than $1.50 per hour.

The minimum wage paid to all unskilled laborers for which rates are not shown above shall be not less than $1.25 per hour.

Overtime rates, unles otherwise specified, at rate of double time.

Teamsters, all overtime at rate of time and one-half.

Shift work, two or more consecutive shifts, 7 hours work at eight hours pay. Eight hours shall constitute a day's work unless otherwise noted. The contractor shall, in the performance of the work and improvements, conform to the Labor Code of the State of California and other laws of the State of California, applicable thereto, the exception only of such variations as may be required under the special statutes pursuant to which proceedings hereunder are taken and which have not been superseded by the provisions of the Labor Code. Preference to labor shall be given only in the manner provided by law. Veterans and resident local labor shall be given preference by the contractor whenever possible, if skill and working ability permit without increasing the ultimate cost of the work and improvements to the District and its officer.

Reference is hereby made for further particulars to the resolution of the Sanitary Board of the San Pablo Sanitary District of California, adopted March 1, 1946, establishing such wage rates and the attention of all bidders is directed to said resolution on file in the office of the Secretary of the Sanitary Board of the San Pablo Sanitary District.

Said proposals or bids shall be delivered to the Secretary of said San Pablo Sanitary District on or before 7 o'clock P. M., on Monday, **the 25th day of March, 1946**, on which day and hour all proposals or bids received will be publicly opened by said Sanitary Board of the San Pablo Sanitary District, California.

Dated: March 1, 1946.

Highway Improvements—Mendocino County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 27, 1946**, at which time they will be publicly opened and read, in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Mendocino County, at Dooley Creek, 1 mile east of Hopland (I-Men-16-A), a reinforced concrete slab bridge on concrete pile bents to be constructed and about twelve hundredths (0.12) mile of approaches to be graded and surfaced with road-mixed surfacing and seal coat applied thereto.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.125
Cement finisher	1.75
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity)	1.70
Concrete vibrator operator	1.25
Flagman	1.00
Jackhammer operator	1.25
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equpment, shovel type controls (over one cubic yard)	2.00
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capaciyt)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime — one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specification. Each bidder must be licensed and also prequalified as required by law (see said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

Highway Imp.—Merced County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock P. M., on **March 27, 1946** at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Merced County, between Black Rascal Canal and Buhach Station (X-Mer-4-C), about three and eight-tenths (3.8) miles in length to be graded and paved with Portland cement congrete and four (4) bridges to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.325
Cement finisher	1.75
Concrete mixer operator (one cu. yd. capacity or less)	1.45
Concrete mixer operator (over 1 c.y yd. capacity and paving type)	1.70
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovel type controls (up to and including 1 cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over 1 cubic yard)	2.00
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Headerboard man	1.375
Jackhammer operator	1.25
Oil distributor bootman	1.125
Oiler power shovels or cranes	1.25
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime: one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagman): one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

For Better Building

Central Vacuum Cleaning System

Compact, easy to keep clean and maintained in top mechanical condition through infrequent oilings, the vacuum producing machinery of the Spencer Vacuum Cleaning Equipment is soundly-engineered. The newest in home and office vacuum cleaning systems, the Spencer is being installed in many homes to provide housewives with modern, efficient cleaning in each room without the bulky contrivances so common to vacuum cleaning.

The unit, manufactured by the Spencer Turbine company, Hartford, Con., is composed of the machine illustrated above, plus a series of pneumatic steel tubes sealed with streamlined aluminum castings. Dirt, picked up in the rooms through a light-weight convenient hose and nozzle arrangement, is whisked into the basement depository by means of the tubing. Faster cleaning, with less work, is assured the housewife.

Lester F. Scott, 55 Brady street, San Francisco, is the local dealer.

—#—

SMALL HANGAR

An all metal prefabricated "Tee Hangar" recently announced is available for either single or multiple installations. Constructed of prefabricated structural members covered with corrugated sheets, the hangar is equipped with doors that jack-knife open to both sides far enough to make a full 38-ft. width for wingspread; the fuselage depth is 24-ft. Doors are of heavy, welded, tubular frame construction, operating on tracks welded to the structure. The hangar is T-shaped and arranged for a second unit to interlock with the first, using a common wall and trusses, and having alternate units opening on opposite sides. Where a grouping having all doors opening on one side is preferred, the hangar can be erected as a rectangle, the units placed side by side in line. The William Bayley Co., Springfield, Ohio.

—§—

WINDOW PACKAGE

A factory fitted, three-way residential window "package" includes steel casement, storm sash and screen. Glass, wood casing, outside trim and hardware are provided as part of the package. Steel frames and ventilators are bonderized for protection against rust, dip-painted in a special primer, and oven baked.

Both storm sash and screen are factory fitted, and are installed from the inside. The storm sash opens in unison with the casement window. Detroit Steel Products Co., Detroit, Mich.

—§—

DUAL LAMP UNIT

A new electrical fixture for home use brings together into one unit the infra-ed heat lamp and the ultraviolet sunlamp.

Adaptable as a floor or table model lamp, and equipped with a two-way three-position switch by which the user may select the infrared or the ultraviolet at will, the new fixture, called the "Select-o-ray", already is being produced and will be available to the public at once.

The unit is finished in ivory baked-on enamel, resembles a streamlined automobile headlight. It delivers ultraviolet rays from one end, infrared from the other. Reflectors on both lamps are built in. Westinghouse Electric Corp., Cleveland, Ohio.

—§—

FINISHES

DDT PAINT

A wall paint blended with DDT under a new patented process, "Superior 365", is said to have proved an effective insect control for as long as 16 months after a single coat application.

Developed as a wall coating for packing plants, farm buildings and other structures requiring sanitary protection, the coating has proved effective against 132 varieties of insects, is harmless to humans. It is mixed by adding water to the base paint. Superior Paint and Varnish Co., Chicago, Ill.

FOR MASONRY

A moisture-proofing and decorating compound for masonry such as stucco, brick and concrete, called "Triscoseal", is a slow hardening compound in powder form. When Mixed with water it can be applied like paint with brush or spray, on inside or outside surfaces, above or below ground. Penetrating and sealing the pores of the masonry, it waterproofs and dampproofs it at the same time. Recommended for basement walls, CONTD—
walls of swimming pools, tanks and vats, for fire walls, cornices, exposed surfaces of concrete buildings and bridges, underground passages and tunnels, etc. Can be ob-

(Continued on Page Seven)

For Better Building

(Continued from Page Two)

tained in cement gray, white, ivory, cream, light green, buff, blue and brick red; other colors available on special order. American Fluresit Co., Inc., 635 Rockdale Avenue, Cincinnati, Ohio.

WATERPROOF COATING

Recently introduced is an improved "Ranetite No. V Transparent Waterproofing" featuring a base of aluminum and calcium stearate. A clear coating, it is guaranteed to waterproof without changing the texture of the surface; it does not show after application on the outside of any mason finished building. Cannot be applied to any surface which has received paint or oil coatings. Comes ready for use, is applied with brush or spray. Ranetite Mfg. Co., Inc., 1917 S. Broadway, St. Louis 4, Mo.

FOR CONCRETE FORMS

A newly developed formula for "Formfilm" permits the coating of plywood concrete forms with the same thickness of film in one coat as previously obtained in two. Water repellent, it conditions the plywood so that it is highly resistant to warping or swelling, the manufacturers report. No concrete will adhere at any stage of drying. Tests are said to have proved that reuse of the plywood forms as often as four or five times without recoating is possible. A. C. Horn Co., 43-36 Tenth St., Long Island City 1, N. Y.

—§—

GAS BURNER

Fundamental research on a new gas burner for domestic appliances, promising to result in quicker heating and greater economy of fuel, has been completed by the American Gas Assn. Testing Laboratories.

Technically known as the "100 per cent primary air burner", the new burner draws in all the air needed through an adjustable air shutter, and makes possible shorter and brighter flames which can be placed very close to the object being heated.

—§—

DRAFTING TABLES

Two new adjustable "Work-Flow" tables—a "Tilt-Top Work Table" and a "Drafting Table"—are designed to provide the greatest possible utility and comfort for the tabletop workman.

The drafting table can be quickly adjusted in height and angle; storage space is provided for three extra boards and large drawers to accommodate working materials. The work table may be adjusted in height from 28¼ to 38¼ in for comfort of the operator in a sitting or standing position, and the top may be tilted from a level position to any angle up to 20 deg. Both tables are finished in dull green. Work Flow Equipment Co., 207 Wood St., Pittsburgh 21, Pa.

—§—

NICKEL - LINED PIPE

The inside of steel pipe can be electro-plated with corrosion-resisting nickel or other metals by means of the new "Bart Lectro-Clad Process". which develops a smooth, ductile, pore-free nickel deposit fully adherent to the base metal. It can be applied to pipe or tubing up to 18 in. over-all diameter, in random lengths approximately 20 ft. The internally plated pipe can be welded, reduced and bent, hot or cold, without destroying any portion of the internal lining. Bart Mfg. Co., 227 Main St., Belleville 9, N. J.

—§—

ROOFING METAL

A protected metal for roofing and siding on industrial and agricultural buildings consists of flat, corrugated or V-crimp steel sheets, the surfaces and edges of which have been treated with "Plastipitch", a compound which provides permanent adherence to metal at low as well as high atmospheric temperatures and protects the base from rusting, corrosion, salt air and the effects of chemical fumes. After the Plastipitch coating, the sheets are provided with additional surfaces to give extra protection. The material is said to be suitable for gutters, ventilators, flashings, ducts, etc., as well as for roofing and siding. Koppers Co., Inc., Tar and Chemical Division, Pittsburgh, Pa.

—§—

SUPPLY INDICATIONS

MAHOGANY

First deliveries of Philippine mahogany since the war will be made in the summer of 1946 in the form of logs, providing shipping space is available, according to J. Raymond Peck, president of the Insular Lumber Co.

RUBBER

Measured against prewar consumption and even greater postwar requirements, 1946 will continue to be a "famine year" as far as natural rubber is concerned, the Rubber Manufacturers Assn. reports. High quality synthetic rubbers are in good supply.

HARDBOARD

The hardboard industry has experienced no stoppage of full output during the reconversion period, according to M. P. McCullough, president, Masonite Corp., and is now expanding manufacturing facilities to meet increasing demands. Because the stocks of wholesalers and dealers long have been depleted by war demands, however, it will be necessary for some time to allocate supplies, Mr. McCullough said. The end of 1946 "should find the situation improved".

—§—

REFILLABLE PENCIL

A "Draftsman's Refillable Pencil", new on the market, has a clutch that holds the lead firmly in a non-slip rubber grip that prevents the nicking and scoring of lead which cause breakage. Especially designed for engineers and draftsmen, it has a long barrel permitting the use of any full-length standard drafting lead. The grip is knurled to provide a firm hold; an adjustable cap offers easy identification of the degree of lead used. Chas. Bruning Co., 3654-8 Montrose Ave., Chicago 41, Ill.

—§—

PLANT FOR FLOOR TILE

Work is to commence at once on a new one-story building, 427 by 127 ft., constructed of structural steel and cinder block, at the Kearny, N. J., plant of Congoleum-Nairn, Inc. The building will be used for the manufacture of asphalt floor tile. Epple and Kahrs of Newark are the architects and engineers, Turner Constr. Co., contractors.

A Message to a Homeless Veteran

YOU are home from the wars. You fought for your country and now you want the things that every American wants—a job and a good home.

You should have that home. You are entitled to it, but there just aren't enough homes to go around. Maybe you're wondering why somebody doesn't do something.

What we have to say to you isn't going to be easy. Nor is it going to be easy for you to take. We believe, however, that you would rather have it "straight" than to be kidded.

So here it is, straight from the shoulder:

There is no way by which the building business, the government, the President, the Congress of the United States or anyone else, can provide this year all the homes you and the other people of this country want. No amount of money appropriated by Congress can do it.

Several hundred thousand homes are going to be built, of course. Maybe you'll be one of the lucky ones to get one. The building industry, working with the government, will do everything in its power to supply veterans' needs first. Even so, a lot of you boys are going to be disappointed. "But why?" you ask. "Why can't we build a million homes this year?" "Let's get the assembly lines going again, prefabricate them, use the wartime airplane plants. Whatever you need to do, let's do it. But let's build homes quick!"

We wish it were that easy. We already have a lot of prefabricating plants making homes and they're no better off than any other home builder because they too can't get toilet bowls, bathtubs, lumber, etc.

If you do not get your new home this year, it will be for the same reason that a lot of you will not be able to buy a refrigerator, or an automobile, or nylon hose, or white shirts, or a suit of clothes. There aren't enough materials coming out of the factories.

Remember, the manufacturers of building materials and equipment went through the same war that the automobile people did. For 3½ years, while you were fighting on the shooting front, the building industry along with other industries was working with might and main to build and maintain the huge war plant on the home front. We found out with automobiles, nylons and refrigerators, it takes time to reconvert. The building industry was not allowed to start reconversion until after the Japanese war was over. We've had our share of strikes and labor troubles, too.

The war ended in August but home building restrictions were not lifted until October 15, 1945, less than five months ago. Yet home builders did their part; in the first 60 days they started over 125,000 homes. Many of them are not completed yet because we can't get materials, equipment and labor enough. Yes, the builders did their part, but they couldn't compete with the military. Don't let anybody tell you we fell down on the job. Good as you were as a fighting man, the best in the world, even the Japs had you tied down until you got the materials.

But once you got the stuff, Germans, Japs and nobody else could stop you. Same way with the building industry. Gradually we're clearing away the bottlenecks giving home builders the green light. Gradually we're getting more and more stuff every day, and more and more homes are being completed, more and more are being started. By the end of this year we'll be going at a million-a-year clip, and you'll have your home.

We in the building industry foresaw that this crisis would happen: We urged the government long before the end of the war to let us get our plants and plans in shape. We knew you would want a home when you got back. The government said "No!"

Well, maybe that was all right. You were fighting a tough war and you needed the stuff. But it meant the building industry could not be ready for you when you got home. We'll see that you get a home faster than anybody else can get it for you.

But what you and we should really be afraid of is that amateur tampering with so complex a thing as the building business, may prolong the home shortage unnecessarily. This could easily happen if, instead of putting all our energies on breaking the real bottleneck, we allow ourselves to be stampeded into impractical visionary schemes to produce houses by the million *when there won't be materials and equipment enough to produce more than half that many this year,* unless obstacles are removed.

Some of the ideas that are being advocated by well meaning men are so dangerous that they might upset our entire economy for years to come and delay home building indefinitely.

You don't want this to happen because it would hurt you and all the rest of the people of the United States, *and it wouldn't get you the home you want.*

You can help prevent it if you will remember that housing, like a lot of other things, is a war casualty, and that only common sense and an all-out attack on the real bottlenecks will cure it.

What are the bottlenecks?

We've already mentioned a shortage of materials. But much of this shortage is due to OPA. We're not suggesting that all price control be removed. We are suggesting that OPA stop standing in the way of production of more materials and equipment. We are suggesting that OPA stop thinking in terms of war, "reconvert," and start thinking in terms of peace and production.

One of the most serious shortages we have is in sanitaryware, plumbing supplies, radiators and the like. OPA for some time has had dozens of applications for price adjustment in this industry alone. They haven't done anything at all about them. In the meantime, manufacturers cannot get labor, because they can't afford to pay enough.

You've heard about the lumber shortage. Lumber mills are producing lots of lumber but not much of the kind that's used in homes. Why not? Largely because OPA is still operating on a wartime basis, allowing higher prices on non-home lumber and on lumber for export. These are just two of many examples.

Right there is bottleneck No. 1

Bottleneck No. 2 is labor in the field. As you know, the boys were slow in coming back and those that did, often went on other than home-building jobs. We've done something about that by giving home builders priorities on materials for veterans' homes. This will mean less general construction and so more labor will be available to build homes.

When these two bottlenecks—production and labor—are cleared away, homes will go up fast.

When we read daily about the unhappiness of thousands of veterans who can't find a home of their own, our emotions are apt to run away with us. The President says there are 5,000,000 homes needed immediately; Wilson Wyatt, our new housing chief, says 2,500,000. Thoughtful studies by economists of the Producers' Council (manufacturers) put the figure at about 850,000.

No one really knows what's correct.

But just five years ago the building industry could find customers for only 450,000 homes. Is it reasonable to suppose we desperately need 5 million?

It is important to the welfare of the people of the whole nation that you and we do some very straight thinking on this problem.

There are 6,000,000 people dependent on the building industry for a living. Perhaps you are one of them, or your brother, your father, your uncle. It is the second largest industry in the country. Let's be very careful how we monkey with the machinery that makes it run, lest our monkey wrench slip and we find we've wrecked the machinery that provides jobs for 6,000,000.

That wouldn't do you any good.

Suppose we set up assembly lines all over the country to produce houses by the million. It wouldn't help you NOW because the real bottleneck isn't home building *capacity,* it's *materials* and *equipment.* And there is every assurance that, if we did produce millions of homes in this way, they would not be the kind of homes you want, and that they would cost more. There is this fact, however:

Hundreds of thousands of carpenters, bricklayers, plumbers, electricians and other workmen, all of whom now earn their living building homes, would not have jobs. In the meantime, thousands of other workmen would have to be recruited from the already scarce ranks of labor in this country, trained and taught new skills and new techniques to build house panels in government factories. Maybe you've forgotten how long it took to work out assembly line techniques for airplanes and tanks, and that was in wartime when nobody cared how much it cost and how much sacrifice it entailed. It would take years to build a new giant industry to produce the millions of factory-made homes everyone so glibly talks about.

In the meantime, we have ready at hand, anxious to get going, a home building industry capable of producing a million—yes, a million-and-a-half—homes a year. We built 937,000 in one year, as far back as 1925, and did five billion dollars of other building besides. The labor and materials that went into this five billion dollars of non-residential building was the equivalent of another 900,000 homes.

You don't have to wait for a new giant industry to be created from scratch.

You don't have to risk wrecking our existing economy while waiting for a new type of industry.

You won't have to live in a "housing project" which is not the American ideal of a home.

The building industry, working with the government, is clearing away the wartime bottlenecks as fast as possible. By Fall we can be building at a million-homes-a-year pace, or better.

You'll have your new home as fast as you'll have your new car.

3/8/46 35
PLANS COMPLETED

OCEANSIDE, San Diego Co., Calif.—Engineers Leeds, Hill & Jewett, 601 W. 5th St., Los Angeles, have completed plans and specifications for the repair and extension of the existing municipal pier at Oceanside for the City of Oceanside. Plans call for the repair, reconstruction and extension of the existing structure which will include reinforcing the existing piles, add horizontal braces in each bent to relieve bracing, installation of new piles where old piles have been washed out, replace or reinforce damaged stringers in the deck structure, replace decking and surface entire deck with one inch of asphaltic concrete. Eight sets of bracing on the towers are to be replaced with angle bracing of all welded steel construction. Plans and specifications have been approved by the city council of the City of Oceanside; estimated total cost, $175,000 to $214,000. The city council has reported plans to sponsor a bond election on April 9 to provide additional funds for the construction of the project.

BIDS WANTED

SAN DIEGO, Calif.—Until March 21, 11 A. M., bids will be received by the U. S. Navy, 11th Naval District, Public Works Department, 1220 Pacific Highway, San Diego, for the drilling of a new well complete with pumping equipment and shelter; for a system of cast iron water distribution mains with valves, fittings and fire hydrants; for a 1,000,000-gallon reinforced concrete reservoir, and for other miscellaneous work. Specification 17626. The project includes earthwork, concrete construction, water well and pumping equipment, water supply and fire protection system, carpentry, roofing, lathing and plastering, field painting, electrical work and other miscellaneous related work. Specifications and bidding data available from the above office upon deposit of check or postal money order for $10, payable to the Chief of Bureau of Yards and Docks.

34—DAMS, RESERVOIRS & DREDGING

3/8/46 34
BIDS WANTED

ALTUS PROJECT, Okla. — Until April 3, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Altus, Okla., under Spec. 1182 for construction of earthwork and structures, West Canal laterals W-6.2 to W-11.5 and sublaterals, Blair laterals and sublaterals, Altus Project, Okla. The work is situated in the vicinity of Blair, Okla.

The principal items of work and the estimated quantities involved are as follows:

SCHEDULE No. 1
West Canal Laterals and Sub-laterals, W-6.2, 7.4, 8.4, 9.5, and 10.6
(1) 60,000 c.y. excav. for laterals;
(2) 30,000 sta. c.y. overhaul;
(3) 3,500 c.y. compacting embankments;
(4) 1,000 c.y. excav. for drainage channels and dikes;
(5) 7,000 c.y. excav. for structures;
(6) 6,500 c.y. backfill;
(7) 4,000 c.y. compacting backfill;
(8) 600 c.y. concrete in structures;
(9) placing 48,000 lbs. reinf. bars;
(10) 600 sq. yds. dry-rock paving;
(11) erecting 12 M. ft. b.m. timber in structures;
(12) laying 188 l.f. 18-in. diam. conc. pipe;
(13) laying 892 l.f. 24-inch do;
(14) laying 356 l.f. 30-inch do;
(15) laying 56 l.f. 36-inch do;
(16) laying 192 l.f. 42-inch do;
(17) laying 118 l.f. 48-inch do;
(18) placing 400 lbs. metal water stop in joints;
(19) installing 13,000 lbs. of gates;
(20) installing 2,000 lbs. misc. metal work.

SCHEDULE No. 2
West 11.3 Laterals and Sublaterals
(1) 51,000 c.y. excav. for laterals;
(2) 25,000 sta. c.y. overhaul;
(3) 3,500 c.y. compacting embankments;
(4) 750 c.y. excav. for drainage channels and dikes;
(5) 3,200 c.y. excav. for structures;
(6) 3,000 c.y. backfill;
(7) 1,800 c.y. compacting backfill;
(8) 425 c.y. concrete in structures;
(9) placing 29,000 lbs. reinf. bars;
(10) 400 s.y. dry-rock paving;
(11) erecting 9 M. ft. b.m. timber in structures;
(12) laying 268 l.f. 18-in. diam. concrete pipe;
(13) laying 836 l.f. 24-inch do;
(14) laying 204 l.f. 30-inch do;
(15) laying 290 l.f. 36-inch do;
(16) laying 60 l.f. 42-inch do;
(17) installing 17,300 lbs. gates;
(18) installing 2,100 lbs. misc. metal work.

SCHEDULE No. 3
West 11.5 Laterals and Sublaterals
(1) 55,000 c.y. excav. for laterals;
(2) 50,000 sta. c.y. overhaul;
(3) 2,000 c.y. compacting embankments;
(4) 3,000 c.y. excav. for drainage channels and dikes;
(5) 6,000 c.y. excav. for structures;
(6) 5,000 c.y. backfill;
(7) 3,000 c.y. compacting backfill;
(8) 470 c.y. concrete in structures;
(9) placing 34.000 lbs. reinf. bars;
(10) 600 s.y. dry-rock paving;
(11) erecting 5 M. ft. b.m. timber in structures;
(12) laying 160 l.f. 18-in. diam. concrete pipe;
(13) laying 428 l.f. 24-inch do;
(14) laying 288 l.f. 30-inch do;
(15) laying 100 l.f. 36-inch do;
(16) laying 420 l.f. 42-inch do;
(17) placing 350 lbs. metal water stop in joints;
(18) installing 13,500 lbs. of gates;
(19) installing 1,600 lbs. misc. metal work.

SCHEDULE No. 4
Blair Laterals and Sublaterals
(1) 94,000 c.y. excav. for laterals;
(2) 30,000 sta. c.y. overhaul;
(3) 3,000 c.y. compacting embankments;
(4) 8,000 c.y. excav. for drainage channels and dikes;
(5) 10,000 c.y. excav. for structures;
(6) 9,000 c.y. backfill;
(7) 5,000 c.y. compacting backfill;
(8) 975 c.y. concrete in structures;
(9) placing 77,000 lbs. reinf. bars;
(10) 1,000 s.y. dry-rock paving;
(11) erecting 17 M. ft. b.m. timber in structures;
(12) laying 436 l.f. 18-in. diam. concrete pipe;
(13) laying 1,372 l.f. 24-in. do;
(14) laying 492 l.f. 30-inch do;
(15) laying 160 l.f. 36-inch do;
(16) laying 180 l.f. 42-inch do;
(17) laying 196 l.f. 48-inch do;
(18) placing 600 lbs. metal water stop in joints;
(19) installing 22,000 lbs. gates;
(20) installing 3,300 lbs. misc. metal work.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; W. R. Nelson, Regional Director, P .O. Box 1609, Oliver-Eakle Bldg.. 6th and Polk Sts., Amarillo, Texas; H. E. Robbins, Constructing Engineer ,Altus, Okla.; and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Construction Engineer.

No charge for specifications to prospective bidders; to others, $2.50, not returnable.

3/8/46 • 34
TO ASK BIDS

FORT PECK, Mont.—The U. S. District Engineer Office, Fort Peck, Mont., will issue plans nad specifications about March 15 and will receive bids about April 15 (postponed 30 days from previous announcement), for construction consisting of raising crest of main dam and dike sections of Fort Peck Dam approximately an average of 4 feet for a distance of approximately 4 miles, construction of roadway including placement of 7-inch gravel base course across the crest of the dam and installation of a night lighting system along the roadway. Approximately 241,000 cubic yards of excavation will be placed and compacted in an embankment fill. The work includes 45,000 cubic yards of gravel, 17,000 square yards of stone facing on dam and 88 street lighting units with underground cable system (8000 cubic yards of gravel blanket and stone for dam facing will be furnished by the government and placed by the contractor). A borrow pit is adjacent to the construction area. The work also includes producing, hauling and stockpiling 53,000 cubic yards of gravel base material, 8500 cubic yards gravel top course material, 15,000 cubic yards of aggregate for bituminous concrete and 3400 cubic yards of stone chips. The work is to commence within 30 days after notice of award and will be completed within 180 days.

3/8/46 34
BIDS OPENED

SEATTLE, Wash. — Puget Sound Bridge & Dredging Co., 2929 16th Ave. SW., Seattle, at $54,282, submitted low bid to the officer in charge of construction, Bureau of Yards & Docks, 13th Naval District, Exchange Bldg., Seattle, under Spec 17619 for dredging and disposal of 498,000 cu. yds. material from Wapato waterway and Commencement Bay, adjacent to Todd Pacific Shipyards, Inc., Tacoma.

General Construction Co., at $58,000, submitted only other bid.

3/8/46 34
BIDS WANTED

BALMORHEA PROJECT, Texas.—Until March 27, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Amarillo, Texas, under Spec. 1186 for the construction of earthwork and structures, Phantom Lake canal and inlet feeder canal, Balmorhea Project, Texas. The work is situated in the vicinity of Balmorhea, Texas.

The principal items of work and the estimated quantities involved are as follows:

Schedule No. 1—Phantom Lake Canal
(1) 8400 cu. yds. excavation, common, for canal;
(2) 200 cu. yds. excavation, rock, for canal;
(3) 200 sta. cu. yds. overhaul;
(4) 3300 cu. yds. excavation, common, for structures;
(5) 50 cu. yds. excavation, rock, for structures;
(6) 1000 cu. yds. compacting embankments;
(7) preparing 200 sq. yds. of rock foundations for concrete lining;
(9) trimming 19,000 sq. yds earth foundations for concrete lining;
(9) 2000 cu. yds. backfill;
(10) 300 cu. yds. compacting backfill;
(11) 175 cu. yds. concrete in structures;
(12) 1640 cu. yds. concrete in canal lining;
(13) placing 105,000 lbs. of reinforcement bars;
(14) 25 sq. yds. dry-rock paving;
(15) 160 cu. yds. rubble masonry;
(16) erecting 2 M ft. b.m. of timber in structures;
(17) laying 240 lin. ft. 15-in. diameter precast concrete pipe;
(18) laying 1360 lin. ft. 27-in. diameter precast concrete pipe;
(19) laying 132 lin. ft. 30-in. diameter precast concrete pipe;
(20) erecting 24 lin. ft. No. 84 metal flume;
(21) installing 2000 lbs. of gates and miscellaneous metal work.

Schedule No. 2—Inlet Feeder Canal
(22) 11,500 cu. yds. excavation for canal;
(23) 160 cu. yds. backfill;

PLANS and Speculations

Washington: Civilian Production Administration officials are drafting a new regulation to curb commercial building and channel more materials into building homes. National Housing Expediter Wilson W. Wyatt and CPA Chief John D. Small will outline the proposal March 16.

oOo

Sacramento: Governor Warren has approved allocation of premium funds to the San Francisco-San Mateo counties for improvements to the "Cow Palace", operated by those counties in Visitacion Valley. Appropriations were also signed for acquisition of sites for a boys' school and Youth Authority clinics; $300,000 for acquisition of sites for Department of Motor Vehicles office buildings, and $60,000 for snow surveys.

oOo

Mill Valley: Voters going to the polls April 9 will be asked to select the site of the proposed Veterans Memorial Auditorium.

oOo

Sacramento: The U. S. Bureau of Reclamation regional office here has announced that 14,500 acres of public land in the Tule Lake division of the Klamath Project, Oregon, will be opened for homestead settlement within the next two years. Approximately 7,500 acres are scheduled for opening this year, officials said.

oOo

San Francisco: Dr. Philip K. Gilman of this city, has begun a survey of State hospitals to serve as a guide in postwar planning of hospital facilities. Aim of the survey, which already has an appropriation of $25,000, is to make adequate hospital facilities available to every California community.

oOo

San Rafael: Citizens groups are campaigning for an increase in the $618,000 bond issue earmarked for new construction and revising of the San Rafael elementary and high schools. Although no definite figure has been announced, concensus of groups participating indicates at least $100,000 additional will be asked.

oOo

San Rafael: The San Rafael post of American Legion has proposed that a 100-bed war memorial hospital be erected as a Marin County memorial to the war dead. County medical groups have assured Legionnaires of their backing. The proposed institution would be operated on a non-profit basis and will be built on a site chosen by competent hospital engineers.

oOo

San Jose: The City Council has approved plans for reconverting 100 Army barracks into peacetime emergency housing.

Soule' Equipment Company Moves To Larger Quarters

Soule' Equipment Company has moved into larger quarters on Ferry street near Seventh in the Port of Oakland area. According to Howard L. Stilley, general manager, the new site comprises about five acres, 31,950 square feet of it under roof, with a direct spur track running into the property. It was recently vacated by Macco Construction Co., who have moved to Brisbane.

The new site provides plenty of parts and repair space and room for parking new and used equipment under cover.

Soule' Equipment Company is Northern California dealer for LeTourneau, Bucyrus-Erie, Diamond Iron Works, Pioneer Electric, Graco lubrication equipment, American Rubber Co., and Briggs and Stratton engines.

Byron O. Pickard Dies In Berkeley Home

Byron O. Pickard, 66, nationally-known safety engineer, and manager of the accident prevention bureau of the Waterfront Employers Association of the Pacific Coast, died last Thursday in his home at 838 San Luis road, Berkeley.

Mr. Pickard organized the bureau in 1927, and was responsible for many safety innovations used in the Pacific Coast shipping industry.

Prior to 1927 he was district engineer for the Federal Bureau of Mines here, and personally directed rescue operations in several mine disasters, including the 1922 cave-in and fire at the Argonaut mine in Amador county.

He was active in the Propeller Club and a past president of the California Society of Safety Engineers. In 1938 he was elected general chairman of the National Safety Council's Marine division here.

Funeral services were held Friday from the Grant D. Miller mortuary in Oakland.

Redwood Lumbermen Plan Research On Drying Technique

Harbinger of an expansive program of research into the science of drying California Redwod lumber, an experimental dry kiln will be constructed in the heart of the Redwood Belt at Eureka, by the Redwood Seasoning Committee of the California Redwood Association.

At the opening session of the Committee's first meeting of the year, held in February at the plant of Dolbeer & Carson Lumber Company, Eureka, Harry Sherman, Hammond Lumber Co., Samoa, was installed as chairman of the Redwood Seasoning Committee for 1946; George Gregersen, Holmes Eureka Lumber Co., Eureka, took over the secretaryship.

Summary of the Committee's activities for 1945 revealed a diversified range of subjects analyzed. Principal problems studied during the year were associated with checked bird's-eye: proper methods of kiln drying sinker stok; vertical grain lumber and relation to seasoning degrade; and the segregation and proper grading at the green chain for drying purposes.

Projects planned for 1946 embrace actual experimental dry kiln runs in application of information already obtained; research in special dyring problems associated with different classifications of stock; studies of special kiln design, and investigation of such new methods of drying as may seem practical for commercial drying of Redwood.

As part of the industry's perennial program to produce an ever-higher quality product, the Redwood Seasoning Committee was set up two years ago to further advance the technique of drying Redwood lumber. Experimental work heretofore has been carried on at the kilns of member companies.

For Better Building - - New Luminous Switch Plates

Gits Luminous Switch Plates proved in very big demand before the war—and it is announced that they are again being placed on the market molded in a new luminous plastic material that surpasses the light retention value of the material previously used.

Only a few minutes of exposure to either articial or daylight will cause these switch plates to emit a fascinating blue-white glow in the dark from 7 to 8 hours.

A colorful display card, mounting five Gits Luminous Switch Plates is furnished free to each dealer. There is a style for practically every outlet need.

These switch plates are eagerly sought on the counter for their daytime decorative as well as night time utility and safety features.

When used in combination with Gits Protect-o-heields, added protection is given the walls and wallpaper surrounding the plates and thereby eliminating finger marks and soil that proves costly in decorating.

Gits Luminous Switch Plates are sold only through jobbers. Luminous Switch Plates list 25c single gang and 42c double gang. Complete information can be had by writing direct to the manufacturer, the Gits Molding Corp., 4600 West Huron St., Chicago, or from your jobber.

Did You Know That . . .

Harry A. Thomsen, III, recently discharged from the United States Marine Corps after three and one-half years service in the South Pacific, is temporarily assisting his dad, Architect Harry A. Thomsen, Jr., 315 Montgomery street. Young Thomsen will return to college shortly to complete a course in Business Administration, after which he will join his father's architectural firm.

—0—

Elvin C. Stendell, general contractor, announces the opening of new offices at 2278 Market street, San Francisco. Telephone HEmlock 5352 or Juniper 4-6328.

—0—

John M. Bartlett, general contractor, has been occupying new offices at 703 Everett street, El Cerrito, for the past month. Phone LAndscape 5-9188.

—0—

Architect Irvin William Goldstine has announced that M. L. Gaidano and Bruce E. Heiser are now associated with him in his architectural firm at 821 Market street. The offices, formerly on the 8th floor of the Pacific Building, are moved to Room 711, 7th floor.

GROOVER AND I

NAVY NOT DUMB

The U. S. Navy is now busy arranging an atom bomb experiment and test to be staged this Spring in the Bikini Atoll group.

* * *

Numerous over-aged naval craft will be used as targets on which the Navy will drop atom bombs.

* * *

(These ships were not so overaged just six months ago! To confirm that, ask what is left of the Japanese Imperial Empire.)

* * *

Here is the pay-off: Do you think the Navy Department is going out to try to blast itself out of existence? Brother, you don't know the Navy!

* * *

That is just like asking a poker player to deal you a hand while you go to the bathroom.

* * *

If we want to see what would really happen to the Navy, why not put some spirit into the thing? Why not turn the bombing job over to the Army?

#

SIMPLIFIED PRACTICE FOR ASPHALT ROOFING

Printer copies of Simplified Practice Recommendation R213-45, Asphalt Roll Roofing and Asphalt and Tar Saturated Felt Products are now available, according to an announcement of the division of simplified practice of the national bureau of standards.

The recommendation lists items of smooth and mineral surfaced roll roofing, roll siding and saturated felt for stock production and distribution. It is based in general on the schedule of these products included in War Production Board Limitation Order L-228. Its purpose is to retain for producers, distributors and users in the postwar period, the benefits which were demonstrated during the war by the application of simplified practice to the products concerned.

Copies may be obtained from the Superintendt of Documents, Government Printing Office, Washington 25, D. C., for 5 cents each. A discount of 25 percent is available to those ordering 100 or more copies.

'The House I Want' Lecture Series To Start March 7

Modern Living, California Style—a symposium to be presented by three outstanding San Franciscans in the architectural field, will open the series of six lectures — "The House I Want", sponsored by the Women's Architectural League, the San Francisco Museum of Art and the Northern California Chapter of the American Institute of Architects, on Thursday, March 7, at the Twentieth Century Club in Berkeley at 10:00 a. m. and at the San Francisco Museum of Art in San Francisco at 2:30 p. m.

Gardner A. Dailey, Architect, Thos. D. Church, Landscape Architect, and Maurice Sands, Decorator, will participate in the group discussion of Modern Living—California Style, to start the ball rolling for one of the most timely and down to brass tacks program ever offered here in a field as important as the housing one is now.

Subjects to be covered on succeeding Thursdays will be "Choice of Site", with John S. Bolles ,Architect, and Raymond D. Smith, Realtor; "Period Influence in the Modern House", with Paul R. Williams of Los Angeles, Architect for the stars. Pietro Bellucchi of Portland will discuss the "Modern House". Frances Elkins and Dorothy Liebes will handle Contemporary Decoration; Edw. A. Williams, Landscape Architect, will take up garden plans and problems, and Wm. C. Ambrose will end the series with the subject "Your House and The Architect".

There will be question and answer period after each talk.

#

OAKLAND BUILDERS' EXCHANGE ELECTION

Election of officers of the Builders' Exchange of Oakland will take place tomorrow with polls open from 8 a. m. to 5 p. m., William B. McGrath, president, announces.

Changes in voting procedure permit use of the absentee ballot provided it reaches the polls in the Exchange before March 18.

Number of directors to be elected has been increased from 7 to 12.

Nominating committee members have selected candidates for offices on the basis of getting representation from various branches of the industry.
